

2-CH AUDIO POWER AMPLIFIER(2W X 2)

DESCRIPTION

The SA7496L is a monolithic two channels power amplifier, it is a stereo 2W+2W class AB output stage in the DIP20 and SOP20 package, specially designed for high quality sound, TV applications.

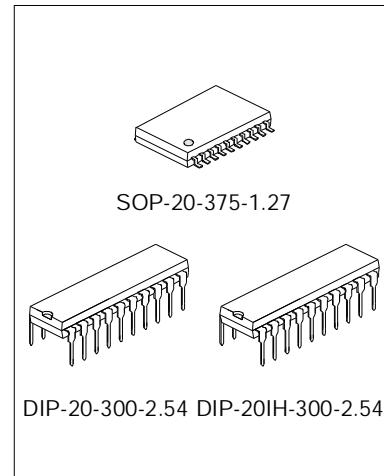

It also has the features of linear volume control, stand-by and mute functions.

FEATURES

- * Max output power: 2W+2W($R_L=8\Omega$)
- * ST-BY & MUTE functions
- * Linear volume control DC Coupled with power OP.AMP
- * Short circuit protection
- * Thermal overload protection
- * Internally fixed gain
- * Variable output after volume control circuit

APPLICATIONS

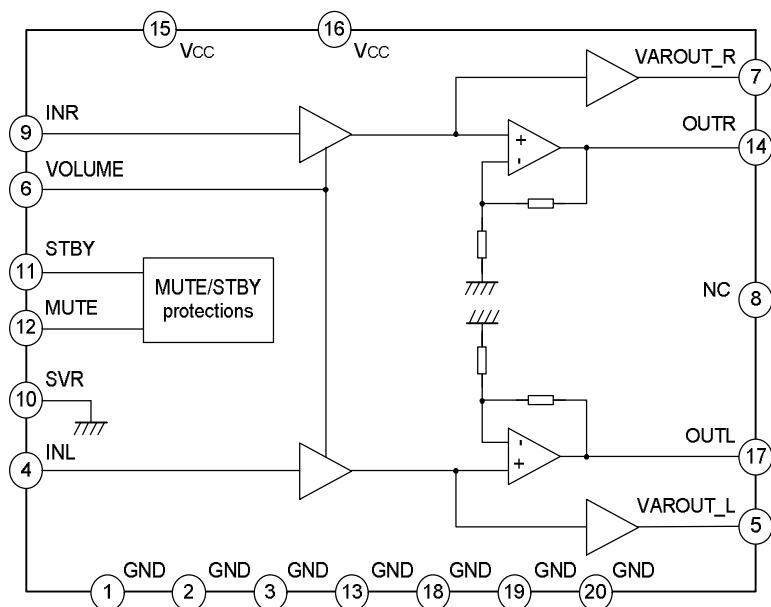

- * Quality sound
- * TV applications
- * PC Speakers
- * Sound processors
- * Mini and micro audio receivers

FUNCTION DESCRIPTION

The SA7496L is a semiconductor integrated circuit consisting of two channel power amplifiers, which is a stereo class AB power amplifier, specially designed for high quality sound, TV applications, which include linear volume control, stand-by and mute functions.

There are the MUTE and STAND-BY turn on and off conversion circuit in order to eliminate the pops noise. When the both voltages are low and the operation will be normal. While the STAND-BY is high, the circuit will turn off the bias current, so it will be the stand-by state. Also when the STAND-BY is low and the MUTE is high, the circuit will be the mute state, in this operation, the bias current of the signal channels will be shutdown.

The SA7496L built-in a DC volume control circuit. While the voltage of pin6 is 0, the output voltage will be 0; and the gain will be increased as the pin6's voltages go up.

