

# Service Manual

## IC Recorder

Model No. **RR-US570PP**

**RR-US570E**

**RR-US590P**

RR-US570  
RR-US590

Product Color: (K)...Black Type

### **WARNING**

This service information is designed for experienced repair technicians only and is not designed for use by the general public. It does not contain warnings or cautions to advise non-technical individuals of potential dangers in attempting to service a product. Products powered by electricity should be serviced or repaired only by experienced professional technicians. Any attempt to service or repair the product or products dealt with in this service information by anyone else could result in serious injury or death.

### **IMPORTANT SAFETY NOTICE**

There are special components used in this equipment which are important for safety. These parts are marked by **△** in the Schematic Diagrams, Circuit Board Diagrams, Exploded Views and Replacement Parts List. It is essential that these critical parts should be replaced with manufacturer's specified parts to prevent shock, fire or other hazards. Do not modify the original design without permission of manufacturer.

# 1 Safety Precautions

## 1.1. General Guidelines

1. When servicing, observe the original lead dress. If a short circuit is found, replace all parts which have been overheated or damaged by the short circuit.
2. After servicing, see to it that all the protective devices such as insulation barriers, insulation papers shields are properly installed.
3. After servicing, carry out the following leakage current checks to prevent the customer from being exposed to shock hazards.

## 1.2. Protection Circuitry

The protection circuitry may have operated if either of the following conditions are noticed:

- No sound is heard when the power is turned on.
- Sound stops during a performance.

The function of this circuitry is to prevent circuitry damage if, for example, the positive and negative speaker connection wires are "shorted", or if speaker systems with an impedance less than the indicated rated impedance of the amplifier are used.

If this occurs, follow the procedure outlines below:

1. Turn off the power.
2. Determine the cause of the problem and correct it.
3. Turn on the power once again after one minute.

Note:

When the protection circuitry functions, the unit will not operate unless the power is first turned off and then on again.

## 1.3. Safety Part Information (RR-US570, RR-US590)

### Safety Parts List:

There are special components used in this equipment which are important for safety.

These parts are marked by  $\Delta$  in the Schematic Diagrams, Exploded View & Replacement Parts List. It is essential that these critical parts should be replaced with manufacturer's specified parts to prevent shock, fire or other hazards. Do not modify the original design without permission of manufacturer.

Table 1

Safety	Ref. No.	Part No.	Part Name & Description	Remarks
$\Delta$	13	RKS0454A-K	REAR CABINET	US570PP
$\Delta$	13	RKS0454B-K	REAR CABINET	US570E
$\Delta$	13	RKS0454H-K	REAR CABINET	US590P

## 2 Warning

### 2.1. Prevention of Electro Static Discharge (ESD) to Electrostatically Sensitive (ES) Devices

Some semiconductor (solid state) devices can be damaged easily by static electricity. Such components commonly are called Electrostatically Sensitive (ES) Devices. Examples of typical ES devices are integrated circuits and some field-effect transistors and semiconductor "chip" components. The following techniques should be used to help reduce the incidence of component damage caused by electrostatic discharge (ESD).

1. Immediately before handling any semiconductor component or semiconductor-equiped assembly, drain off any ESD on your body by touching a known earth ground. Alternatively, obtain and wear a commercially available discharging ESD wrist strap, which should be removed for potential shock reasons prior to applying power to the unit under test.
2. After removing an electrical assembly equiped with ES devices, place the assembly on a conductive surface such as aluminium foil, to prevent electrostatic charge build up or exposure of the assembly.
3. Use only a grounded-tip soldering iron to solder or unsolder ES devices.
4. Use only an anti-static solder remover device. Some solder removal devices not classified as "anti-static (ESD protected)" can generate electrical charge sufficient to damage ES devices.
5. Do not use freon-propelled chemicals. These can generate electrical charges sufficient to damage ES devices.
6. Do not remove a replacement ES device from its protective package until immediately before you are ready to install it. (Most replacement ES devices are packaged with leads electrically shorted together by conductive foam, aluminium foil or comparable conductive material).
7. Immediately before removing the protective material from the leads of a replacement ES device, touch the protective material to the chassis or circuit assembly into which the device will be installed.

**Caution:**

Be sure no power is applied to the chassis or circuit, and observe all other safety precautions.

8. Minimize bodily motions when handling unpackaged replacement ES devices. (Otherwise harmless motion such as the brushing together of your clothes fabric or the lifting of your foot from a carpeted floor can generate static electricity (ESD) sufficient to damage an ES device).

## **2.2. Service caution based on Legal restrictions**

### **2.2.1. General description about Lead Free Solder (PbF)**

The lead free solder has been used in the mounting process of all electrical components on the printed circuit boards used for this equipment in considering the globally environmental conservation.

The normal solder is the alloy of tin (Sn) and lead (Pb). On the other hand, the lead free solder is the alloy mainly consists of tin (Sn), silver (Ag) and Copper (Cu), and the melting point of the lead free solder is higher approx.30 degrees C (86°F) more than that of the normal solder.

#### **Definition of PCB Lead Free Solder being used**

The letter of "PbF" is printed either foil side or components side on the PCB using the lead free solder. (See right figure)	PbF
---	-----

#### **Service caution for repair work using Lead Free Solder (PbF)**

- The lead free solder has to be used when repairing the equipment for which the lead free solder is used.  
(Definition: The letter of "PbF" is printed on the PCB using the lead free solder.)
- To put lead free solder, it should be well molten and mixed with the original lead free solder.
- Remove the remaining lead free solder on the PCB cleanly for soldering of the new IC.
- Since the melting point of the lead free solder is higher than that of the normal lead solder, it takes the longer time to melt the lead free solder.
- Use the soldering iron (more than 70W) equipped with the temperature control after setting the temperature at  $350\pm30$  degrees C (662±86°F).

#### **Recommended Lead Free Solder (Service Parts Route.)**

- The following 3 types of lead free solder are available through the service parts route.  
RFKZ03D01K-----(0.3mm 100g Reel)  
RFKZ06D01K-----(0.6mm 100g Reel)  
RFKZ10D01K-----(1.0mm 100g Reel)

#### **Note**

\* Ingredient: Tin (Sn), 96.5%, Silver (Ag) 3.0%, Copper (Cu) 0.5%, Cobalt (Co) / Germanium (Ge) 0.1 to 0.3%

# **3 Service Navigation**

## **3.1. Service Information**

This service manual contains technical information which will allow service personnel's to understand and service this model. If the circuit is changed or modified, this information will be followed by supplement service manual to be filled with original service manual.

## **3.2. Service Hint**

### **3.2.1. Flash NAND ROM IC**

Flash NAND ROM IC, IC701 is supplied as service part.

RR-US570 (1GB) - RFKWNUS570-S

RR-US590 (2GB) - RFKWNUS590-K

### **3.2.2. USB Serial Number**

Serial Number is required to obtain the Firmware Updates.

### **3.2.3. Firmware Version**

To obtain updated Firmware version and procedures for updating, please refer to item 6.2.

# 4 Specifications

<b>Power</b>	DC 3.0 V (2 AAA LR03 batteries)
<b>Batteries</b>	
<b>Audio</b>	
<b>Sampling Frequency (Stereo/Monaural)</b>	XP: 44.1 kHz/44.1 kHz LP: 22.05 kHz/16 kHz SLP: 8 kHz/8 kHz
<b>Recording Format</b>	MP3
<b>Playable Bit Rate (MUSIC folder)</b>	8 kbps to 320 kbps
<b>Playable Sampling Frequency (MUSIC folder)</b>	8 kHz to 48 kHz
<b>Frequency Response (-10 dB, Rec-Play, Monaural)</b>	XP: 180 Hz to 15,100 Hz LP: 180 Hz to 6,700 Hz SLP: 180 Hz to 2,900 Hz
<b>Built-in Microphone S/N Ratio</b>	40.5 dB (XP) Filter (JIS A)
<b>USB</b>	USB2.0 (Hi-Speed)
<b>Audio Output Earphone</b>	ø 3.5 mm (1.8"), 16 Ω, Max: 3 mW
<b>Speaker output</b>	ø 20 mm (25/32"), 8 Ω, Max: 330 mW
<b>Audio Input External Microphone</b>	ø 3.5 mm (1/8"), 0.80 mV plug in power
<b>Built-in Memory</b>	1 GB <sup>*1</sup> (RR-US570) 2 GB <sup>*1</sup> (RR-US590)
<b>Operating Temperature</b>	0°C to 40°C (32°F to 104°F)
<b>Operating Humidity</b>	20% to 80% (non-condensing)

\*<sup>1</sup> 1 GB means one billion bytes. Usable capacity will be less.

<b>Monaural</b>	XP	72 h, 00 min.	64 kbps
	LP	144 h, 00 min.	32 kbps
	SLP	576 h, 10 min.	8 kbps

<b>Max. Dimensions (WxHxD)</b>	40.4 mm x 110.6 mm x 16.8 mm (1-19/32" x 4-11/32" x 21/32")
<b>Cabinet Dimensions (WxHxD)</b>	39 mm x 110.6 mm x 15.1 mm (1-17/32" x 4-11/32" x 19/32")
<b>Mass (Weight)</b>	Approx. 65 g (2.30 oz.) with battery Approx. 43 g (1.52 oz.) without battery

Specifications are subject to change without notice.

## Battery life (may be less depending on the operating conditions.)

<b>Battery(AAA LR03)</b>	<b>Recording mode</b>		<b>Rec<sup>*3</sup></b>	<b>Play<sup>*4</sup></b>
Alkaline battery <sup>*2</sup>	Stereo	XP	approx. 23 h.	approx. 35 h.
		LP	approx. 29 h.	approx. 35 h.
		SLP	approx. 32 h.	approx. 35 h.
	Monaural	XP	approx. 32 h.	approx. 35 h.
		LP	approx. 42 h.	approx. 35 h.
		SLP	approx. 45 h.	approx. 35 h.

\*<sup>2</sup> Using Panasonic Alkaline battery.

\*<sup>3</sup> When zoom microphone is off.

\*<sup>4</sup> When audio is output from speaker (Volume: 13, EQ: off, playback speed control: x 1).

## Standard recordable time (RR-US570)

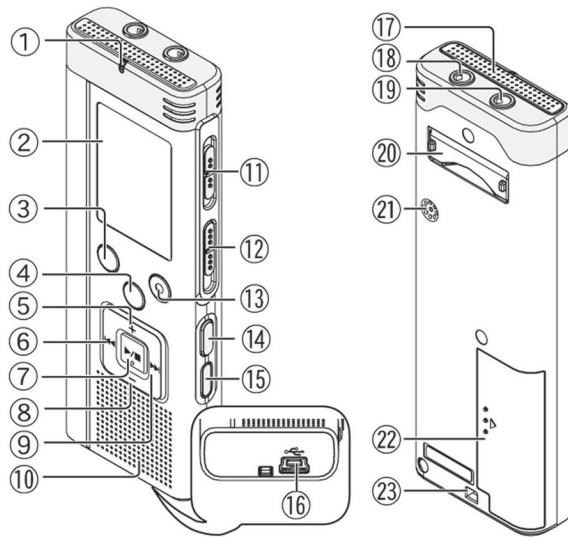

<b>Recording mode</b>		<b>Time</b>	<b>Bit rate</b>
Stereo	XP	17 h, 50 min.	128 kbps
	LP	35 h, 50 min.	64 kbps
	SLP	143 h, 40 min.	16 kbps
Monaural	XP	35 h, 50 min.	64 kbps
	LP	71 h, 50 min.	32 kbps
	SLP	287 h, 30 min.	8 kbps

## Standard recordable time (RR-US590)

<b>Recording mode</b>		<b>Time</b>	<b>Bit rate</b>
Stereo	XP	36 h, 00 min.	128 kbps
	LP	72 h, 00 min.	64 kbps
	SLP	288 h, 00 min.	16 kbps

## 5 Location of Controls and Components

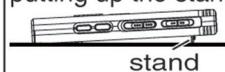

### 5.1. Components of IC Recorder

- ① Recording indicator (red)
- ② LCD display
- ③ FOLDER
- ④ STOP
- ⑤ + (Volume)
- ⑥  $\blacktriangleleft\blacksquare$  (Fast backward)
- ⑦  $\blacktriangleright\blacksquare$  (Play/Stop/Enter)
- ⑧ - (Volume)
- ⑨  $\blacktriangleright\blacktriangleright$  (Fast forward)
- ⑩ Built-in speaker
- ⑪ OPR/HOLD
- ⑫ Recording position switch  
(ZOOM/NORMAL/MANUAL)
- ⑬ REC/PAUSE
- ⑭ •MENU/-REPEAT
- ⑮ ERASE

- ⑯ USB jack
- ⑰ Built-in microphone
- ⑱ External microphone jack (MIC)
- ⑲ Headphone/earphone jack (Φ)
- ⑳ Stand

When you perform zoom recording with the unit placed on the desk, etc., stable zoom effect can be obtained by putting up the stand.

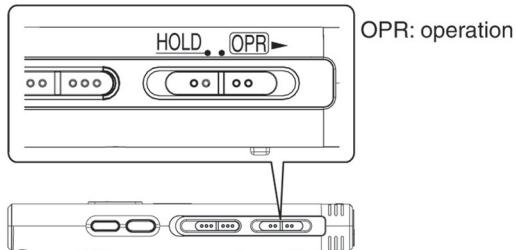

- ㉑ Zoom microphone
- ㉒ Battery cover
- ㉓ Hand strap hole

## 5.2. Basic Operation

### Turning ON/OFF the Power

OPERATION/HOLD Switch

#### Turning the power ON

- Slide OPERATION/HOLD switch to **OPR▶** side, then the power turns on and the display lights on.

#### Turning the power OFF

- Slide and hold OPERATION/HOLD switch to **OPR▶** side for 2 seconds.  
Also, when you do not operate the unit for more than approx. 15 minutes while the unit is stopped, "b4C" is displayed and the power automatically turns off.

# 6 Self-diagnostic/Doctor Mode

## 6.1. Service Functions

### 6.1.1. Test Mode

Purpose: To enter into Test Mode for checking and inspection of unit.

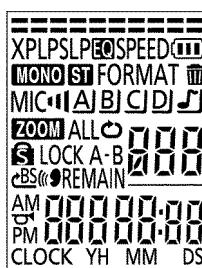

Procedures:

1. Set the recording position switch to “MANUAL” at the power off.  
(Setting to “MANUAL” after turning on the power is OK.)
2. Slide [OPR/HOLD] switch to “OPR” side to turn on the power.
3. Set to “HOLD” mode by pushing [OPR/HOLD] button.
4. Input the below keys while displaying the “HOLD”.

[MENU] --> [ERASE] --> [ $\blacktriangleleft\blacktriangleright$ ] --> [VOL-]

**Note :** Input of these keys are done within two seconds while displaying “HOLD”.

5. All segments of LCD will Light up & the unit will enter into the Operation Check Mode. During the Operation Check Mode, the Recording LED will be blinking.
6. To cancel Test Mode, power off the unit by removing batteries.

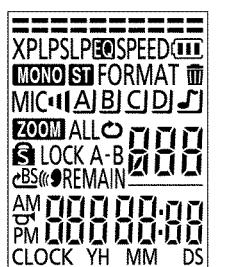

Initial display in the  
Test Mode

### 6.1.2. USB Serial Number (ID) Confirmation Function

Purpose: To check USB Serial Number (ID) which is written in the NAND flash memory at the final process is confirmed in this mode.

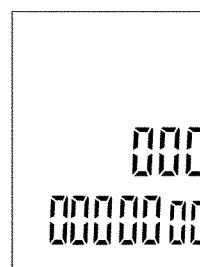

Procedures:

1. Enter into Test Mode, check all segments of LCD light up.
2. Press and hold [ $\blacktriangleright/\blacksquare$ ] for 10 seconds and the USB serial number which is written in NAND flash memory is displayed.

