Általános jegyzet

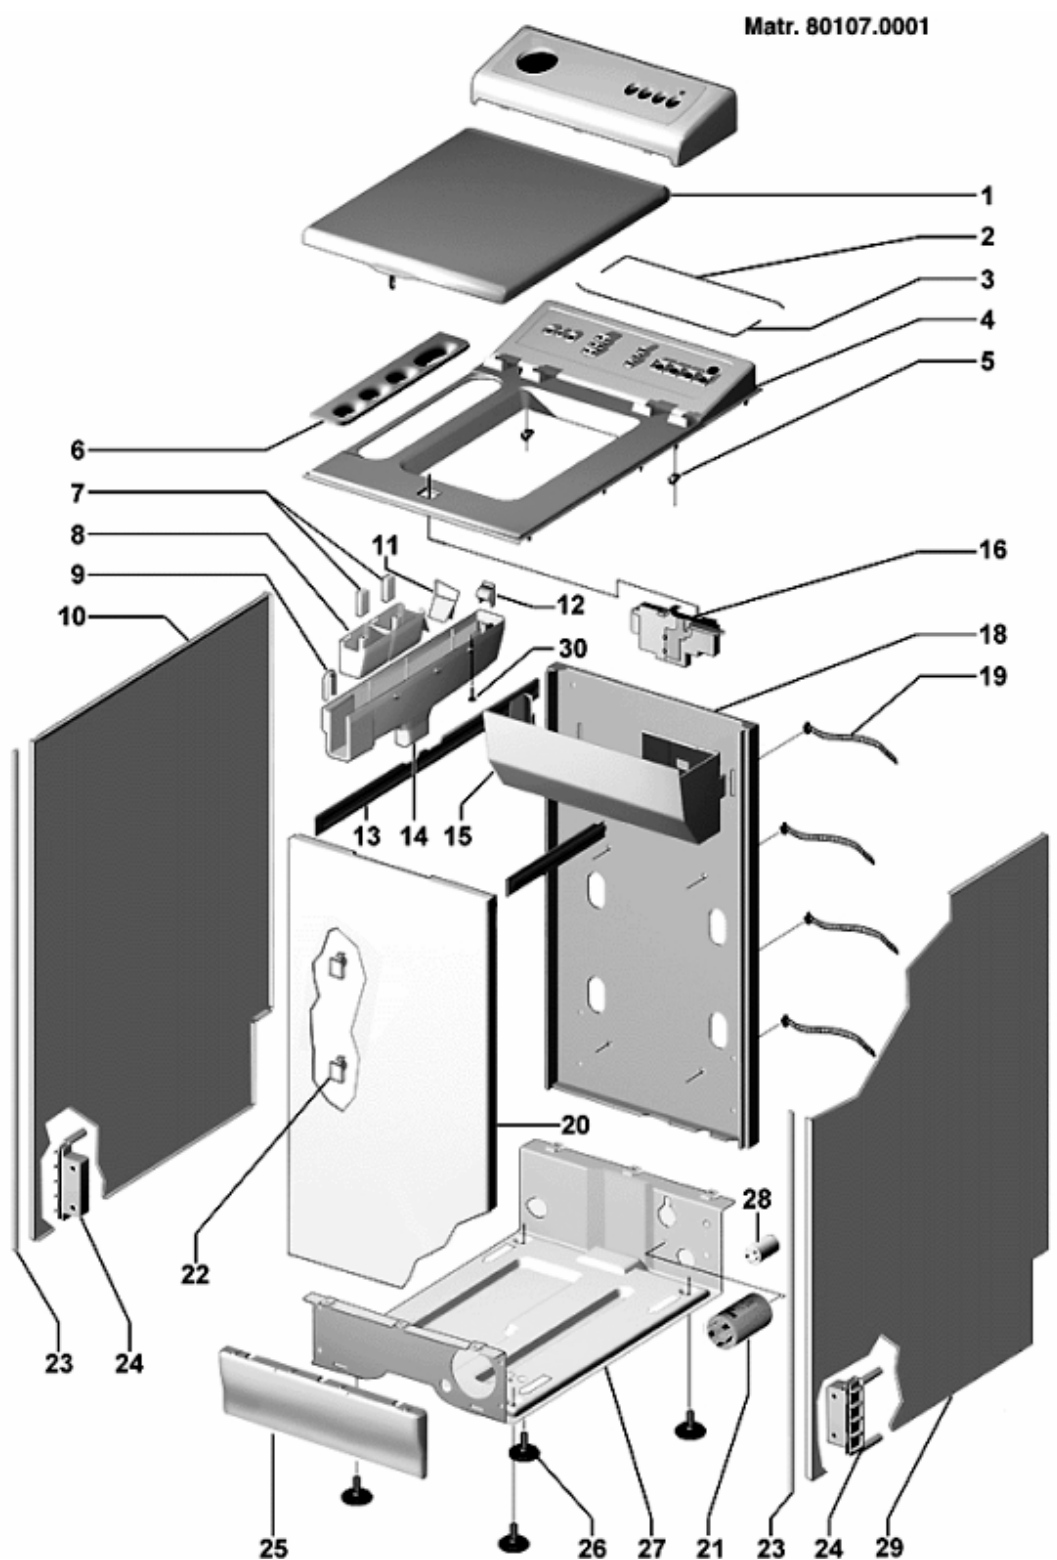

Technikai Dokumentáció irányelvei

Itt néhány általános információ találhatsz a technikai dokumentáció egyszerűbb használatához.

1. Azonos termékcsalád típusai azonos robbantott ábrát tartalmaznak, mely a teljes alkatrész választékot mutatja, általánosságban, nem szükséges, hogy az adott terméknek is alkatrésze az ábrán feltüntetett.
 2. Némely alkatrész bemutatása nem lehetséges közvetlenül a robbantott ábrákon (használati útmutatók, speciális szerelő csomagok, stb...) Ezen kódok megtalálhatók az alkatrészlistán azonos hivatkozási számmal azoknál ahol az alkatrészek be vannak építve vagy 099,999 hivatkozással. A kezelési utasítás, ha már létezik, a 000 referencia számmal lesz ellátva.
 3. Minden robbantott ábra jobb felső sarkában megtalálható a gyári szám, ami mutatja bizonyos modellek gyártásának kezdetét, néhány modellnek létezhet több robbantott ábrája az adott kategóriában, ami a gyári számok alapján különbözik egymástól és egy másik alkatrészlista tartozik hozzá. Ebben az esetben a gyári szám megadása szükséges a helyes alkatrész biztosításához. A robbantott ábra megfelel a legújabb gyári számnak, de az ez előttiékhöz szükséges a megfelelő kiegészítés.
