WARNING

This service information is designed for experienced repair technicians only and is not designed for use by the general public. It does not contain warnings or cautions to advise non-technical individuals of potential dangers in attempting to service a product. Products powered by electricity should be serviced or repaired only by experienced professional technicians. Any attempt to service or repair the product or products dealt with in this service information by anyone else could result in serious injury or death.

IMPORTANT SAFETY NOTICE

There are special components used in this equipment which are important for safety. These parts are marked by  in the Schematic Diagrams, Circuit Board Diagrams, Exploded Views and Replacement Parts List. It is essential that these critical parts should be replaced with manufacturer's specified parts to prevent shock, fire or other hazards. Do not modify the original design without permission of manufacturer.

1 Before Repair and Adjustment

Disconnect AC power, discharge Power Supply Capacitors C616 through a 10 Ω , 5 W resistor to ground. DO NOT SHORT-CIRCUIT DIRECTLY (with a screw driver blade, for instance), as this may destroy solid state devices.

After repairs are completed, restore power gradually using a variac, to avoid overcurrent.

Current consumption at AC 230 V, 240 V, 50 Hz in NO SIGNAL mode should be ~80 mA, ~100 mA respectively.

2 Protection Circuitry

The protection circuitry may have operated if either of the following conditions are noticed:

- No sound is heard when the power is turned on.
- Stops during a performance.

The function of this circuitry is to prevent circuitry damage if, for example, the positive and negative speaker connection wires are "shorted", or if speaker systems with an impedance less than the indicated rated impedance of the amplifier are used.

If this occurs, follow the procedure outlines below:

1. Turn off the power.
2. Determine the cause of the problem and correct it.
3. Turn on the power once again after one minute.

Note:

When the protection circuitry functions, the unit will not operate unless the power is first turned off and then on again.

4 Precaution of Laser Diode

Caution:

This product utilizes a class 1 laser. Invisible laser radiation is emitted from the optical pick up lens.

When the unit is turned on:

1. Do not disassemble the optical pick up unit, since radiation from exposed laser diode is dangerous.
2. Do not adjust the variable resistor on the pick up unit. It was already adjusted.
3. Do not look at the focus lens using optical instruments.
4. Recommend not to look at pick up lens for a long time.

CAUTION:

THIS PRODUCT UTILIZES A LASER.

USE OF CONTROLS OR ADJUSTMENTS OR PERFORMANCE OF PROCEDURES OTHER THAN THOSE SPECIFIED HEREIN MAY RESULT IN HAZARDOUS RADIATION EXPOSURE.

ACHTUNG:

Dieses produkt enthält eine laserdiode. Im eingeschalteten zustand wird unsichtbare laserstrahlung von der lasereinheit abgestrahlt.

Wellenlänge: 780 nm

Maximale strahlungsleistung der lasereinheit: 100 μ W/VDE

Die strahlung an der lasereinheit ist ungefährlich, wenn folgende punkte beachtet werden:

1. Die lasereinheit nicht zerlegen, da die strahlung an der freigelegten laserdiode gefährlich ist.
2. Den werkseitig justierten einstellregler der lasereinheit nicht verstellen.
3. Nicht mit optischen instrumenten in die fokussierlinse blicken.
4. Nicht über längere zeit in die fokussierlinse blicken.

5 Handling Precautions For Traverse Deck

The laser diode in the traverse deck (optical pickup) may break down due to potential difference caused by static electricity of clothes or human body. So, be careful of electrostatic breakdown during repair of the traverse deck (optical pickup).

• Handling of traverse deck (optical pickup)

1. Do not subject the traverse deck (optical pickup) to static electricity as it is extremely sensitive to electrical shock.
2. To prevent the breakdown of the laser diode, an antistatic shorting pin is inserted into the flexible board (FFC board).
3. Take care not to apply excessive stress to the flexible board (FFC board). When removing or connecting the short pin, finish the job in as short time as possible.
4. Do not turn the variable resistor (laser power adjustment). It has already been adjusted.

• Grounding for electrostatic breakdown prevention

1. Human body grounding
Use the anti-static wrist strap to discharge the static electricity from your body.
2. Work table grounding.
Put a conductive material (sheet) or steel sheet on the area where the traverse deck (optical pickup) is place, and ground the sheet.