Initial display  
(Test Mode)

Press and hold [ $\blacktriangleright/\blacksquare$ ]  
for 10 seconds

USB serial number (ID)  
confirmation display

### 6.1.3. Reset Function

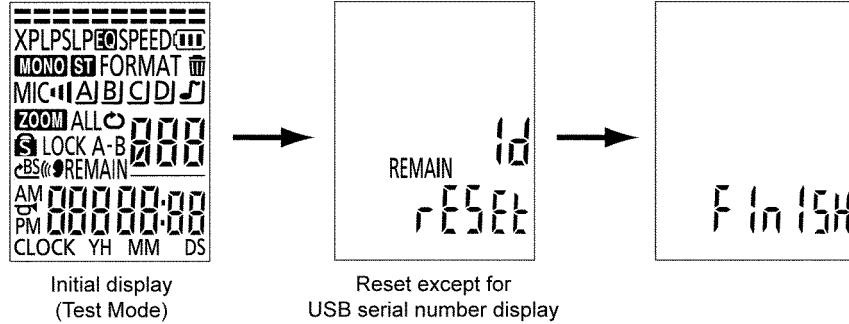

Purpose:

- To reset to factory default setting.
- Only USB Serial Number (ID) is not initialized, and NAND flash memory is not formatted logically in this mode.

Procedures:

1. Enter into Test Mode, check all segments of LCD light up.
2. Set the Recording position switch to “WIDE”.

3. Press and hold [**>/■**] for 10 seconds and enter this mode.

**Caution:**

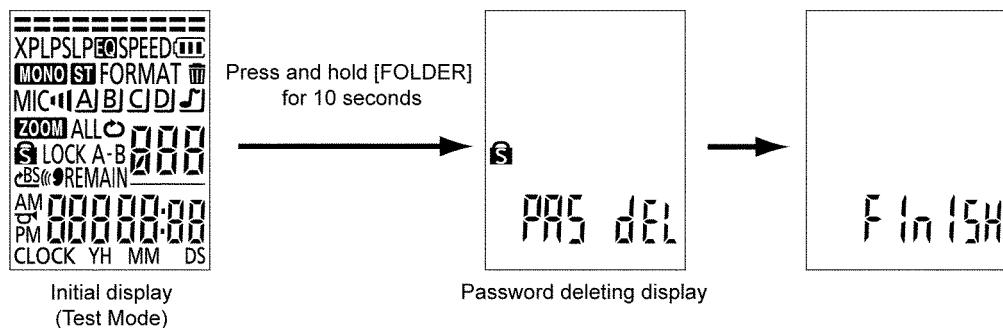

If the password is set, the password will be initialized.  
Recording files and data files other than mp3 are erased.

#### 6.1.4. Password Deletion Function

Purpose: To retain the data of all folders only deleting the password when forgotten the password.

Procedures:

1. Enter into Test Mode, check all segments of LCD light up.
2. Press and hold [FOLDER] for 10 seconds and the password is automatically deleted.

**Caution:**

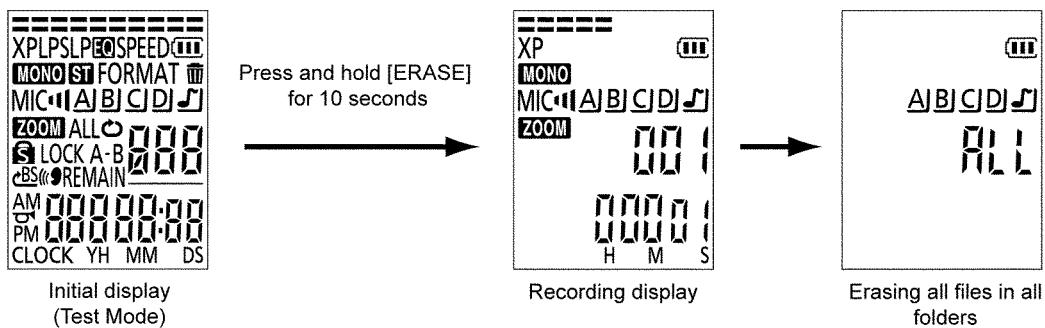

Pressing the [FOLDER] for 10 seconds is invalid when the password is unset (because of no need to delete the password).

#### 6.1.5. Repeat Recording Function

Purpose: To measure recording battery life.

Procedures:

1. Enter into Test Mode, check all segments of LCD light up.
2. Press and hold [ERASE] for 10 seconds and enter the repeat recording mode.

**Caution:**

Recording mode, stereo/monaural and zoom setting are retained the final one before entering this mode. Therefore, cannot set them in the repeat recording function.

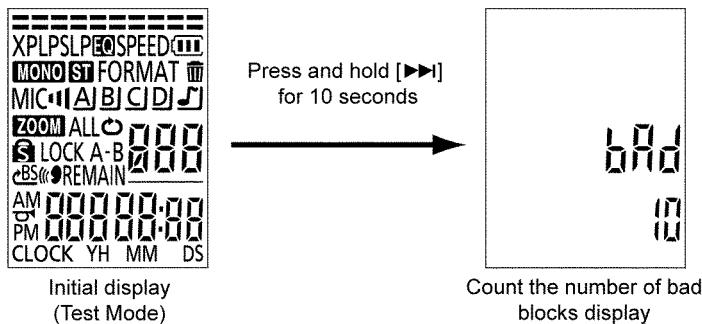

#### 6.1.6. Bad Blocks in the NAND Flash Memory Function

Purpose: To count the number of bad blocks in the NAND flash memory in order to evaluate the flash memory.

Procedures:

1. Enter into Test Mode, check all segments of LCD light up.

2. Press and hold [**►►|**] for 10 seconds and enter the number of bad blocks counting mode.

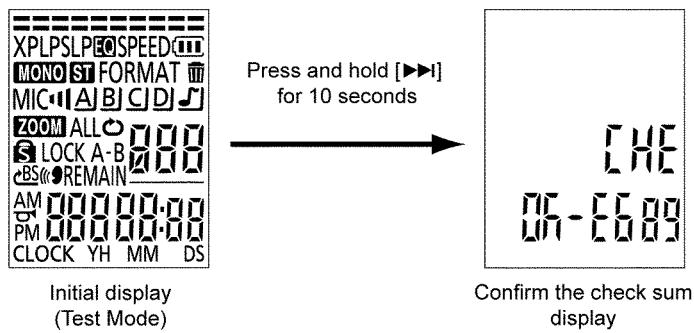

### 6.1.7. Check Sum in the Firmware Function

Purpose: To confirm the check sum in the Firmware stored area in the NAND flash memory in order to judge whether the data of the Firmware area is normal or not.

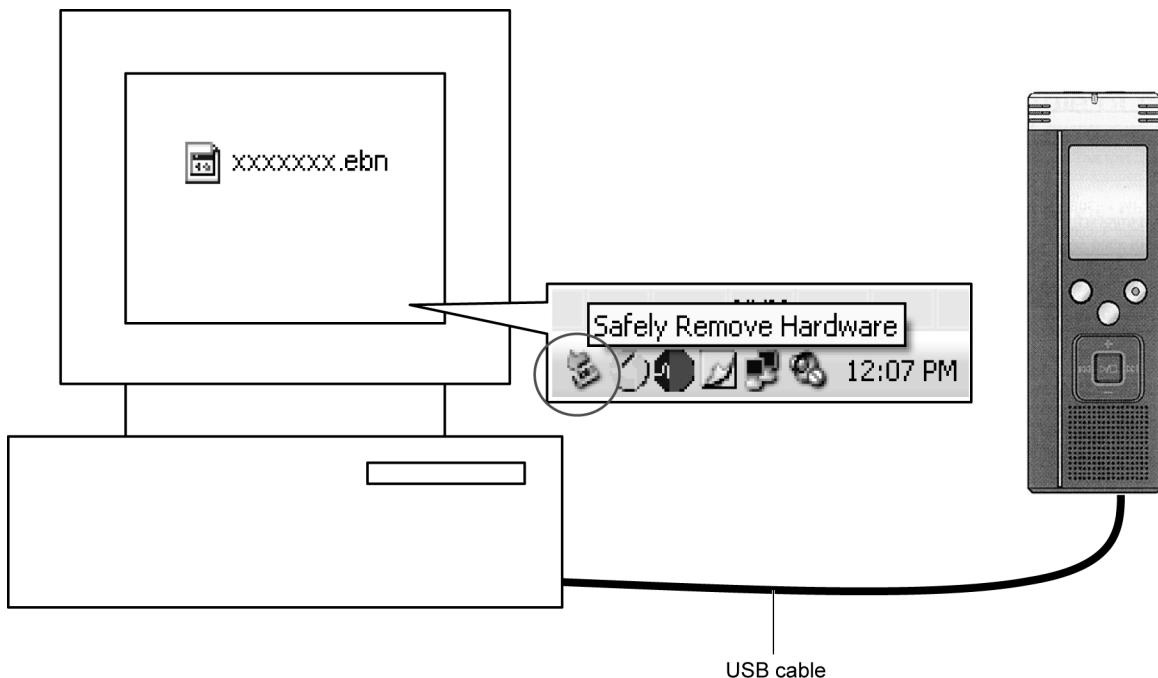

Procedures:

1. Enter into Test Mode, check all segments of LCD light up.
2. Set the Recording position switch to "WIDE".
3. Press and hold [**►►|**] for 10 seconds and enter this mode.

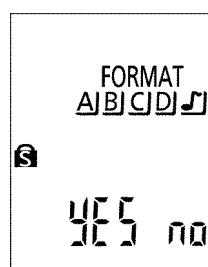

## 6.2. Firmware Update

### 6.2.1. Update Firmware and check its Version Number

- **Updating the firmware**

1. Insert battery with sufficient battery charge.
2. Connect IC-recorder to PC using USB cable.
3. Copy "XXXXXXX.ebn" file to IC-recorder root folder.
4. Terminate PC to IC-recorder connection safely  
(refer to icon at bottom right side of the monitor – "Unplug, Eject or Safely Remove Hardware").
5. Let IC-recorder perform system update, "UP" and "[F] ACCESS" will display on LCD.
6. Upon completing update, perform "FORMAT" function to erase all files in the IC-recorder.
  - Press ERASE key
  - Select the display which [FORMAT] is flashing in file erasing mode
  - Select [YES] in the [YES no] display
  - Press [▶/■]