 4. A robbantott ábrák további frissítéseket igényelnek akár már közvetlenül a megjelenés után. Új alkatrészek hozzáadása a jelenlegi referenciaszámok folytatásával történik. A robbantott ábra felülvizsgálati száma a gyári szám utolsó négy digitjében látszódik, a jobb felső sarokban.
 5. A robbantott ábrához tartozó alkatrész lista mutatja a vonatkozó kódokat több modellre is, minden egyes alkatrészhez más információ is rendelkezésre áll
- REF:
- INDUSTRIAL KÓD: a termék különböző változatainak listája (jelezve a termék címkéjén) ahol ez az alkatrész használatos; MEGJEGYZÉS: az információ(k) kódszáma, ami jelöli a teljes szakmai beavatkozást, figyeli a változásokat vagy segít megtalálni a helyes alkatrész kódot.
6. Néhány megjegyzés ugyanabban a részben általános ezért nem csatolódik közvetlenül az alkatrészhez. Azért, hogy a legjobban követhessük a termék változásait, a legjobb, ha követjük az összes megjegyzést és folyamatosan ellenőrizzük a dokumentáció frissítését.
 7. A technikai dokumentáció borítója megmutatja a model nevét és termékkódját

jegyzet

0108027: POLARIZED MODULES

Beginning with serial no. PF..9820., polarized modules have been used on the top-loading washing machines in order to eliminate any risk of errors in connecting the wiring.

The modules affected by this change are:

Part no. 051575 - MODULE 5150.