Caution:

The static electricity of your clothes will not be grounded through the wrist strap. So, take care not to let your clothes touch the traverse deck (optical pickup).

Caution when replacing the Traverse Deck

The traverse deck has a short point shorted with solder to protect the laser diode against electrostatics breakdown. Be sure to remove the solder from the short point before making connections.

6 Use of Caution Labels

LUOKAN 1 LASERLAITE
KLASS 1 LASER APPARAT

7 Caution for AC Mains Lead

(For “EB” area code model only.)

For your safety, please read the following text carefully.

This appliance is supplied with a moulded three pin mains plug for your safety and convenience.

A 5-ampere fuse is fitted in this plug.

Should the fuse need to be replaced please ensure that the replacement fuse has a rating of 5-ampere and that it is approved by ASTA or BSI to BS1362.

Check for the ASTA mark  or the BSI mark  on the body of the fuse.

If the plug contains a removable fuse cover you must ensure that it is refitted when the fuse is replaced.

If you lose the fuse cover, the plug must not be used until a replacement cover is obtained.

A replacement fuse cover can be purchased from your local dealer.

CAUTION!

IF THE FITTED MOULDED PLUG IS UNSUITABLE FOR THE SOCKET OUTLET IN YOUR HOME THEN THE FUSE SHOULD BE REMOVED AND THE PLUG CUT OFF AND DISPOSED OFF SAFELY.

THERE IS A DANGER OF SEVERE ELECTRICAL SHOCK IF THE CUT OFF PLUG IS INSERTED INTO ANY 13-AMPERE SOCKET.

If a new plug is to be fitted, please observe the wiring code as shown below.

If in any doubt please consult a qualified electrician.

IMPORTANT

The wires in this mains lead are coloured in accordance with the following code:

Blue: Neutral
Brown: Live

As these colours may not correspond with the coloured markings identifying the terminals in your plug, proceed as follows:

The wire which is coloured Blue must be connected to the terminal which is marked with the letter N or coloured Black or Blue.

The wire which is coloured Brown must be connected to the terminal which is marked with the letter L or coloured Brown or Red.

WARNING: DO NOT CONNECT EITHER WIRE TO THE EARTH TERMINAL WHICH IS MARKED WITH THE LETTER E, BY THE EARTH SYMBOL  OR COLOURED GREEN OR GREEN/YELLOW.

THIS PLUG IS NOT WATERPROOF—KEEP DRY.

Before use

Remove the connector cover.

How to replace the fuse

The location of the fuse differ according to the type of AC mains plug (figures A and B). Confirm the AC mains plug fitted and follow the instructions below.

Illustrations may differ from actual AC mains plug.

1. Open the fuse cover with a screwdriver.

Figure A

Figure B

2. Replace the fuse and close or attach the fuse cover.

Figure A

Figure B

8 Power Supply

Operating the unit on AC power **A**

For United Kingdom Only

Be sure to read the Caution for AC Mains Lead on Page 5 before connection.

1 Connect the AC Mains Lead.

The AC Mains Lead must be disconnected from the unit if you intend to power the unit with batteries.

2 Connect the AC power cord.

The AC power cord must be disconnected from the unit if you intend to power the unit with batteries.

Using batteries (not included) **B**

The unit cannot be powered by batteries if the AC power cord is connected.

The remote control cannot turn the unit on when batteries are used.

Removing the batteries **C**

Open the battery cover, insert a finger into the hole in the bottom of the unit and push out.

Battery life

" lights when the batteries are running down. Replace all the batteries with new ones.

Memory back-up batteries (not included) **D**

Insert these batteries to save the information contained in the memory, such as the clock and timer settings, if there is an interruption to the power supply.

These batteries do not power the unit.

Replacing the batteries

- The memory batteries last about one year.
- Connect the unit to AC power before replacing the batteries.
- Extend the life of the memory batteries by always pressing [] to turn the unit off before disconnecting the unit from the AC power source or replacing the power batteries.

Removing the batteries **E**

Open the battery cover, insert a finger into the hole in the bottom of the unit and push out.