- **Checking Firmware Version**

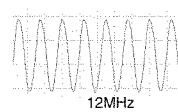

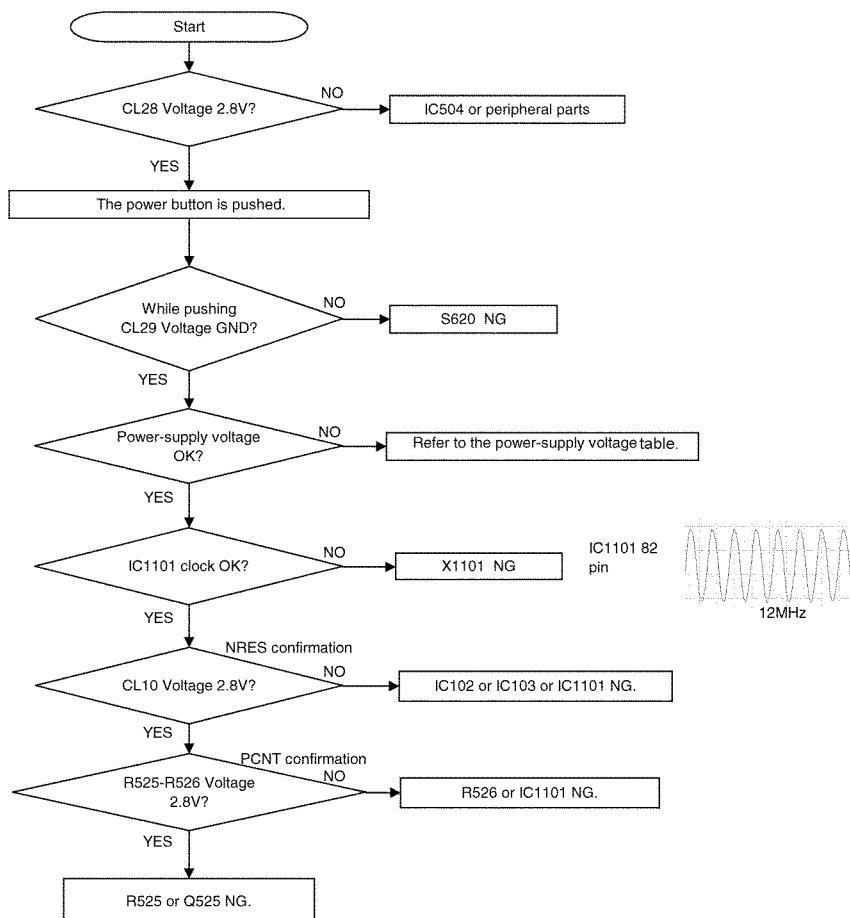

1. Press and hold [STOP] key for 10 seconds, LCD will display the firmware number.

**Note:** Firmware file and Firmware Version Number, please kindly obtain from TSN website.

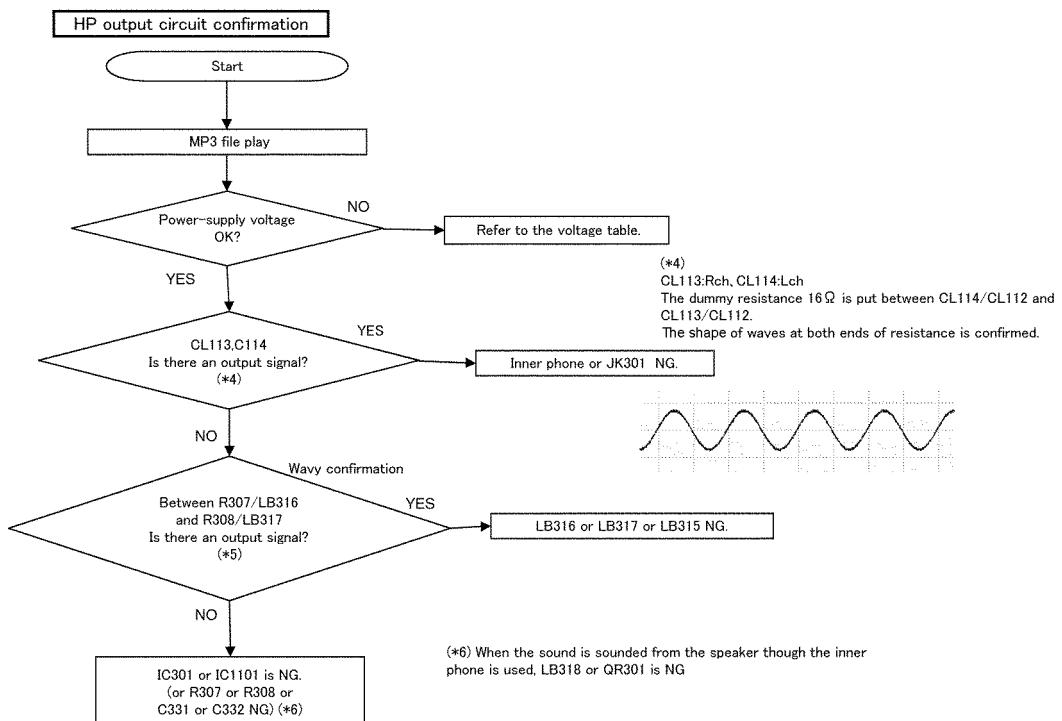

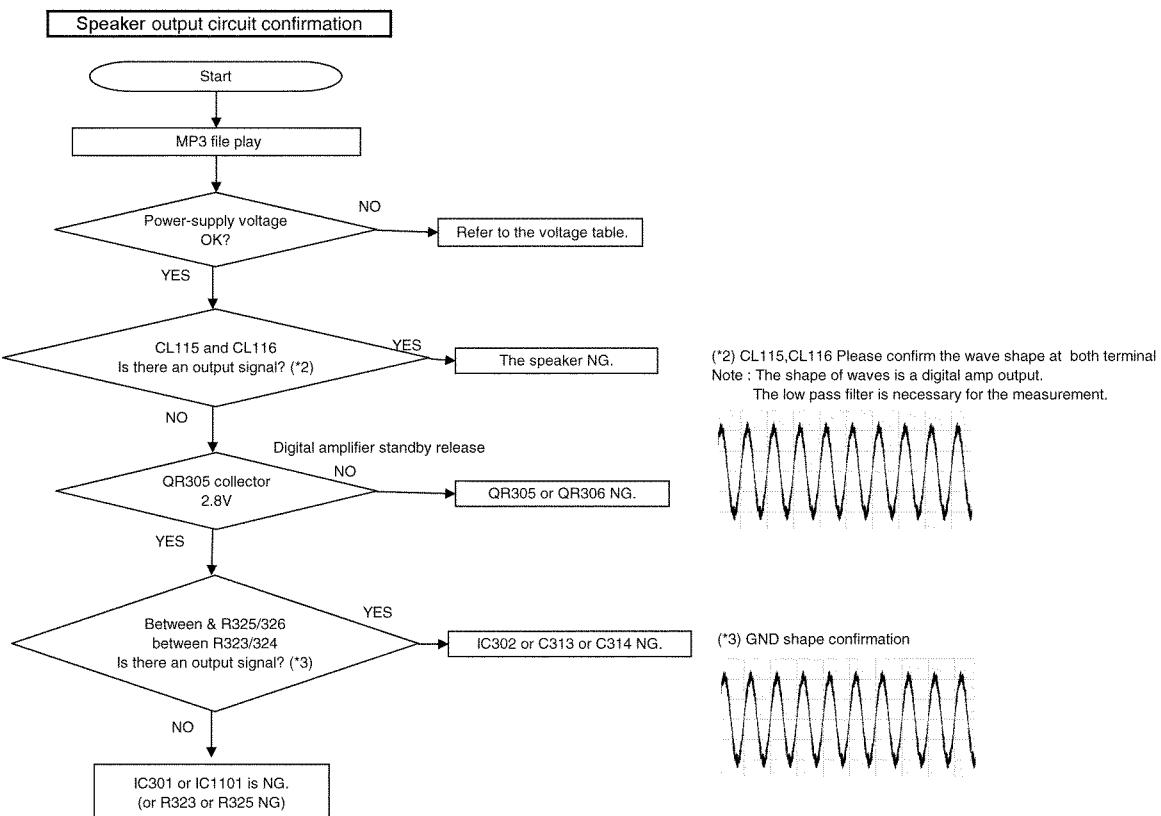

# 7 Troubleshooting Guide

## System start circuit confirmation

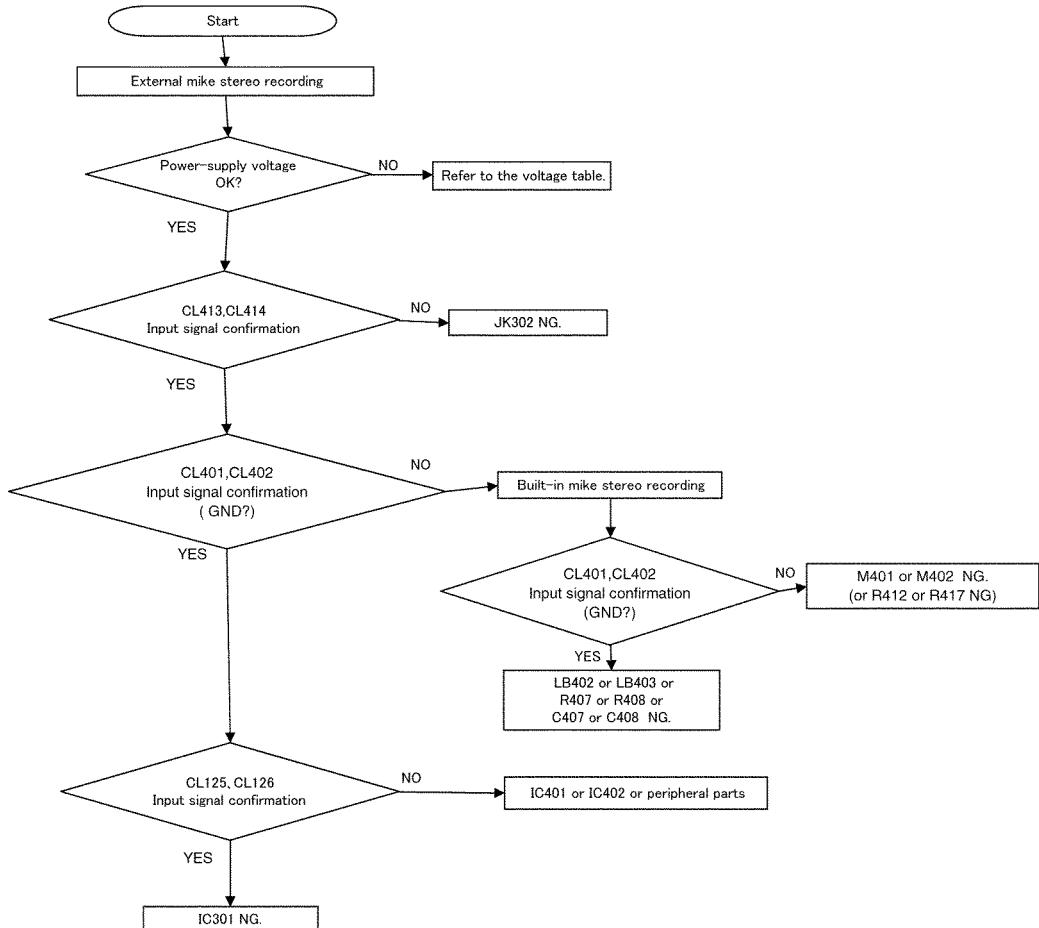

System doesn't start even if the power button pushes.

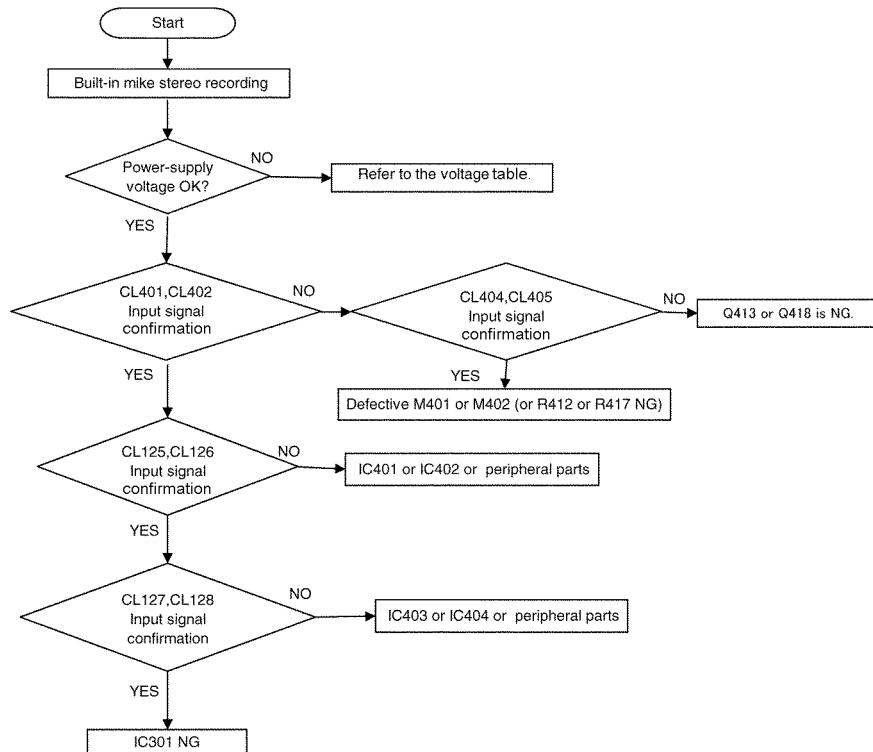

Power-supply table	Measurement point	Power OFF	Record mode	Play mode	USB communicate mode	The main faulty point
Main source of electrical power	CL28	2.8V	2.8V	2.8V	3.2V	IC504
USB power supply	CL26	0V	0V	0V	3.2V	IC503 / IC502
Microcomputer power supply 1	C531	0V	1.2V	1.2V	1.5V	IC508 / IC509 / D503 / D503 / QR522 / QR526 / Q524
Microcomputer power supply 2	CL11	0V	2.8V	2.8V	3.2V	Q520 / QR522 / QR526
Power supply for recording	C473	0V	2.5V	0V	0V	IC405
Zoom stereo power supply	QR470 (collector)	0V	2.5V(At the zoom stereo)	0V	0V	QR470
Stereo power supply	QR471 (collector)	0V	2.5V(At the stereo)	0V	0V	QR471
Speaker amplifier power supply	C312	0V	2.8V - 2.4V	2.8V - 2.4V	3.2V - 2.8V	D301
Flash memory power supply	C701	0V	2.8V	2.8V	3.2V	LB701

**External mic recording circuit confirmation**

**Built-in MIC recording circuit confirmation**

# 8 Disassembly and Assembly Instructions

## Caution

### "ATTENTION SERVICER"

Be careful when disassembling and servicing.

Some chassis components may have sharp edges.

## Special Note:

1. This section describes the disassembly procedures for all the major printed circuit boards and main components.
  2. Before the disassembly process was carried out, do take special note that all Safety Precautions are carried out.
  3. For assembly after operation checks or replacement, reverse the respective procedures.  
Special reassembly procedures are described only when required.
  4. Do take note of the locators on each printed circuit board during reassembling procedures.  
Special reassembly procedures are described only when required.
  5. Select items from the following index when checks or replacement are required.
- Disassembly of MIC Ornament and LED Tip
  - Disassembly of Rear Cabinet Assembly
  - Disassembly of Stand and Battery Cover
  - Replacement of Side Ornament, Mode Knob and Hold Knob
  - Replacement of Main P.C.B.
  - Disassembly of LCD P.C.B.
  - Disassembly of Rec Button
  - Disassembly of Up Down Button Unit and Play Button
  - Disassembly of Menu Button
  - Disassembly of Speaker Unit
  - Replacement of Front Ornament
  - Replacement of LCD Holder Unit

## CAUTION NOTE:

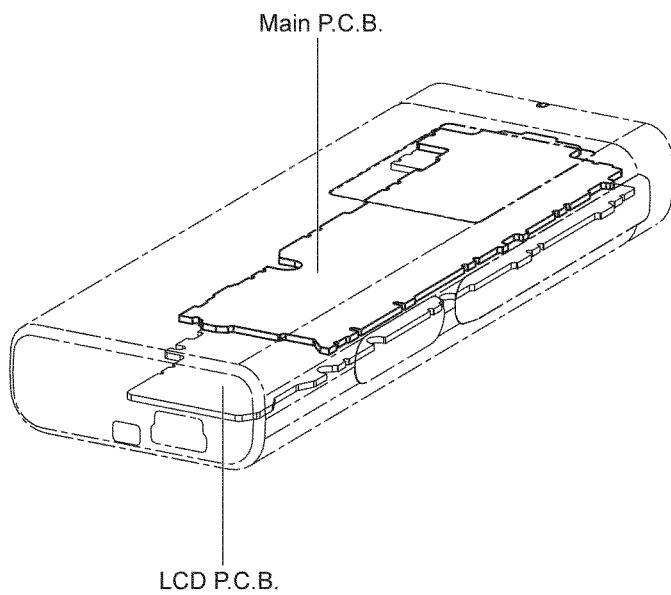

Please use original screw and at correct locations.

Below shown is part no. of different screw types used:

**a** : RHQ0051-K1

**b** : RHE5162ZB

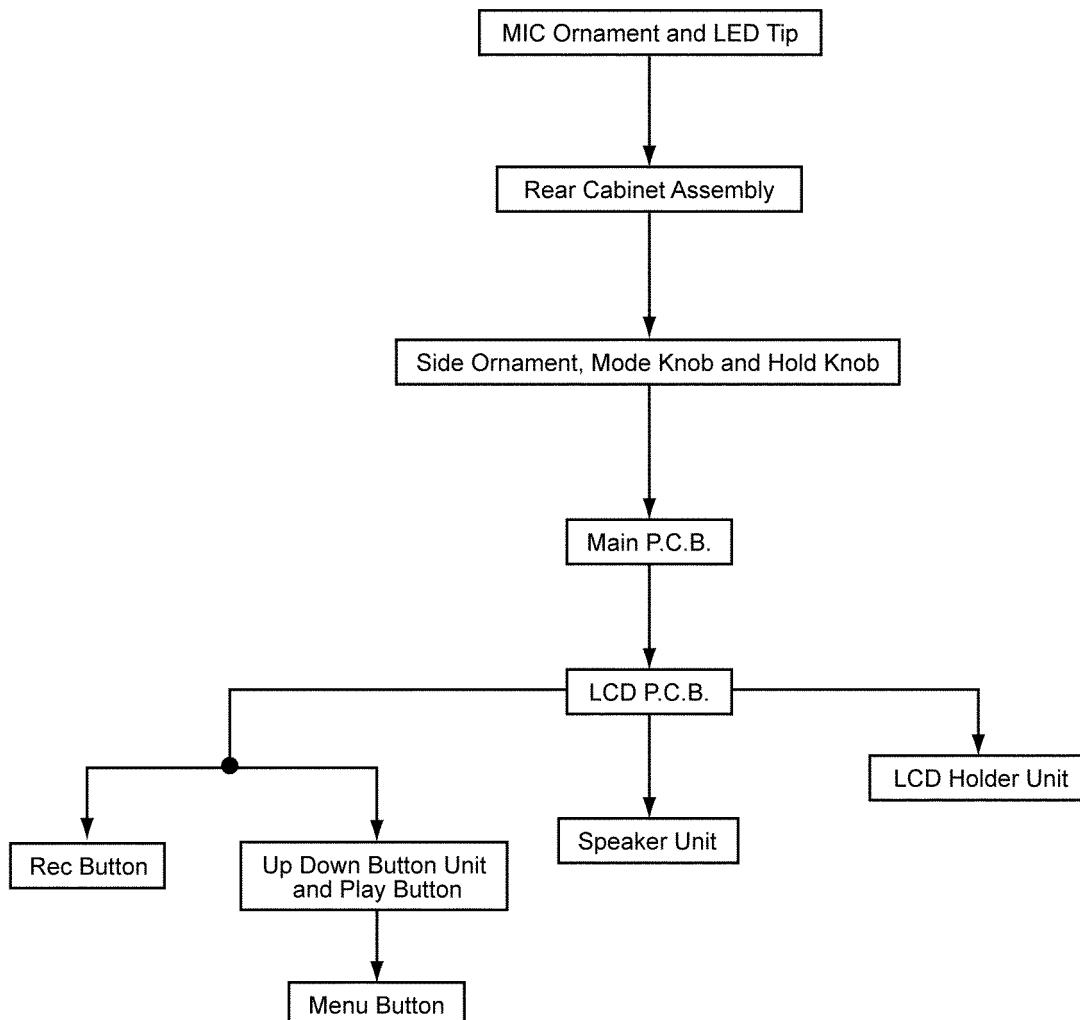

## 8.1. Main Parts Location Diagram

## 8.2. Disassembly flow chart

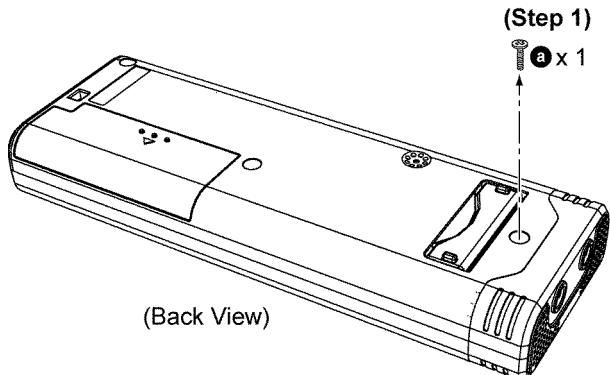

The following chart is the procedure for disassembling the casing and inside parts for internal inspection when carrying out the servicing.

