5. Calculated value for reference ( $VBL \times IBL$ )**4.0 OPTICAL SPECIFICATION****4.1 Overview**

The test of Optical specifications shall be measured in a dark room (ambient luminance  $\leq 1$  lux and temperature =  $25 \pm 2$ ) with the equipment of Luminance meter system (Goniometer system and TOPCONE BM-5) and test unit shall be located at an approximate distance 50cm from the LCD surface at a viewing angle of  $\theta$  and F equal to  $\theta$ . We refer to  $\theta=0$  ( $= 3$ ) as the 3 o'clock direction (the "right"),  $\theta=90$  ( $= 12$ ) as the 12 o'clock direction ("upward"),  $\theta=180$  ( $= 9$ ) as the 9 o'clock direction ("left") and

$\theta=270$  ( $= 6$ ) as the 6 o'clock direction ("bottom"). While scanning and/or  $\theta$  the center of the measuring spot on the Display surface shall stay fixed. The backlight should be operating for 30 minutes prior to measurement... VDD shall be  $3.3 \pm 0.3V$  at  $25^\circ C$ . Optimum viewing angle direction is 6 o'clock.

<p>Note:</p> <ol style="list-style-type: none"> <li>1. Viewing angle is the angle at which the contrast ratio is greater than 10. The viewing angles are determined for the horizontal or 3, 9 o' clock direction and the vertical or 6, 12 o' clock direction with respect to the optical axis which is normal to the LCD surface (see FIGURE1 shown in Appendix).</li> <li>2. Contrast measurements shall be made at viewing angle of <math>T = 0^\circ</math> and at the center of the LCD surface. Luminance shall be measured with all pixels in the view field set first to white, then to the dark (black) state . (see FIGURE1 shown in Appendix) Luminance Contrast Ratio (CR) is defined mathematically as <math>CR = \text{Luminance when displaying a white raster} / \text{Luminance when displaying a black raster}</math>.</li> <li>3. Center Luminance of white is defined as luminance values of center 1 point and 5 points across the LCD surface. Luminance shall be measured with all pixels in the view field set first to white. This measurement shall be taken at the locations shown in FIGURE 2 for a total of the measurements per display.</li> <li>4. The White luminance uniformity on LCD surface is then expressed as : <math>Y_5 = \text{Minimum Luminance of five points} / \text{Maximum Luminance of five points}</math> (see FIGURE 2) , <math>Y_{13} = \text{Minimum Luminance of 13 points} / \text{Maximum Luminance of 13 points}</math> (see FIGURE 3).</li> <li>5. The color chromaticity coordinates specified in Table 4. shall be calculated from the spectral data measured with all pixels first in red, green, blue, and white. Measurements shall be made at the center of the panel.</li> <li>6. The electro-optical response time measurements shall be made as shown in FIGURE 4 (shown in Appendix)by switching the "data" input signal ON and OFF. The times needed for the luminance to change from 10% to 90% is <math>T_d</math> and 90% to 10% is <math>T_r</math>.</li> <li>7. Cross-Talk of one area of the LCD surface by another shall be measured by comparing the luminance (<math>Y_A</math>) of a 25mm diameter area, with all display pixels set to a gray level, to the luminance (<math>Y_B</math>) of that same area when any adjacent area is driven dark (Refer to FIGURE 5).</li> </ol>

## 9.0 POWER SEQUENCE

To prevent a latch-up or DC operation of the LCD module, the power on/off sequence shall be as shown in below

$$t_1 \leq 10 \text{ ms}$$

$$0 \leq t_4 \leq 50 \text{ ms}$$

$$0 \leq t_2 \leq 50 \text{ ms}$$

$$0 \leq t_5 \leq 50 \text{ ms}$$

$$0 \leq t_3 \leq 50 \text{ ms}$$

$$t_6 \leq 10 \text{ ms}$$

$$t_7 = 200 \text{ ms}$$

$$t_8 = 0 \text{ ms}$$

$$t_9 = 100 \text{ ms}$$

\* SET  $0V \leq V1(t) \leq VDD(t)$

HERE,  $V1(t)$ ,  $VDD(t)$  indicate the transitive state of  $V1$ ,  $VDD$  when the power supply is turned ON or OFF

Note1. : Do not keep the interface signal high-impedance when power is on.

### 10.2 Mounting

See FIGURE 6. (shown in Appendix)

### 10.3 Anti-Glare and Polarizer Hardness.

The surface of the LCD has an anti-glare coating to minimize reflection and a coating to reduce scratching. (Nitto Denko : ARC150T)

### 10.4 Light Leakage

There shall not be visible light from the back-lighting system around the edges of the screen as seen from a distance 50cm from the screen with an overhead light level of 350lux.

## 12.0 HANDLING & CAUTIONS

### (1) Cautions when taking out the module

- Pick the pouch only, when taking out module from a shipping package.

### (2) Cautions for handling the module

- As the electrostatic discharges may break the LCD module, handle the LCD module with care. Peel a protection sheet off from the LCD panel surface as slowly as possible.
- As the LCD panel and back - light element are made from fragile glass material, impulse and pressure to the LCD module should be avoided.
- As the surface of the polarizer is very soft and easily scratched, use a soft dry cloth without chemicals for cleaning.
- Do not pull the interface connector in or out while the LCD module is operating.
- Put the module display side down on a flat horizontal plane.
- Handle connectors and cables with care.

### (3) Cautions for the operation

- When the module is operating, do not lose CLK, ENAB signals. If any one of these signals is lost, the LCD panel would be damaged.
- Obey the supply voltage sequence. If wrong sequence is applied, the module would be damaged.

(4) Cautions for the atmosphere

- Dew drop atmosphere should be avoided.
- Do not store and/or operate the LCD module in a high temperature and/or humidity atmosphere. Storage in an electro-conductive polymer packing pouch and under relatively low temperature atmosphere is recommended.

(5) Cautions for the module characteristics

- Do not apply fixed pattern data signal to the LCD module at product aging.
- Applying fixed pattern for a long time may cause image sticking.

(6) Other cautions

- Do not disassemble and/or re-assemble LCD module.
- Do not re-adjust variable resistor or switch etc.
- When returning the module for repair or etc., Please pack the module not to be broken. We recommend to use the original shipping packages.