The new polarized module is being handled with part no. 057413.

Part no. 055329 - Module.

The new module will also be used in place of the pre- modification one and will keep the same SAT part no.

054135 - Module

The new module will also be used in place of the pre- modification one and will keep the same SAT part no.

0108030:

Beginning with serial no. PH..9829... on all of the top-loading washing machines produced at the factory in Brembate, the pressure switch with part no. 057527 is being used on all the 700/800/1000 rpm models, in place of the part with no. 051540.

The new pressure switch can be used in place of the pre-modification one, which will be handled until the stock has been used up.

0108031:

Beginning with serial no. 807010.0001 (PH..9831..), a new sensor seal with part no. 058003 is being used in order to improve the sensitivity of the temperature sensor.

The form of the new seal ensures that the sensor is entirely water-proof, thereby eliminating the possibility of malfunctions caused by dampness affecting the NTC element in the sensor.

If premodification appliances are being serviced for the replacement of the sensor, the old seal must be replaced with the new one.

0108032: TUB BOTTOM STOP RING

Beginning from serial number 80914.0001 (PH..9838...) an axial stop ring with code 058468 has been introduced between the tub bottom and the counterweight in 800 rev. Top Loading Washing Machines.

0108033:

Beginning with serial no. 81012.0001 (PH..9842...) on the top-loading 800 rpm model washing machines produced at Brembate, a motor whose shaft diameter is 14 mm as opposed to 18 mm is being used.

The parts affected by this modification are:

Part no. 055311 - Motor diameter of 14 mm;

Part no. 055329 - Module;

Part no. 057935 - Belt.

The new parts are interchangeable with the pre-modification ones only if used as a complete assembly. The pre-modification parts will continue to be handled.

n1040044: Modifications to the Cabinet and to the detergent dispenser

Beginning with serial no. 90701.0001 on Top-Loading Washing Machines ranges ATL and WGT, some changes have been carried out on parts relevant to the cabinet and the detergent dispenser.

In order to identify the appliances concerned by the modification, an "/A" suffix has been added onto the model symbol indicated on the registration plate, e.g. ATL53TXFR (previous version) ATL53TXFR/A (updated version).

Parts concerned by the modification:

Parts for both ATL and WGT

Part no. 050586 Dispenser siphon (no longer used on modified appliances);

Part no. 051461 Left side panel Replaced by 065278;

Part no. 051462 Right side panel Replaced by 065279;

Part no. 051464 Replaced by 065068 Upper cross piece;

Part no. 051466 Control box Replaced by 065280;

Part no. 051483 Replaced by 065071 Side panel section;

Part no. 051513 and 051512 Replaced by 065076 Torx screws for fixing the pulley;

Part no. 051523 Cap (No longer used on modified appliances);

Part no. 041605 Cup washer (No longer used on modified appliances)

Part no. 052879 and 051557 Replaced by 065079 Electrovalve 2-way 1E -2U;

Part no. 065080 Electrovalve hole plug;

Part no. 051560 Replaced by 065081 Water hose;

Part no. 051542 Replaced by 065078 Terminal;

Part no. 051486 Replaced by 065072 Furniture support;

mod.WGT837T WGT837T/A

Specific parts for ATL (Stainless Steel dispenser)

Part no. 055292 Replaced by 065069 detergent dispenser 400-500-600 rpm, 065970 for 800 e 1000 rpm

Part no. 051481 Front panel Replaced by 065281 (The modified part can be used instead of the pre-modification one but not vice-versa);

Part no. 051489 Replaced by 065073 Symbols support;

Part no. 057934 Unified with 051502 Flange (The modified part is already used on the 400, 600, 800 e 1000 rpm);

Part no. 051514 Replaced by 065075 Dispenser assembly fixing screws;

Part no. 051545 Washer (No longer used on the modified appliances);

Part no. 051517 Replaced by 065077 Counterweight and motor support screws;

Specific parts for WGT (Plastic dispenser)

Part no. 055291 Wash air break (No longer used on modified appliances);

Part no. 057520 Replaced by 065069 Detergent dispenser 400-600 rpm, 065970 for 800 rpm;

Part no. 055288 Replaced by 065082 Inner lid;

Part no. 055290 Replaced by 065083 Additives dispenser;

Part no. 055294 Front panel Replaced by 065282 (The modified part can be used instead of the pre-modification one but not vice-versa);

Part no. 055304 Replaced by 065084 Dispenser assembly fixing screws;

Part no. 055309 Tumbler fixing screws (No longer used on modified appliances);

n1040050: Replacement of drum doors on Top-loading ATL, WGT, TX models.