To assemble the unit, reverse the steps shown in the chart below.

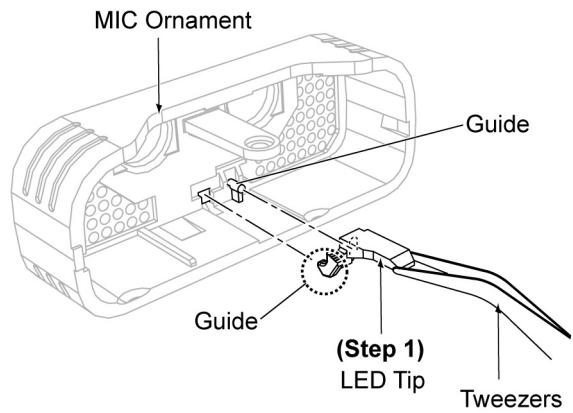

## 8.3. Disassembly of MIC Ornament and LED TIP

### 8.3.1. Disassembly of MIC Ornament

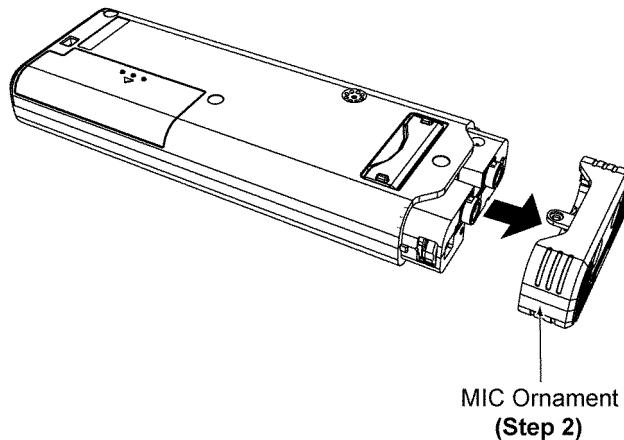

### 8.3.2. Disassembly of LED Tip

**Step 1 :** Use a Tweezers to remove the LED Tip.

**Caution :** Ensure the LED Tip is fixed exactly onto the guides during assembly.

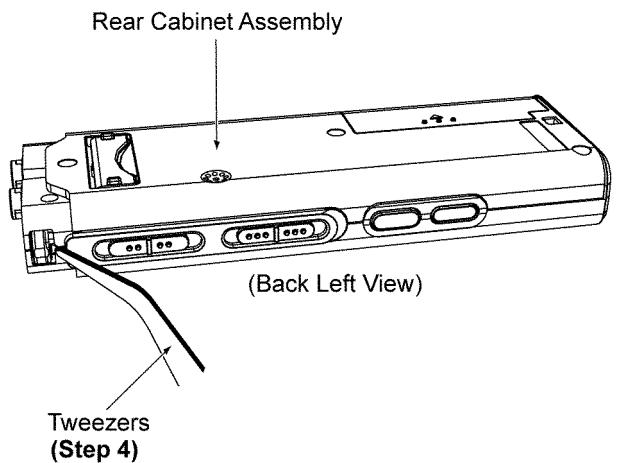

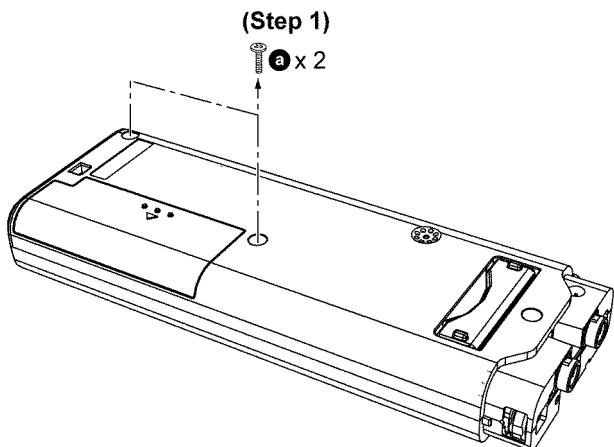

**Step 1 :** Remove 1 screw.

**Step 2 :** Remove MIC Ornament.

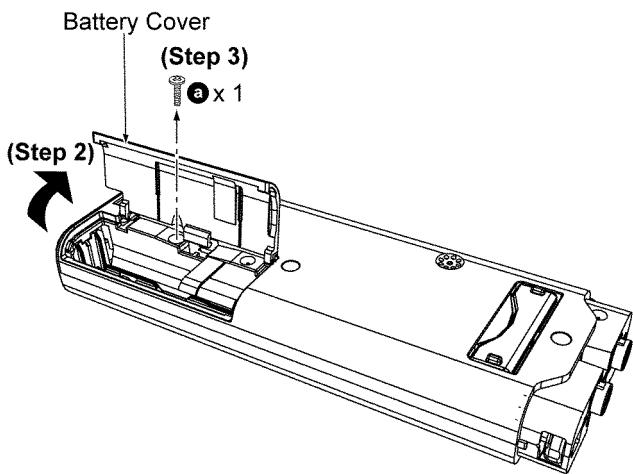

## 8.4. Disassembly of Rear Cabinet Assembly

- Follow the (Step 1) - (Step 2) of item 8.3.1.

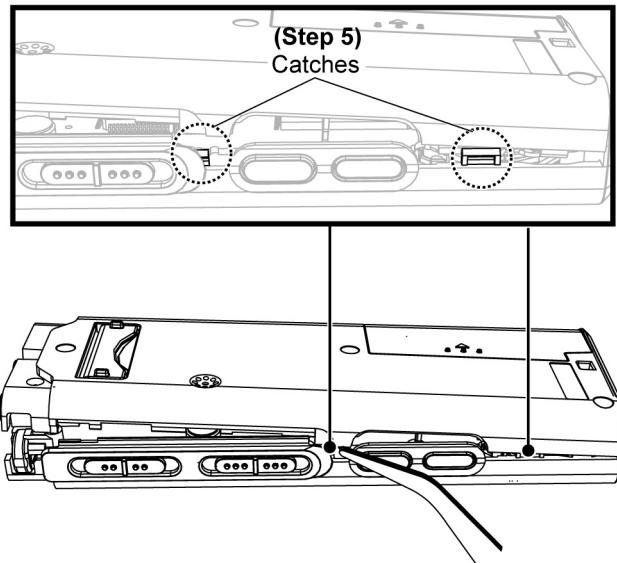

**Step 4 :** Insert a Tweezers at the upper portion of the Rear Cabinet Assembly to make a gap.

**Step 1 :** Remove 2 screws.

(Step 3)