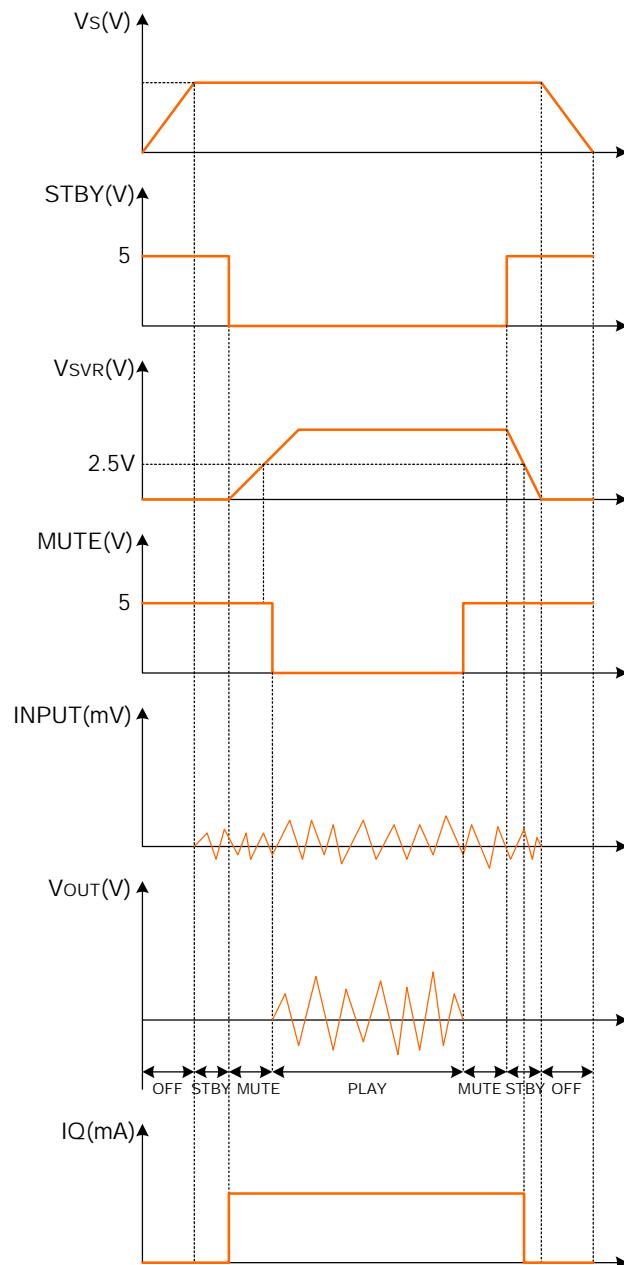

In this circuit, as the operation temperature's increase, the transistor's threshold limit value will decrease, when the temperature up to 150 °C, the thermal protection circuit will turn on and the signal channel will be shutdown.

MUTE & STAND-BY TRUTH TABLE

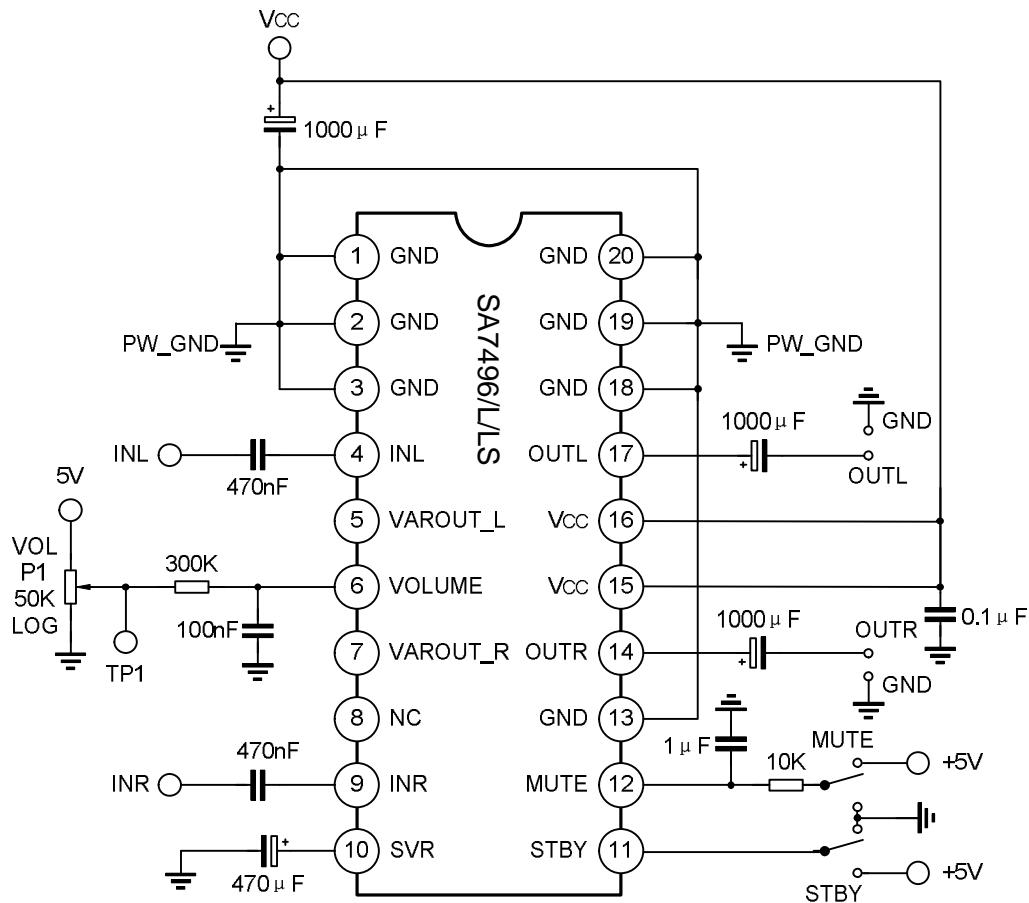

MUTE	ST-BY	Operating State
H	H	STANDBY
L	H	STANDBY
H	L	MUTE
L	L	PLAY

Note: "H" denotes the voltage is larger than 3.5V, and "L" denotes the voltage is lower than 1.5V.