The drum door part no. 065735 is available from the Central Spare Parts Warehouse, which should be used on Top-loading washing machines in the ATL, WGT range manufactured at the Brembate plant.

The kit is made up as follows :

No. 1 Short door assembly;

No. 1 Long door assembly;

No. 2 Right-hand tub springs;

No. 2 Left-hand tub springs;

No. 2 Drum hinges;

No. 18 Steel screws;

No. 18 Steel flat washers;

No. 18 Steel nuts;

No. 1 Plastic tub frame;

No. 1 Silicone cartridge.

To replace the doors, carry out the following:

1. Place a spongy cloth inside the drum in order to recover any metal shavings produced by the drill bit;
2. Place the drum in such a way that one of the door hinges is situated in the centre of the opening for loading the laundry.
3. Take care not to scratch the tub housing when removing the parts to be replaced and in any case, use a cutter.
4. Using a 4 mm drill bit, remove the rivets that fix the hinge to the drum, taking particular care not to nick the plastic side walls of the tub frame.
5. Once all the rivets have been removed, fix the new door on, making use of the screws. To do this, nose pliers are required in order to insert the washer and secure the screw nuts situated on the outermost sides of the door hinge.
N.B. The screw head should be placed inside the drum.
6. Once the door has been replaced, remove the cloth from the inside of the drum, taking care not to spill the shavings (or the metal parts) from within it.
7. Before using the washing machine, wait for at least 12 hours in order to allow the silicone to set wherever it was used.

n1040055: Thermal probe with stainless steel body on 800 rpm WGT appliances.

Beginning with serial no. 00110.0001 (Pl..0002.....), a new thermal probe with stainless steel body part no. 066348 and a new gasket part no. 066349 are being used on 800 rpm Washing machines from the WGT range.

The new parts can be used instead of the pre-modification ones (part no. 050574: Thermal probe with plastic body and part no. 058003: gasket) but not vice versa.

Parts nos. 050574 and 058003 will continue to be used on the other ranges.

n1040081: Indissoluble welded plastic tub.

Beginning with serial no. 00601.0001 (PH0022.0001), the oscillating assembly on top-loading washing machines WGT with the INDESIT brand with a plastic tub is being produced in a single assembly indissoluble welded part no. 075197 which is made up of the following parts:

- Plastic tub;
- Tub closing disc;
- Drum Assembly.

Following this modification, compared to the previous versions of the same model, the following components are part of the new tub assembly:

Cod. 055300 - Tub;
Cod. 055308 - Drum;
Cod. 055299 - Tub lid;
Cod. 055301 - Rider ring;
Cod. 055302 - Tub lid gasket;
Cod. 065084 - Screw for rider ring;
Cod. 055305 - Square nut M6 for rider ring;
Cod. 058468 - Stop ring.

For said modification, new right-hand and left-hand counterweights have been used, which are perfectly interchangeable with the pre-modification ones and keep the same SAT part number (055332 for the right-hand one and 055333 for the left-hand one).

The components of the new and of the previous version will continue to be handled regularly.

n1040143: Modifications on cabinet support and side panels.

Beginning with serial 00821.0001 (PH0034?.), the cabinet support and side panels have been modified on all models of the Top-loading washing machines.

The new cabinet support part no. 076784 can be used instead of part no. 065072 but not vice-versa.

Part no. 065072 will continue to be handled until stocks run out.

The modified side panels, part no. 076782 (right) and 076783 (left) are not interchangeable with the pre-modification ones which shall continue to be handled regularly with part no. 065279 (right) and cod. 065278 (left).

n1040227: Plastic tub kit handled separately

Due to the ceased construction of the tub kit 075197 by the supplier, this component is no longer available in the spare parts warehouse.