a x 1

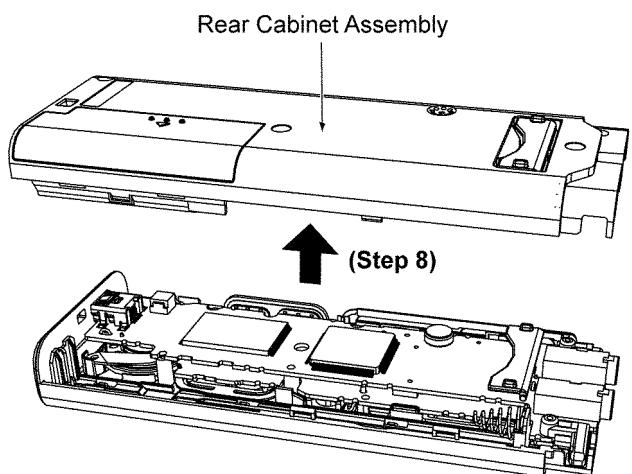

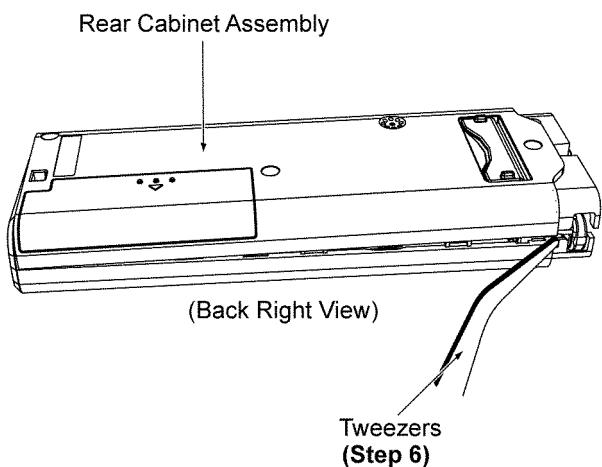

**Step 2 :** Flip open the Battery Cover.

**Step 3 :** Remove 1 screw.

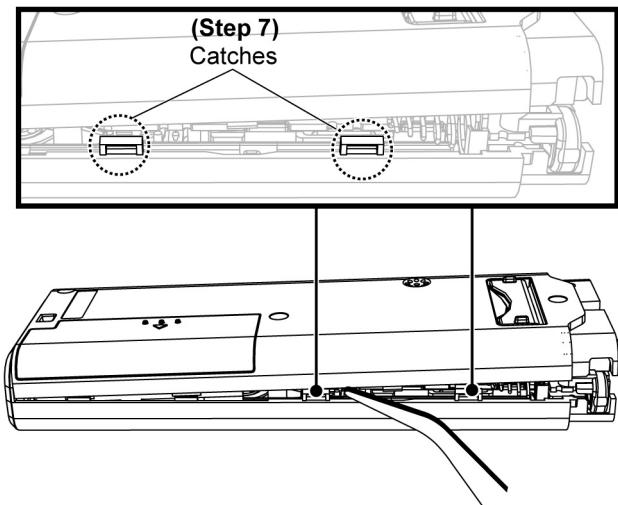

**Step 5 :** Gently push up the Rear Cabinet Assemby to release the 2 catches, one at a time.

**Caution :** Do not apply strong force in releasing the catches to avoid damage of the catches.

**Step 6 :** Insert a Tweezers at the upper portion of the Rear Cabinet Assembly to make a gap.

**Step 8 :** Remove the Rear Cabinet Assembly.

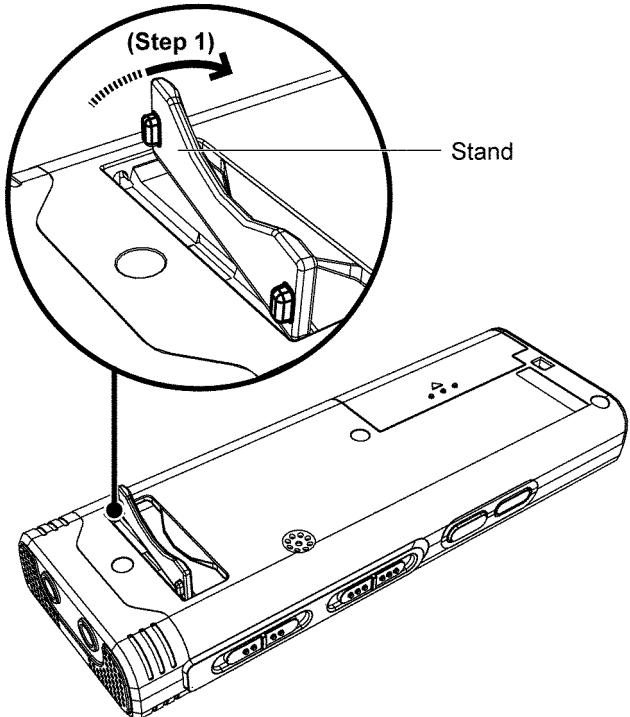

**Step 7 :** Gently push up the Rear Cabinet Assembly to release the 2 catches, one at a time.

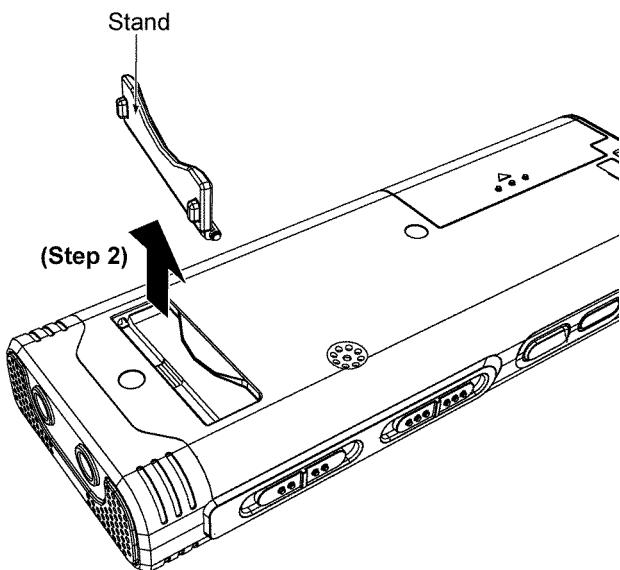

**Caution :** Do not apply strong force in releasing the catches to avoid damage of the catches.

## 8.5. Disassembly of Stand and Battery Cover

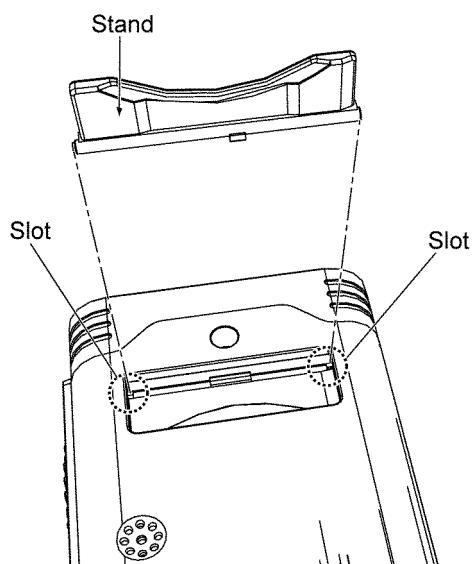

### 8.5.1. Disassembly of Stand

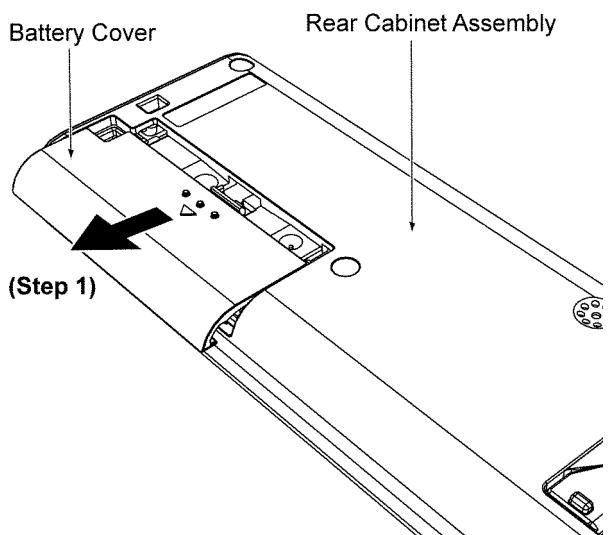

**Step 1 :** Push out the Stand.

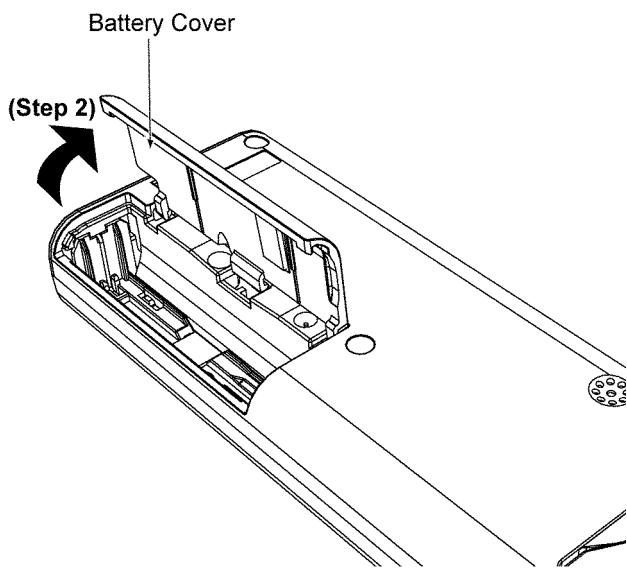

**Step 2 :** Remove the Stand.

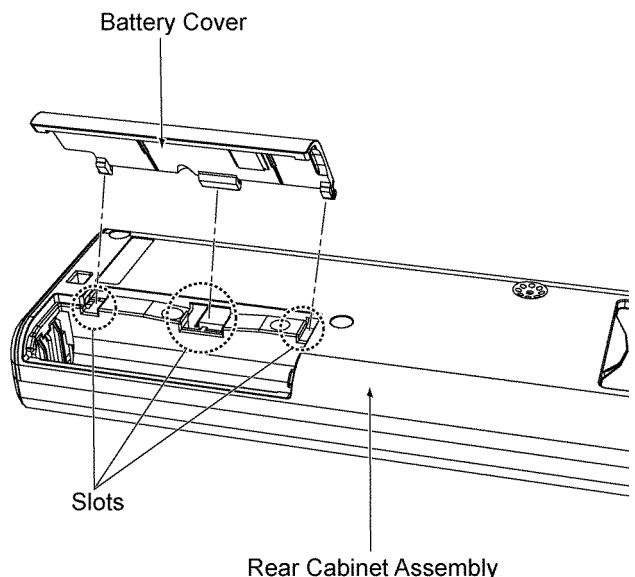

### 8.5.2. Disassembly of Battery Cover

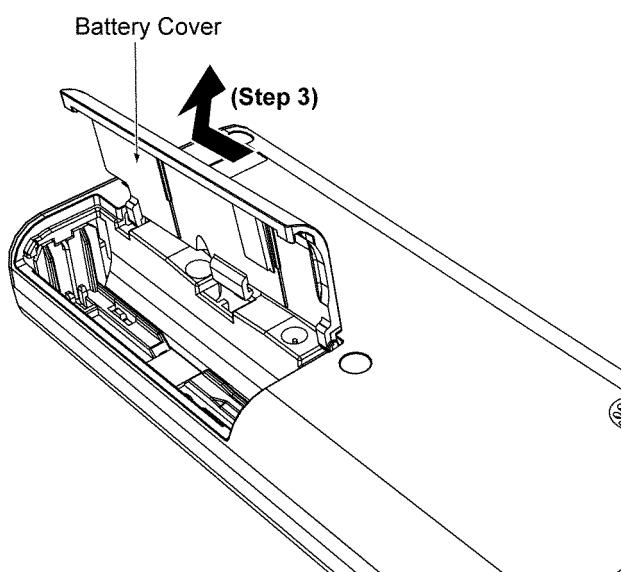

**Step 1 :** Push open the Battery Cover.

**Step 2 :** Flip open the Battery Cover.

**Caution : Ensure the Battery Cover is fixed exactly into the slots during assembly.**

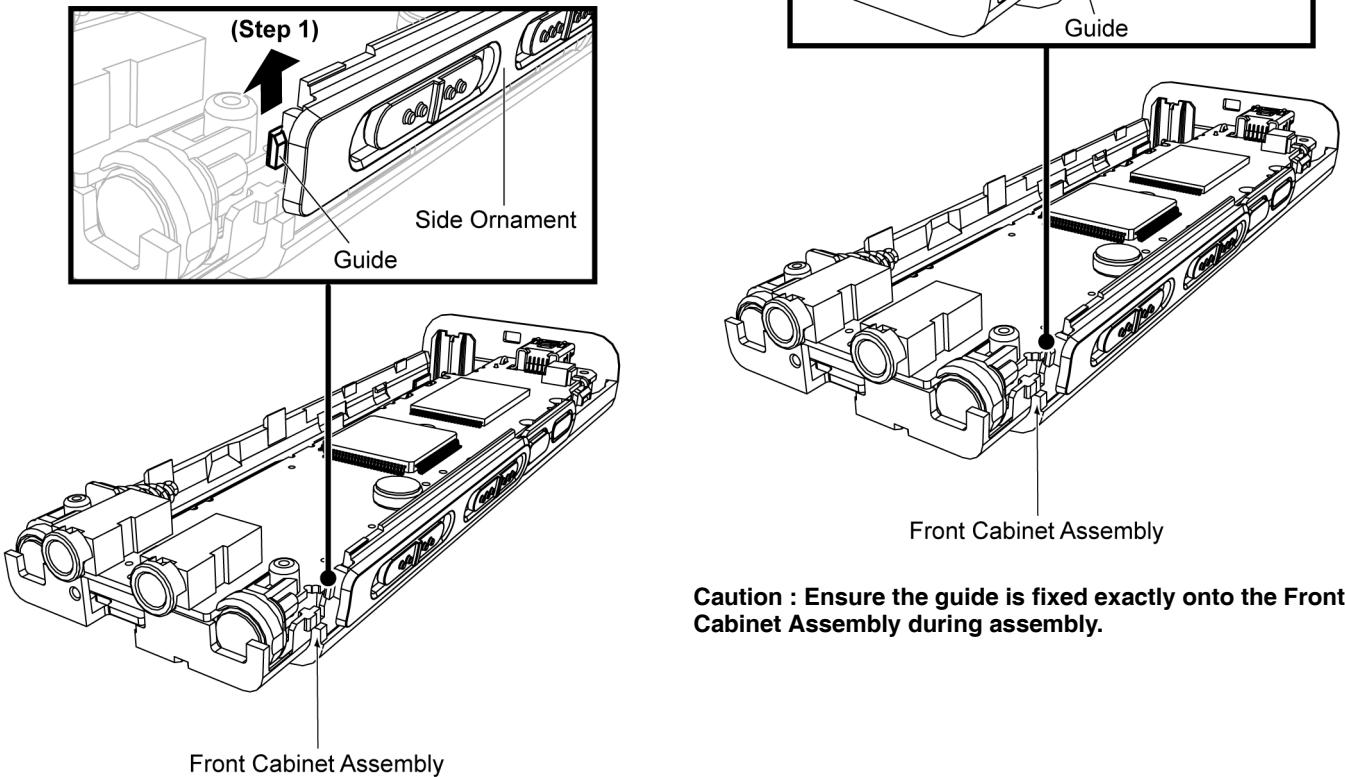

**Step 3 :** Slightly push out the Battery Cover and remove the Battery Cover.

## 8.6. Replacement of Side Ornament, Mode Knob and Hold Knob

- Follow the (Step 1) - (Step 2) of item 8.3.1.
- Follow the (Step 1) - (Step 8) of item 8.4.

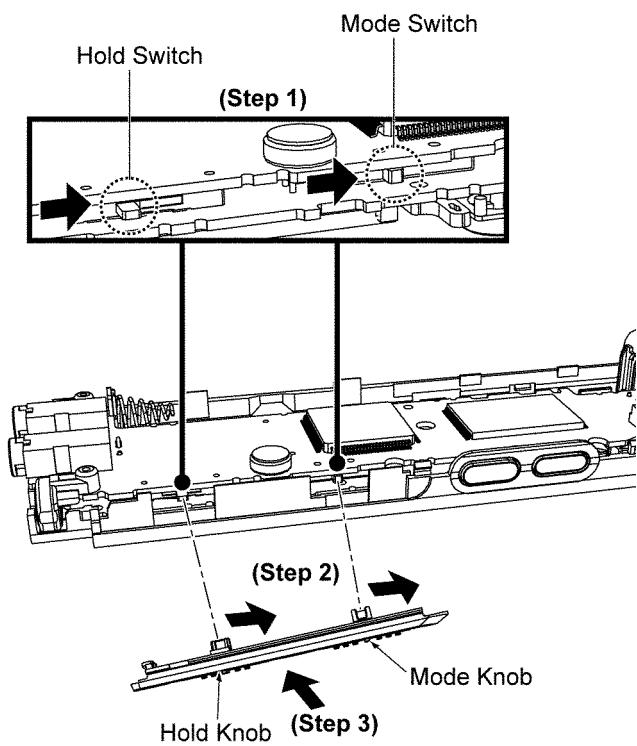

### 8.6.1. Disassembly of Side Ornament

**Step 1 :** Slide out the Side Ornament.

**Caution : Ensure the guide is fixed exactly onto the Front Cabinet Assembly during assembly.**

## 8.6.2. Assembly of Side Ornament

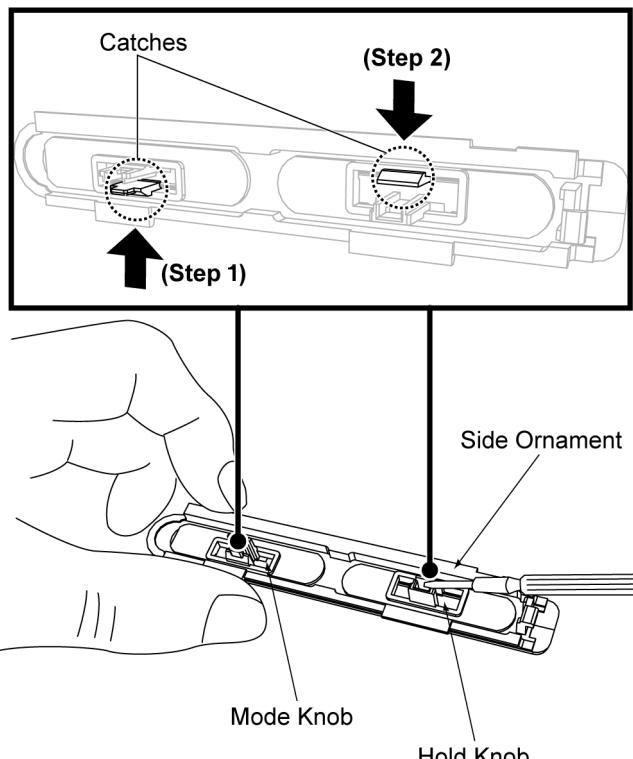

**Step 1 :** Push Hold switch and Mode switch to the extreme right.

**Step 2 :** Push Hold Knob and Mode Knob to the extreme right.

**Step 3 :** Slide in the Side Ornament.

**Caution :** Ensure Hold Switch and Mode Switch are properly seated in the Hold Knob and Mode Knob.

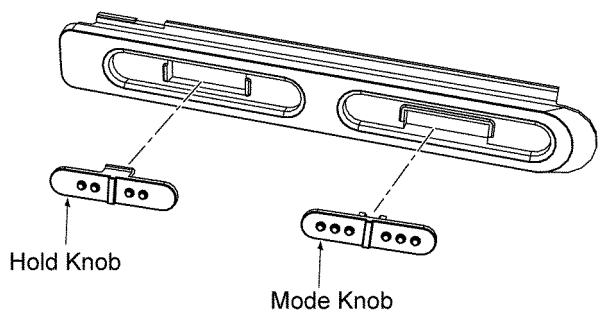

## 8.6.3. Disassembly of Mode Knob and Hold Knob

**Step 1 :** Release the catch to remove the Mode Knob.

**Step 2 :** Release the catch to remove the Hold Knob.

**Caution 1 :** Do not apply strong force in releasing the catch to avoid damage of the catch.

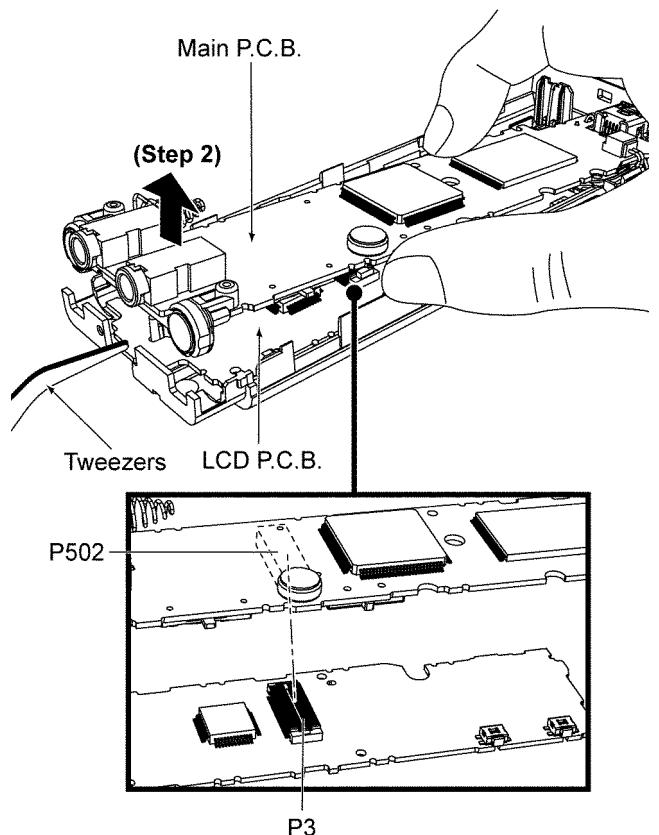

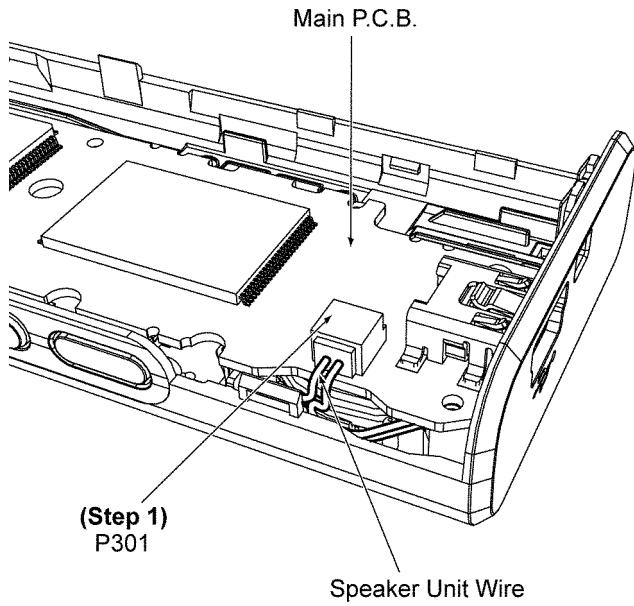

**Caution 2 :** Ensure that Mode Knob and Hold Knob are fixed at the correct location during assembly.

## 8.7. Replacement of Main P.C.B.

- Follow the (Step 1) - (Step 2) of item 8.3.1.
- Follow the (Step 1) - (Step 8) of item 8.4.
- Follow the (Step 1) of item 8.6.1.