9 The Remote Control

Buttons

A

Number	Designation
30	Sound virtualizer button (S.VIRTUALIZER)
31	CD skip/search buttons (◀▶)
32	Tuning buttons (-TUNE+)
33	Rewind/fast forward TPS buttons (REW TPS FF)
34	Tape counter reset button (C-RESET)
35	Reverse mode select button (REV MODE)
36	Numbered buttons
37	Sleep timer button (SLEEP)
38	Program memory button (PROGRAM MEMORY)
39	Timer fader button (TIMER FADER)
40	Tape stop/mode select button (■)
41	FM mode BP button (FM MODE/BP)
42	CD stop/program clear/mode select button (■/CLEAR)
43	CD play mode button (PLAY MODE)
44	Display select button (DISPLAY)

When the unit is supplied with AC power, buttons 1 to 4, 13, 15, 22 and 24 function in the same way as the controls on the main unit. To save power, the unit cannot be turned on from the remote control when the batteries are used.

Batteries

B

Insert so the poles (+ and -) match those in the remote control.

Remove if the remote control is not going to be used for a long period of time. Store in a cool, dark place.

Replace if the unit does not respond to the remote control even when held close to the front panel.

Use

C

Aim at the sensor, avoiding obstacles, at a maximum range of 7 meters directly in front of the unit.

- Keep the transmission window and the unit's sensor free from dust.
- Operation can be affected by strong light sources, such as direct sunlight, and the glass doors on cabinets.

Do not:

- put heavy objects on the remote control.
- take the remote control apart.
- spill liquids onto the remote control.

10 Before Recording

Use household AC power or new batteries when recording to avoid poor recordings caused by the batteries running down. Televisions can cause interference to recordings made on this unit if the two are too close to each other.

Selection of tapes for recording

The unit automatically identifies the type of tape.

Normal Position/TYPE I	O.K.
High position/TYPE II	O.K.
Metal position/TYPE IV	NO

Metal position tapes can be used, but the unit will not be able to record or erase them correctly.

Volume and sound quality in recording

- Recording level is set automatically.
- Recordings are unaffected by changes to sound quality.

Selecting reverse mode

Remote Control Only

Press [REV MODE].

- ⇄ and ⇄: Both sides record (top side → bottom side).
- ⇄: One side only records.

Erasing recordings

- 1 Insert the cassette with the side to be erased facing up.
- 2 Press [■ TAPE/CD] to switch to TAPE mode.
- 3 Press [● / II].

Erasure Prevention

The illustration shows how to remove the tabs to prevent recording. To record on the tape again, cover as shown, being careful not to cover the high position discrimination hole.

To Display the Tape Counter while Recording

Remote Control Only

Press [DISPLAY].

Each time the button is pressed in CD, Radio, or AUX mode

To reset the tape counter

Press [C-RESET].

The counter resets to "000"

11 Using Auxiliary Equipment

Using Auxiliary Equipment

You can play or record sound from other equipment through this unit's AUX IN terminal.
Plug type: 3.5mm stereo

Playback

Preparation: (when using batteries) Press [].

- 1** Press [**AUX**] to switch to AUX mode.
- 2** Start playback on the equipment.

Recording

- 1** Do steps **1** and **2** as described above.
- 2** Press [].

Note:

When this unit and the other equipment are connected to each other, do not set input on both unit's to "AUX". This can cause feedback noise to occur.

Using headphones (not included)

Reduce volume before connection.
Avoid listening for prolonged periods of time to prevent hearing damage.
Plug type: 3.5mm stereo

