

## 13 Circuit Descriptions

### 13-1 Block description

### 13-2 Block operating

No	Feature	Description
1	Scaler	Scaler Integrate ADC and TMDSC, Scaling part
2	DDR MEMORY	DDR memory Save frame information that SCALER needed
3	VIDEO DECODER	This chip receives video signal from the source and decodes signal to scaler needed
4	Pivot sensor	-MCU recognize angle through the sensor and rotate OSD -Magic tune3.6 receive Basic information from MCU and rotate screen through the Pivot soft ware
5	FLASH MEMORY	Flash memory save information that MICOM needed Program update is possible through the Firmware
6	MICOM	Microcontroller Micom control all function of monitor

## Memo