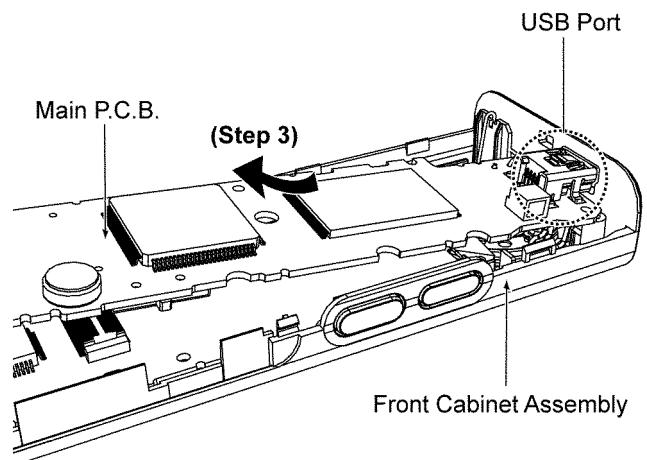

### 8.7.1. Disassembly of Main P.C.B.

**Step 1 :** Detach Speaker Unit Wire at connector P301 on Main P.C.B.

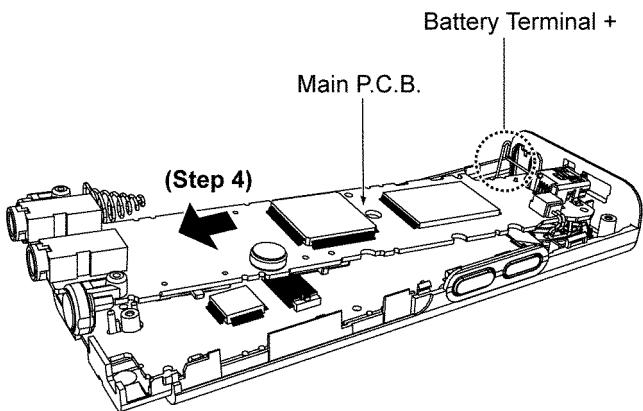

**Step 2 :** Use a Tweezers to hold down the LCD P.C.B. and lift up the Main P.C.B.

**Caution :** Main P.C.B. connector P502 and LCD P.C.B. connector P3 will be disconnected.

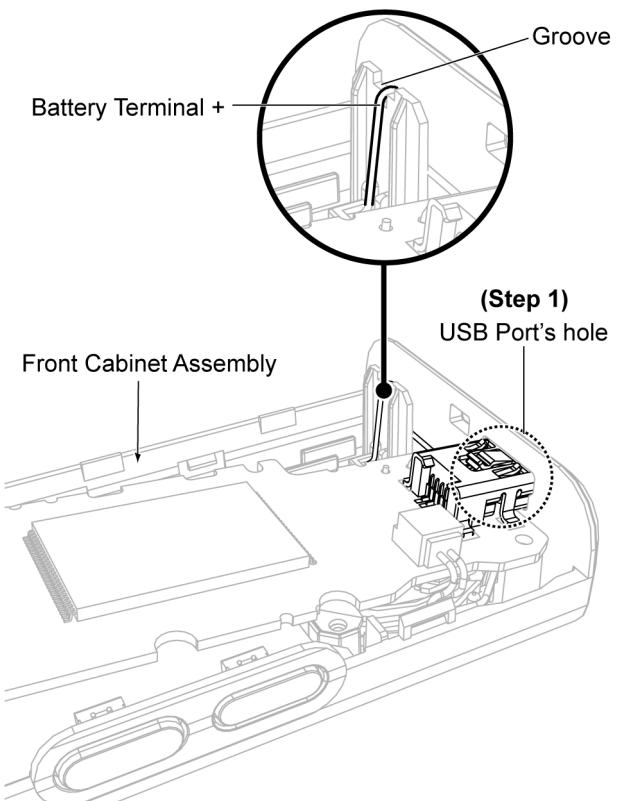

**Step 3 :** Slide out the Main P.C.B. slightly to release the USB Port from the Front Cabinet Assembly.

### 8.7.2. Assembly of Main P.C.B.

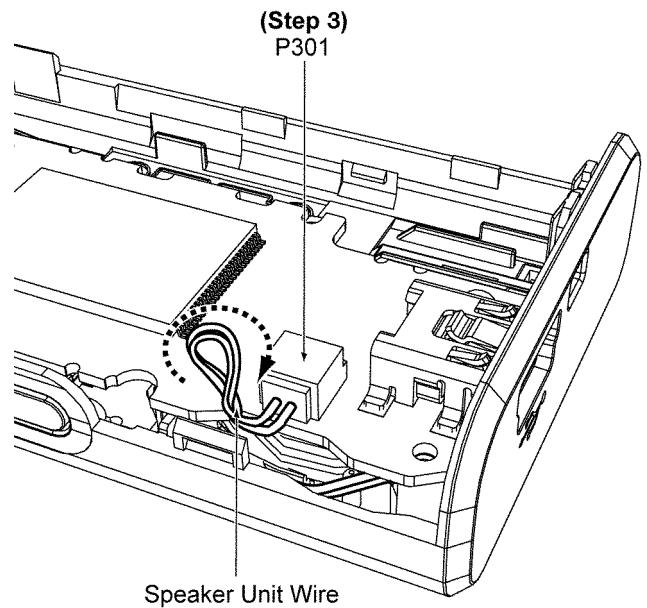

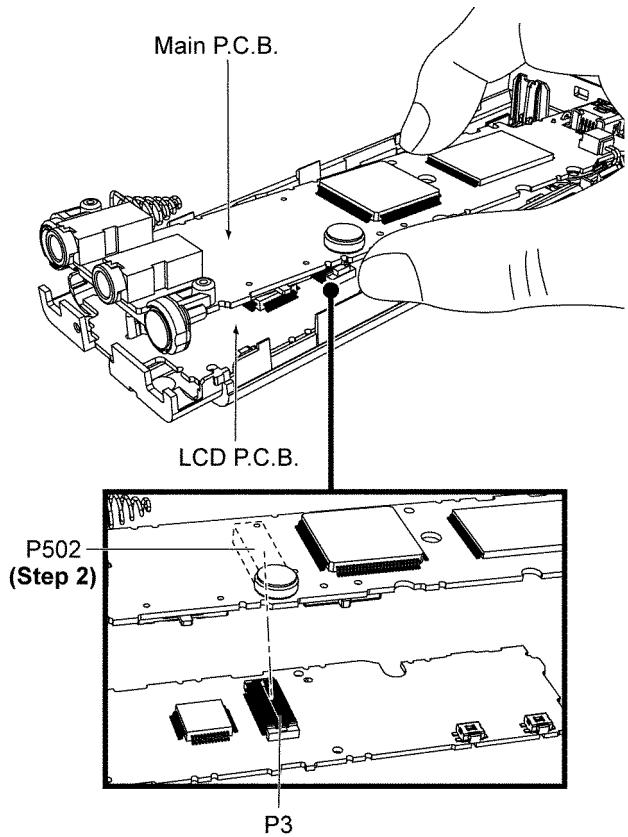

**Step 4 :** Remove the Main P.C.B.

**Caution : Ensure the Battery Terminal + is release from the groove when removing the Main P.C.B.**

**Step 1 :** Insert the USB Port into the hole of Front Cabinet Assembly.

**Caution : Ensure the Battery Terminal + is slot into the groove.**

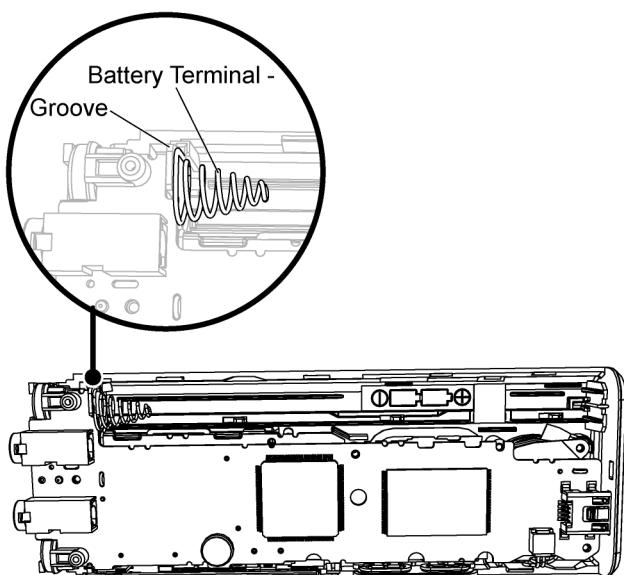

**Step 3 :** Connect the Speaker Unit Wire to connector P301 on Main P.C.B.

**Caution :** Twist the Speaker Unit Wire one round in clockwise direction, press it down to the left side as shown.

**Step 2 :** Connect Main P.C.B. connector P502 to LCD P.C.B. connector P3.

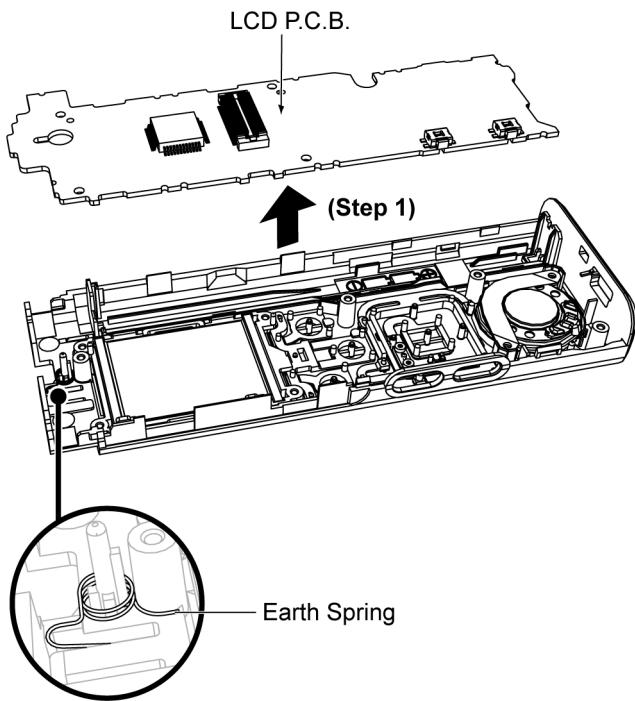

**Caution 1 :** Ensure the connectors are fully caught. A "Click" sound will be heard.

**Caution 2 :** Ensure the Battery Terminal - is properly seated into the groove.

## 8.8. Disassembly of LCD P.C.B.

- Follow the (Step 1) - (Step 2) of item 8.3.1.
- Follow the (Step 1) - (Step 8) of item 8.4.
- Follow the (Step 1) of item 8.6.1.
- Follow the (Step 1) - (Step 4) of item 8.7.1.

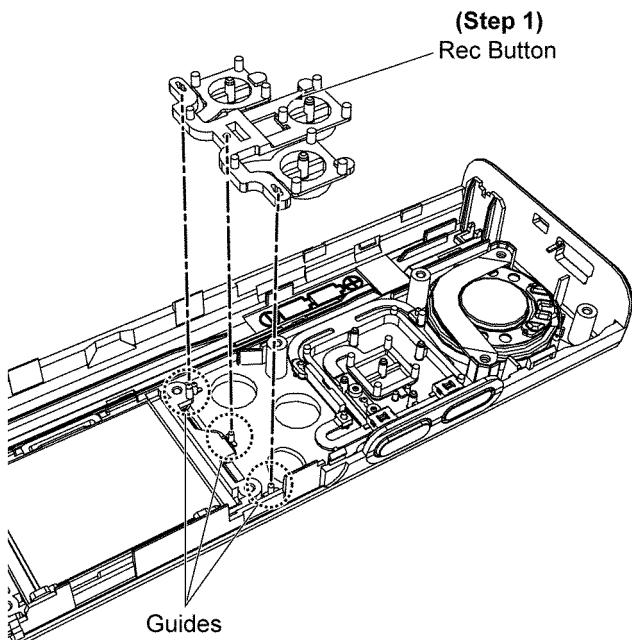

**Step 1 :** Remove the LCD P.C.B.

**Caution :** Keep the Earth Spring in safe place if it falls off.  
Avoid denting it. Place it back during assembly.

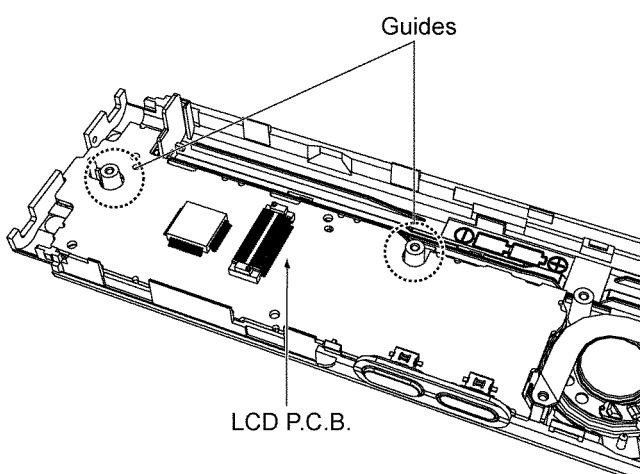

## 8.9. Disassembly of Rec Button

- Follow the (Step 1) - (Step 2) of item 8.3.1.
- Follow the (Step 1) - (Step 8) of item 8.4.
- Follow the (Step 1) of item 8.6.1.
- Follow the (Step 1) - (Step 4) of item 8.7.1.
- Follow the (Step 1) of item 8.8.

**Step 1 :** Remove the Rec Button.

**Caution :** Ensure the Rec Button is fixed exactly onto the guides during assembly.

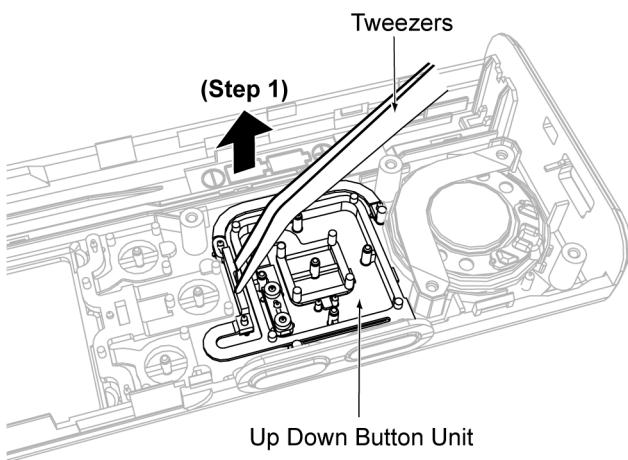

**Caution :** Ensure the LCD P.C.B. is seated properly

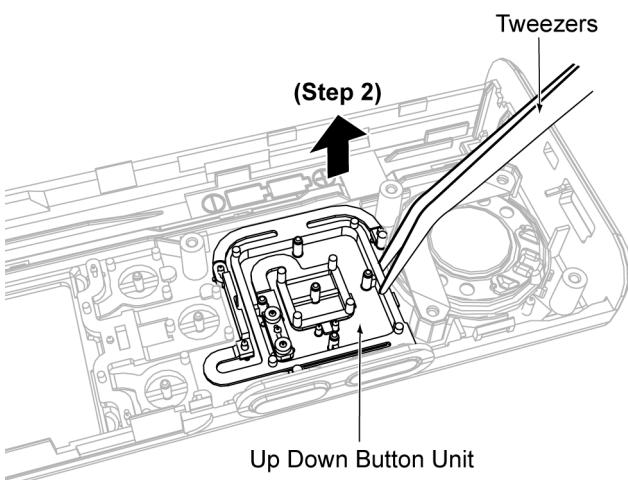

## 8.10. Disassembly of Up Down Button Unit and Play Button

- Follow the (Step 1) - (Step 2) of item 8.3.1.
- Follow the (Step 1) - (Step 8) of item 8.4.
- Follow the (Step 1) of item 8.6.1.
- Follow the (Step 1) - (Step 4) of item 8.7.1.
- Follow the (Step 1) of item 8.8.