12 Self Diagnostic Function

Display procedure	Display location
<p>Cassette tapes to be read</p> <ul style="list-style-type: none"> • Cassette tape with erasure-prevention tab removed on one side only (A or B). • Music cassette tape with erasure-prevention tabs intact on both sides (A and B). <p>Note: In either case, rewind the cassette tape to about the middle.</p> <p>To enter the self-diagnostic mode</p> <ol style="list-style-type: none"> 1. Connect the unit to the power supply and turn the power on. 2. Set reverse mode to " ← ". (Use the remote control attached with main unit, since the reverse mode cannot be set from the main unit.) 3. Check that there is no cassette tape in the compartment. 4. Hold down the TAPE/CD STOP key (■) for at least 2 seconds, and then keep pressing together with the tape deck FF button for another 2 seconds. "T" will then appear on the LCD display. (This indicates that the unit has switched from normal display mode to self-diagnostic mode.) <p>To view the display</p> <ul style="list-style-type: none"> • To view the self-diagnostic display for the DECK 1 and DECK 2: <ol style="list-style-type: none"> 1. Load a cassette tape into tape DECK 1 with the erasure-prevention tab removed on one side only (A or B). 2. Press the FF button, perform the fast forward winding operation for about 5 seconds and then stop winding using the stop button (■). 3. Remove the cassette tape, and load a music cassette (containing at least 4 seconds of music and both erasure-prevention tabs intact). 4. Press the TAPE play button (◀▶). When play begins, press either the FF button or the REW , and perform the TPS (Tape Program Search) operation in the direction in which the music is recorded. 5. After TPS operation has completed (when the beginning of music is found and the unit switches back to play mode), stop the tape by pressing the TAPE/CD STOP button (■). 6. Repeat steps 1 ~ 5 above for DECK 2. 7. If an error is detected when the tape deck TAPE/CD STOP button (■) is pressed, a self-diagnostic display appears on the LCD display. (If no error occurs, the LCD display shows the tape counter.). If there is more than one error, the error display changes each time the tape deck Stop button (■) is pressed. To change between the self-diagnostic display for tape DECK 1 AND tape DECK 2, press the tape deck select button (DECK1/2). • To view the self-diagnostic display for the CD player : <ol style="list-style-type: none"> 1. Press the CD Open / Close button (▲) to open the CD tray. 2. After the tray has been fully open for about 5 seconds, press the CD Open / Close button (▲) again to close the CD tray. 3. Press the stop button, self-diagnostic display on the LCD display (If no error occurs, LCD display shows "T"). <p>Note: If this procedure is performed for tape DECK 1, DECK 2 and the CD player and an error occurs for each, the LCD display alternates between the self-diagnostic codes for tape DECK 1 and 2 and the CD player each time the TAPE/CD STOP button (■) is pressed. (If there is no error, the LCD display shows the tape counter.)</p> <p>To return to normal display mode</p> <ul style="list-style-type: none"> • Press the power switch once to turn the power off, then press it again to turn the power back on. To view the self-diagnostic display once again, perform steps 1 ~ 4 of "Entering self-diagnostic mode" above, then press the TAPE/CD STOP button (■). <p>Clearing the self-diagnostic memory</p> <ul style="list-style-type: none"> • The self-diagnostic error code is stored in memory. To clear memory, first correct the error, and then remove the batteries (including the clock / memory batteries) and disconnect the AC power supply. Then press and hold down the power supply button for at least 5 seconds. • Always be sure to clear memory after an error has been corrected. 	 <p>This display indicates that the unit is in self-diagnostic mode.</p>  <p>Example of a self-diagnostic display</p> 

Display content **Note :** Items marked with (*) are automatically displayed, and do not require the procedure describe in the section "Viewing the display".

Display Code	Symptom or condition	Cause and method of correction
*U01	When operating on batteries, power goes off immediately after being turned on.	The batteries are depleted. Replace with new batteries.
*U02	Power cannot be switched on.	Check the power cord (AC) or insert fresh batteries.
H01	Cassette deck does not operate correctly.	Faulty cassette deck mechanism mode detection switch (DECK 1 : S951, DECK 2: 971), reel motor and plunger. (Check and replace)
H02	Units does not record, or the unit goes into recording mode even when the erasure prevention tabs have been removed from the cassette.	Faulty erasure-prevention tab detection switch (S974, S975) or short circuit. (Check and replace)
H03	Tape does not play, even when the tape deck play button is pressed. The motor operates when the tape deck play button is pressed, even when no cassette is loaded in the deck.	Faulty tape detection switch (DECK 1: S952, DECK 2: S972) or short-circuit. (Check and replace).
H15	The CD tray closes immediately after it is opened.	Faulty contact of the CD tray open detection switch (SW790). (Check and replace)
H16	The CD tray opens immediately after it is closed.	Faulty contact of the CD tray close detection switch (SW791). (Check and replace)
F01	When the play button is pressed, the tape advances only slightly and then stops.	Reel pulse error. (Faulty Hall IC) (Check and replace)
F02	TPS (Tape Program Search) does not work.	Faulty TPS signal detection or faulty plunger control. (Check and replace mechanism control IC)
F15	When the CD Play button is pressed when either the power is off, or from some function other than CD, it takes excessive time (10 seconds or more) for the CD to play.	Faulty traverse inner circumference position detection switch (S701). (Check and replace)
*F26	When the CD operation mode is selected by pressing the Stop button (■), "F26" is shown on the LCD display, and a CD does not play when it has been loaded.	Communication error between servo-processor IC and microprocessor IC. (Check and replace)
F75	When a CD is loaded, "NO DISC" is displayed and the CD does not play.	Faulty CD circuit power supply. (Faulty power supply IC or CD circuit power supply system.) (Check and replace). Flexible circuit board has become disconnected or broken wiring. (Check and replace) Faulty servo-processor IC. (Check and replace)