A substitution, on the washing machines with top loading WGT and the Indesit trademark, will be handled as separate components:

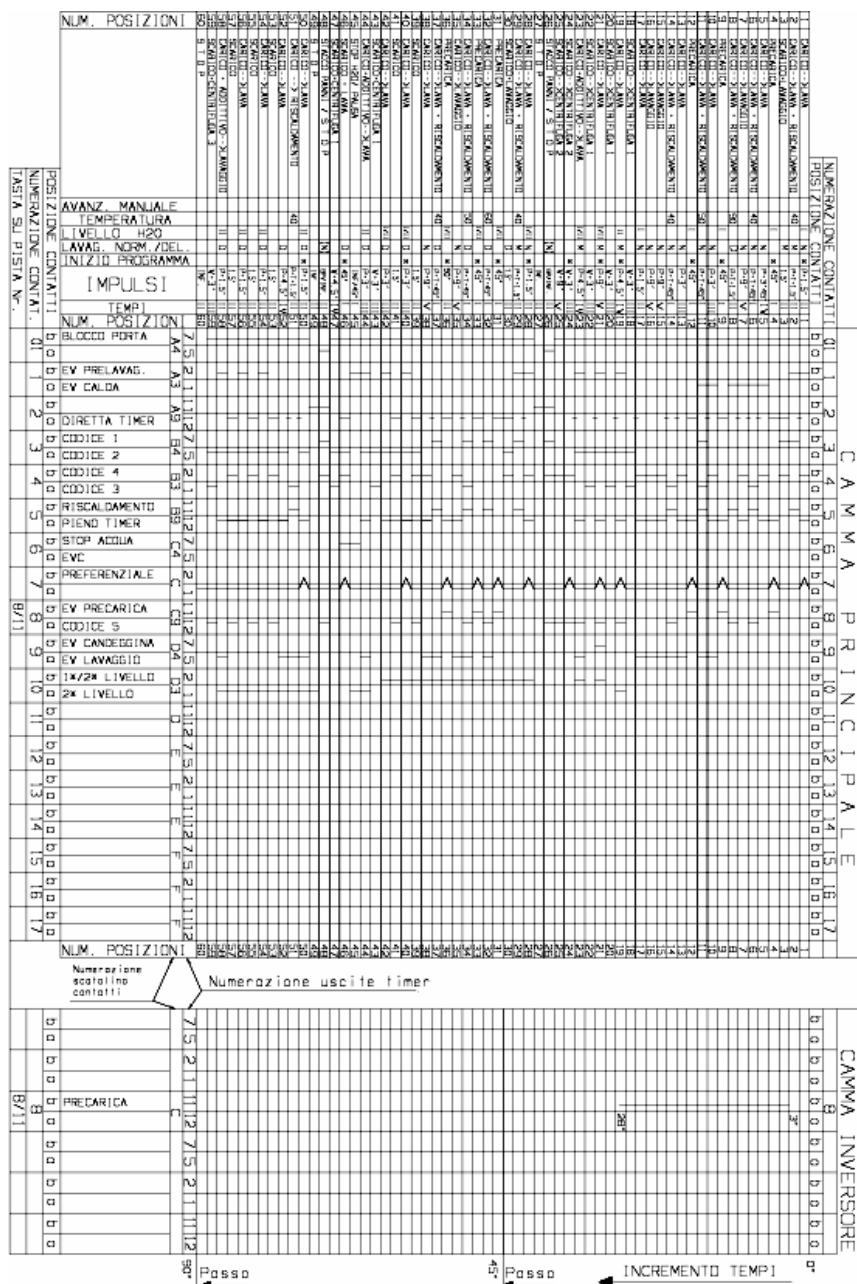

- 1) tub 055300
- 2) tub base disc kit 086432
- 3) tub tightening ring 055301
- 4) tub cover washer 055302
- 5) tightening screws 065084
- 6) square nut 055305
- 7) drum 055308

The tub kit 075197 will continue to be handled until stock depletion.