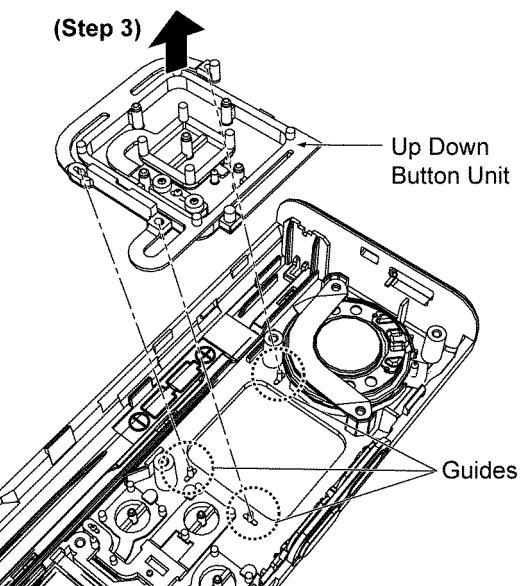

### 8.10.1. Disassembly of Up Down Button Unit

**Step 1 :** Use Tweezers gently pull one side of the Up Down Button Unit as shown.

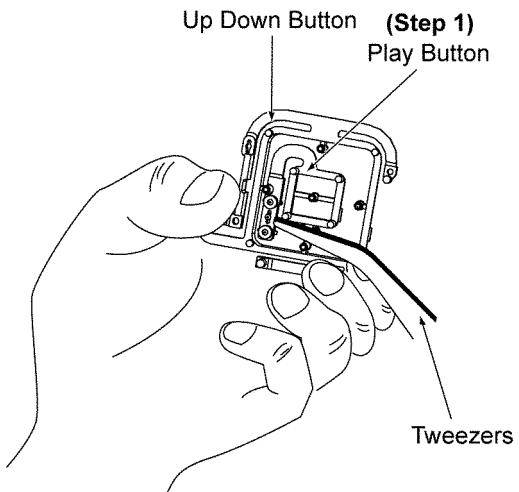

**Step 2 :** Use Tweezers gently pull the other side of the Up Down Button Unit as shown.

**Step 3 : Remove the Up Down Button Unit.**

**Caution : Ensure the Up Down Button Unit is fixed exactly onto the guides during assembly.**

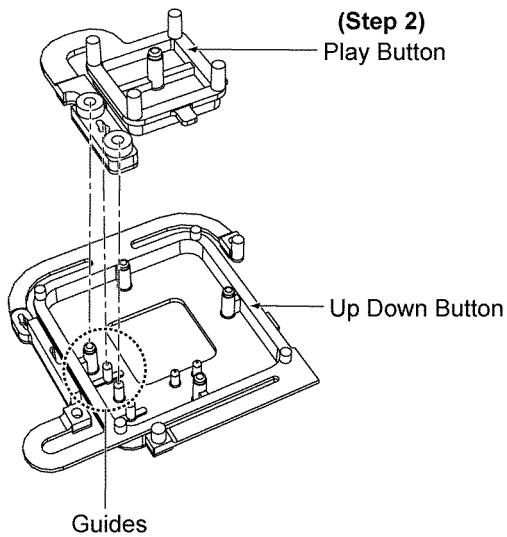

### 8.10.2. Disassembly of Play Button

**Step 1 : Use a Tweezers to lift up the Play Button.**

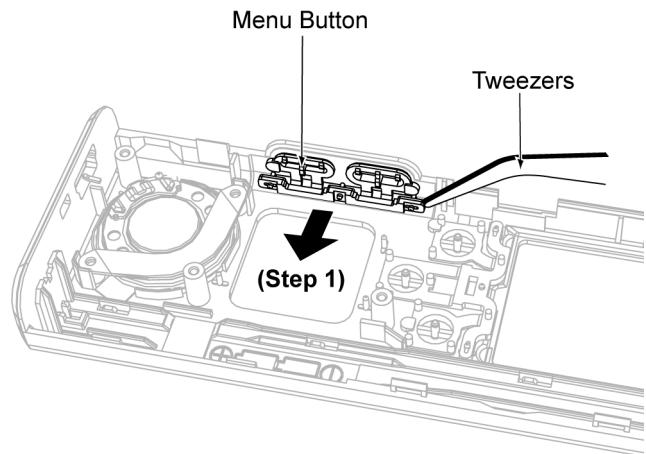

## 8.11. Disassembly of Menu Button

- Follow the (Step 1) - (Step 2) of item 8.3.1.
- Follow the (Step 1) - (Step 8) of item 8.4.
- Follow the (Step 1) of item 8.6.1.
- Follow the (Step 1) - (Step 4) of item 8.7.1.
- Follow the (Step 1) of item 8.8.
- Follow the (Step 1) - (Step 3) of item 8.10.1.

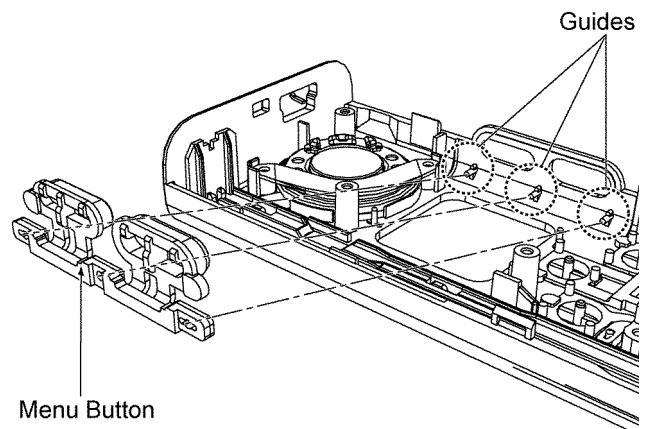

**Step 2 : Remove the Play Button.**

**Caution : Ensure the Play Button is fixed exactly onto the guides during assembly.**

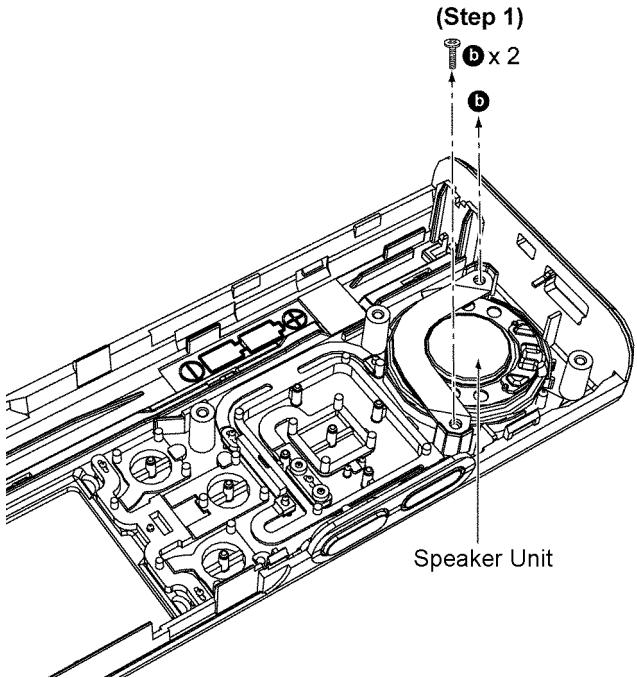

**Step 1 : Use a Tweezers to remove the Menu Button.**

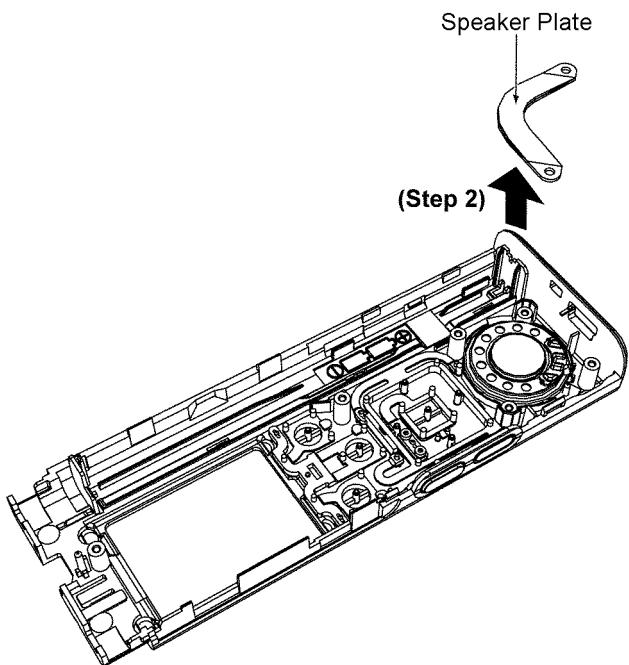

**Caution : Ensure the Menu Button is fixed exactly onto the guides during assembly.**

## 8.12. Disassembly of Speaker Unit

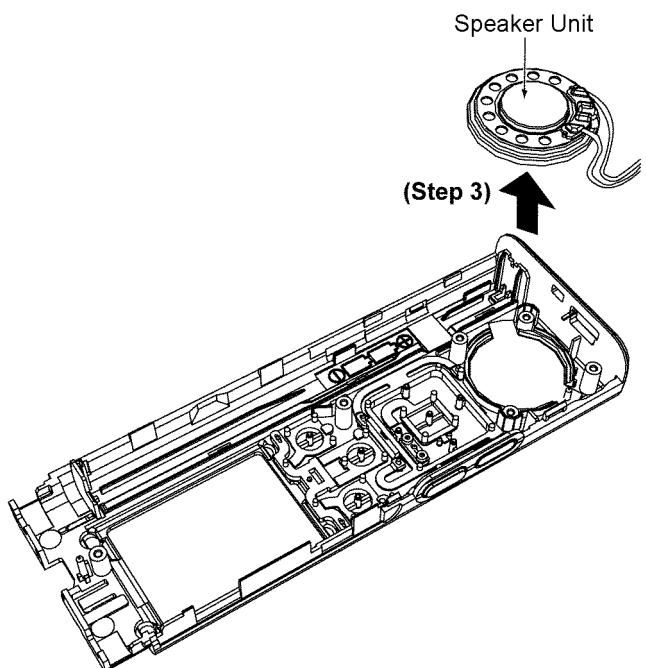

- Follow the (Step 1) - (Step 2) of item 8.4.
- Follow the (Step 1) - (Step 8) of item 8.5.1.
- Follow the (Step 1) - (Step 2) of item 8.6.1.
- Follow the (Step 1) - (Step 5) of item 8.7.1.
- Follow the (Step 1) of item 8.8.

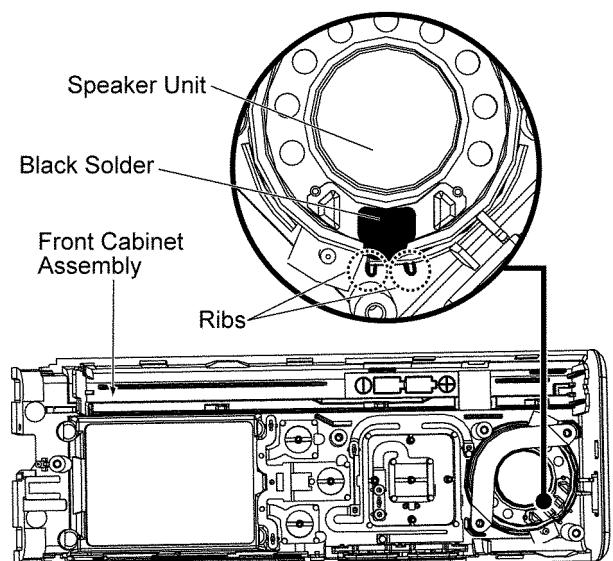

Step 1 : Remove 2 screws.

Step 2 : Remove the Speaker Plate.

Step 3 : Remove the Speaker Unit.

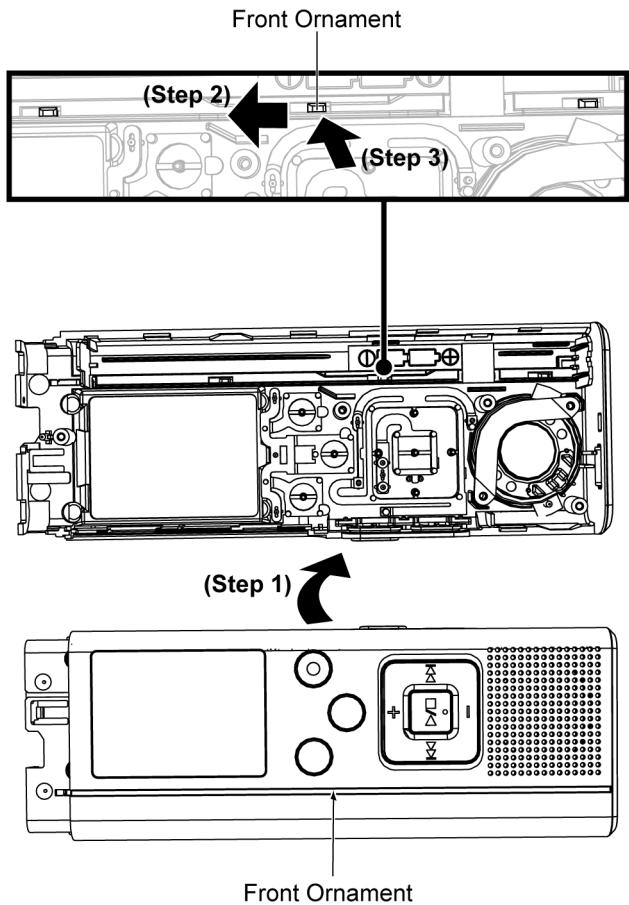

Caution : Ensure the Black Solder of the Speaker Unit is positioned in between the 2 Ribs.

## 8.13. Replacement of Front Ornament

- Follow the (Step 1) - (Step 2) of item 8.3.1.
- Follow the (Step 1) - (Step 8) of item 8.4.
- Follow the (Step 1) of item 8.6.1.
- Follow the (Step 1) - (Step 4) of item 8.7.1.
- Follow the (Step 1) of item 8.8.

### 8.13.1. Disassembly of Front Ornament

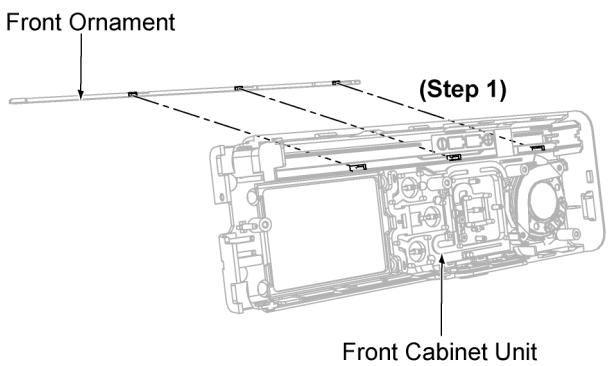

**Step 1** : Flip over the Front Cabinet Assembly.

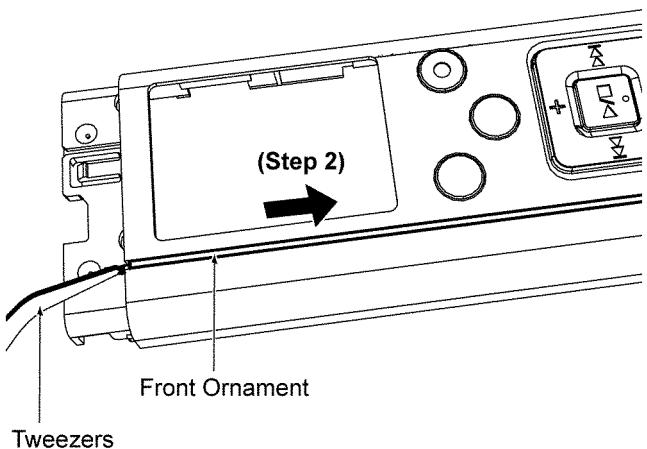

**Step 2** : Push the Front Ornament upwards.

**Step 3** : Push out the Front Ornament to remove it.

### 8.13.2. Assembly of Front Ornament

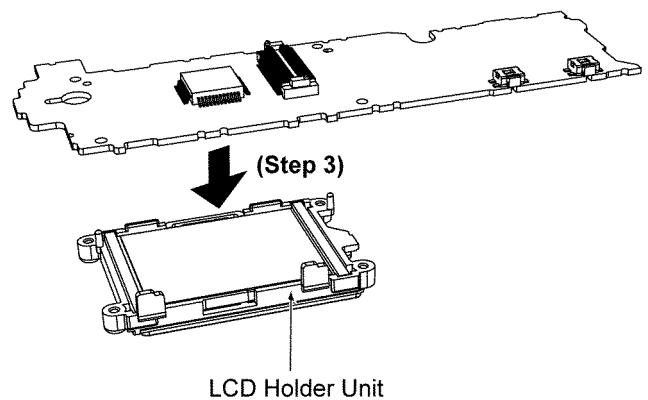

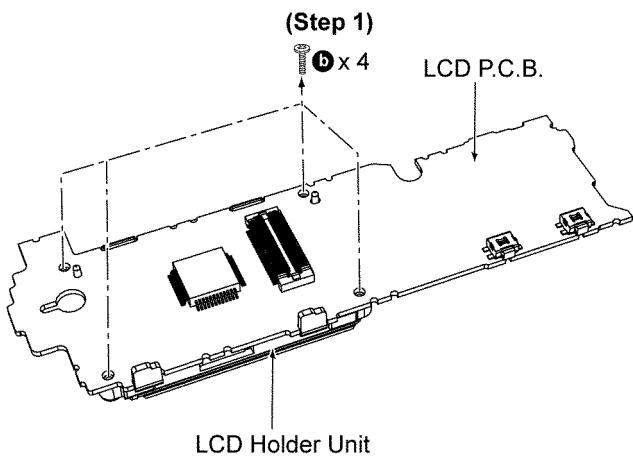

**Step 1** : Fix the Front Ornament.

**Step 2** : Use a Tweezers push downwards to fix the Front Ornament.

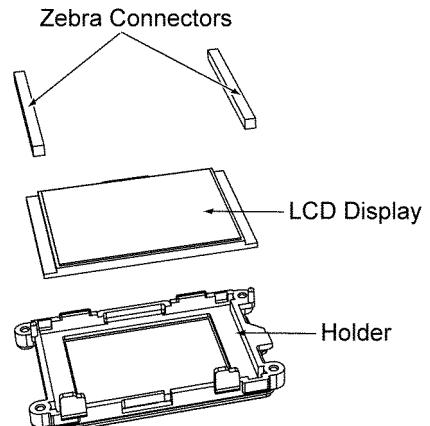

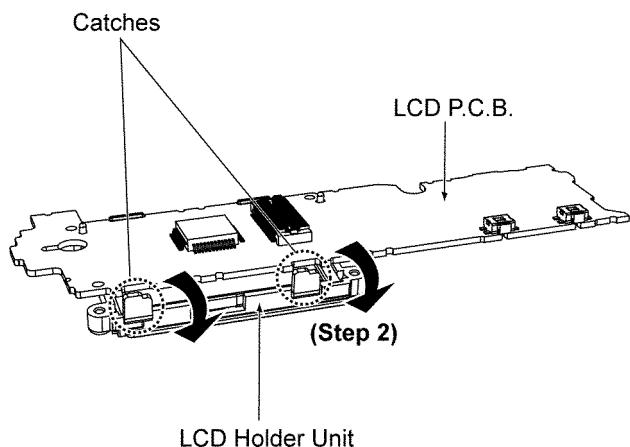

## 8.14. Disassembly of LCD Holder Unit

- Follow the (Step 1) - (Step 2) of item 8.3.1.
- Follow the (Step 1) - (Step 8) of item 8.4.
- Follow the (Step 1) of item 8.6.1
- Follow the (Step 1) - (Step 4) of item 8.7.1.
- Follow the (Step 1) of item 8.8.

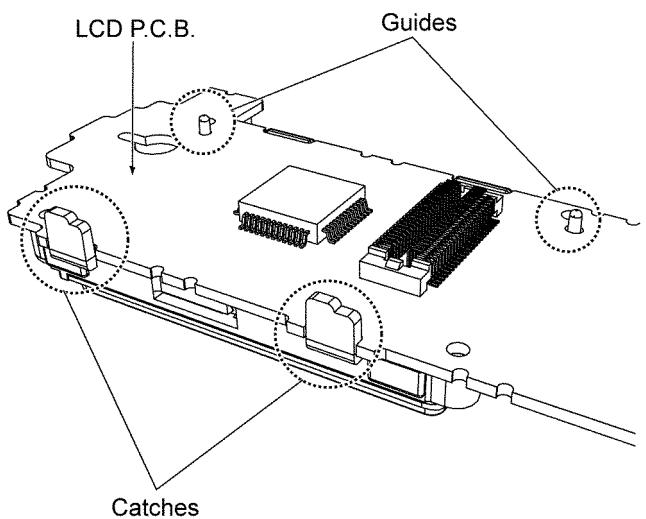

**Step 3 : Remove the LCD Holder Unit.**

**Step 1 : Remove 4 screws.**

**Caution 1 : LCD Display and Zebra Connectors can easily fall off.**

**Step 2 : Release 2 catches.**

**Caution 2 : Ensure the LCD Holder Unit guides and catches are fixed exactly onto the LCD P.C.B. during assembly.**

# 9 Service Position

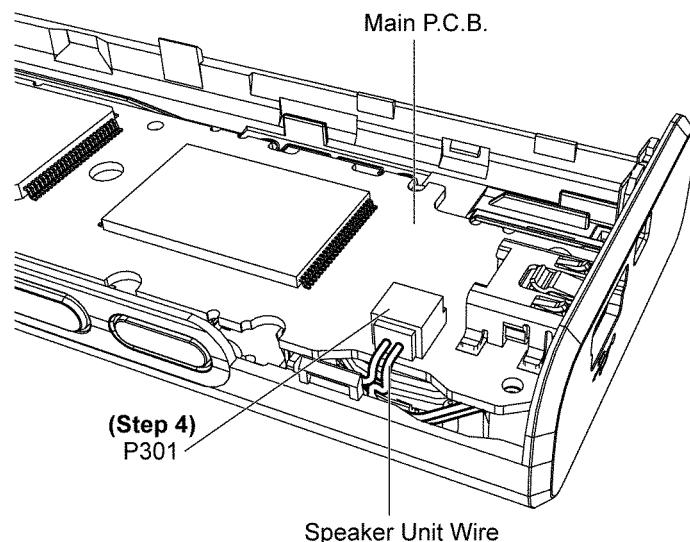

Note: For description of the disassembly procedures, see the Section 8.

## 9.1. Checking and Repairing of Main P.C.B. and LCD P.C.B.

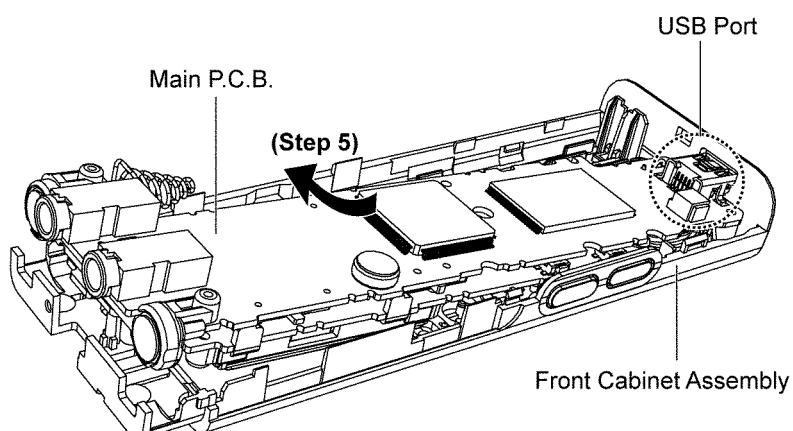

**Step 1** : Remove the MIC Ornament

**Step 2** : Remove the Rear Cabinet Assembly

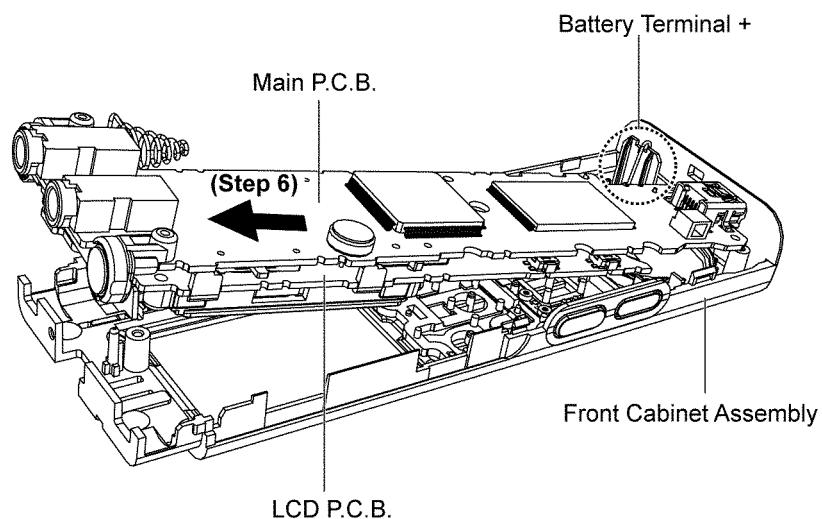

**Step 3** : Remove the Side Ornament

**Step 4** : Detach Speaker Unit Wire at connector P301 on Main P.C.B.

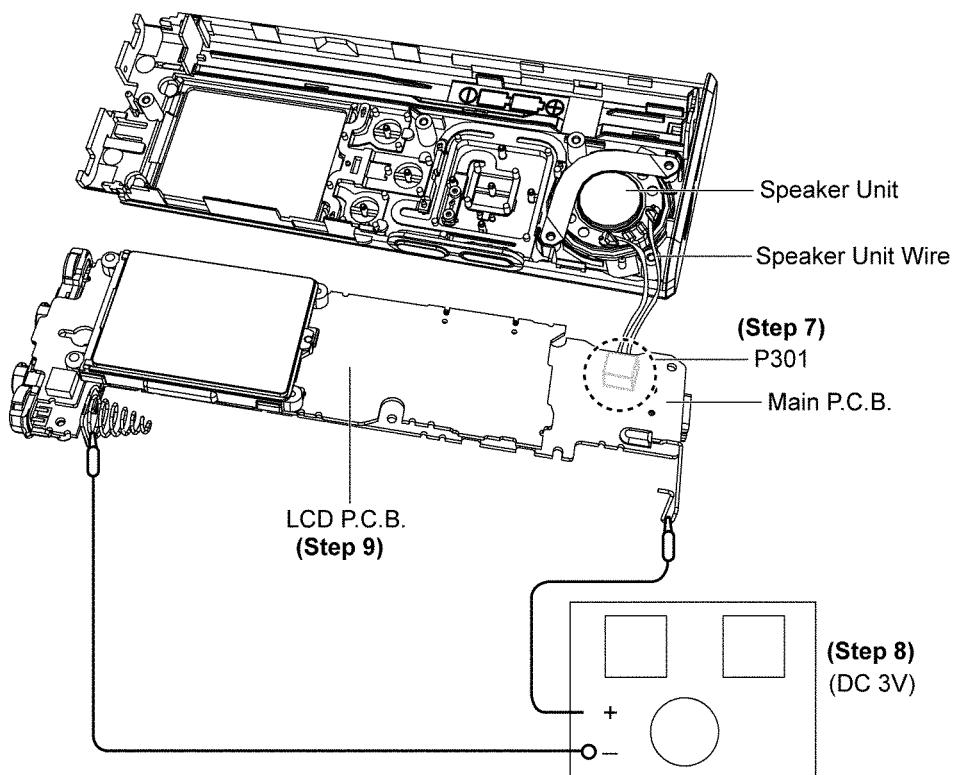

**Step 5** : Slide out the Main P.C.B. and LCD P.C.B. slightly to release the USB Port from the Front Cabinet Assembly.

**Step 6 :** Remove the Main P.C.B. and LCD P.C.B.

**Caution :** Ensure the Battery Terminal + is release from the groove when removing the Main P.C.B.

**Step 7 :** Connect the Speaker Unit Wire to connector P301 on Main P.C.B.

**Step 8 :** Connect the DC Power supply device to the battery terminal for the power supply.

**Step 9 :** Checking and repairing LCD P.C.B. and Main P.C.B.

**Note :** Refer to Troubleshooting Guide of item 7 for composition check.

# 10 Voltage Measurement & Waveform Chart

## Note:

- Indicated voltage values are the standard values for the unit measured by the DC electronic circuit tester (high-impedance) with the chassis taken as standard.
- Therefore, there may exist some errors in the voltage values, depending on the internal impedance of the DC circuit tester.
- Circuit voltage and waveform described herein shall be regarded as reference information when probing defect point because it may differ from actual measuring value due to difference of Measuring instrument and its measuring condition and product itself.

S620:	Hold/Power On (OPR/HOLD) switch
S621:	ZOOM/WIDE/MANUAL switch

- “ \* ” REF IS FOR INDICATION ONLY.

- **Importance safety notice :**

Components identified by (△) mark have special characteristics important for safety.

Furthermore, special parts which have purposes of fire-retardant (resistors), high-quality sound (capacitors), low-noise (resistors), etc. are used.

When replacing any of components, be sure to use only manufacturer's specified parts shown in the parts list.

- Capacitor values are in microfarad(μF) unless specified otherwise, F=Farad, pF=Pico-Farad

Resistance values are in ohm(Ω), unless specified otherwise, 1K=1,000Ω, 1M=1,000KΩ

- **Voltage and Signal lines:**

 : +B signal line

 : MIC signal line

 : Audio Output signal line

 : USB signal line

### Important Safety Notice

*Components identified by △ mark have special characteristics important for safety. When replacing any of these components, use only manufacturer's specified parts.*

#### RTL (Retention Time Limited)

**Note:** The marking (RTL) indicates that the Retention Time is Limited for this item.

After the discontinuation of this assembly in production, the item will continue to be available for a specific period of time. The retention period of availability is dependant on the type of assembly, and in accordance with the laws governing part and product retention. After the end of this period, the assembly will no longer be available.

**Note:**

- When replacing any of these components, be sure to use only manufacturer's specified parts shown in the replacement part list.
- The parenthesized indications on the Remarks column specify the destination & product color (Refer to the cover page for the information).
- Parts without these indications shall be used for all areas.
- This product uses a laser diode. Refer to "Precaution of Laser Diode".
- All parts mentioned are supplied by PAVCSG unless indicated likewise.
- Parts mentioned [SPG] in the Remarks column are supplied by PAVC-CSG.

- Parts without these indications shall be used for all areas.
- This product uses a laser diode. Refer to "Precaution of Laser Diode".
- Capacitor value are in microfarads (uF) unless specified otherwise, P=Pico-farads (pF), F=Farads.
- Resistance values are in ohms, unless specified otherwise, 1K=1000 (OHM).
- All parts mentioned are supplied by PAVCSG unless indicated likewise.
- Parts mentioned [SPG] in the Remarks column are supplied by PAVC-CSG.