13 Operation Checks and Main Component Replacement Procedures

"ATTENTION SERVICER"

Some chassis components maybe have sharp edges. Be careful when diassembling and servicing.

Content

- **Checking Procedure for each major P.C.B.**
 - 1. Checking for the Panel, Main & Lighting P.C.B P.g. 12 ~ 13
 - 2. Checking of the CD Servo P.C.B P.g. 13 ~ 14
- **Disassembly and Assembly of Traverse Deck** P.g.14 ~ 15
- **Main Component Replacement Procedures** P.g.15 ~ 16

Warning:

This product uses a laser diode. Refer to P.3.

ACHTUNG:

Die Lasereinheit nicht zerlegen.

Die Lasereinheit darf nur gegen eine vom Hersteller spezifizierte Einheit ausgetauscht werden.

13.1. Checking Procedure for each major P.C.B.

13.1.1. Checking for the Panel, Main & Lighting P.C.B.

Step 2: Remove the battery cover.

Step 3: Remove the handle as shown.

Step 4: Use a screw driver and insert it to the hole shown. Slide the screw driver to either direction to open the left cassette lid.

Step 5: To open the other cassette lid, use your finger to push the lock rod to the direction shown.

Step 6: Remove the FFC wire from CS1001 & CS1002 and remove the front cabinet together with the Panel P.C.B.

Step 7: Lift up the cassette deck mechanism.

Step 8: Remove the wire from CP981.

13.1.2. Checking for CD Servo P.C.B.

Step 1: Remove the FFC wire from CS707.

Step 2: Remove the wire from CP702.

Step 3: Remove the wire from CP901 which is mounted on transformer P.C.B.. Take out the Main P.C.B..

SERVO P.C.B.

13.2. Disassembly and Assembly of Traverse Deck

Step 1: Press down both catches on both side as shown.

Step 2: Push the clamp plate towards the catches.

Step 3: Pull the clamper away from the magnet situated inside the fixed plate.

Step 4: Remove the clamp plate and tray in sequence.

Step 5: Push the cam gear drive to about 30° anticlockwise.

Shift the spring away from the traverse.

Step 6: Press on the catch on both sides one at a time. While pressing, shift the traverse up in the manner of left to right.

Step 7

Step 7: Take out the traverse in a slanting manner.

Note:

1. Follow the reverse procedure to replace the CD Traverse Unit and CD Tray.
2. Make sure that the two gear is in this position and the hole on the right gear is align with the hole below it when replacing the CD Traverse Unit and CD Tray.

Note: When replacing the CD Tray, make sure the dented line is at position as shown.

13.3. Main Component Replacement Procedures

Step 1: Desolder 2 terminals of the traverse motor.

Step 2: Desolder 2 terminals of the spindle motor.

Step 3: Remove the flexible cable from CN701.

- Removal of the flexible cable.

Push the top of the connector in the direction of arrow 1 and pull out the flexible cable in the direction of arrow 2.

Step 4: Push the lever in and turn the gear clock wise fully.

Step 5

Step 6: Release the claw and remove the Driver Plate.

Step 7: Slide out the Optical Pick-up Unit from the indent opening.

Step 8: Do not touch the lense on the OPU.

Caution!

IC, LSI and VLSI are sensitive to static electricity.

Secondary trouble can be prevented by taking care during repair.

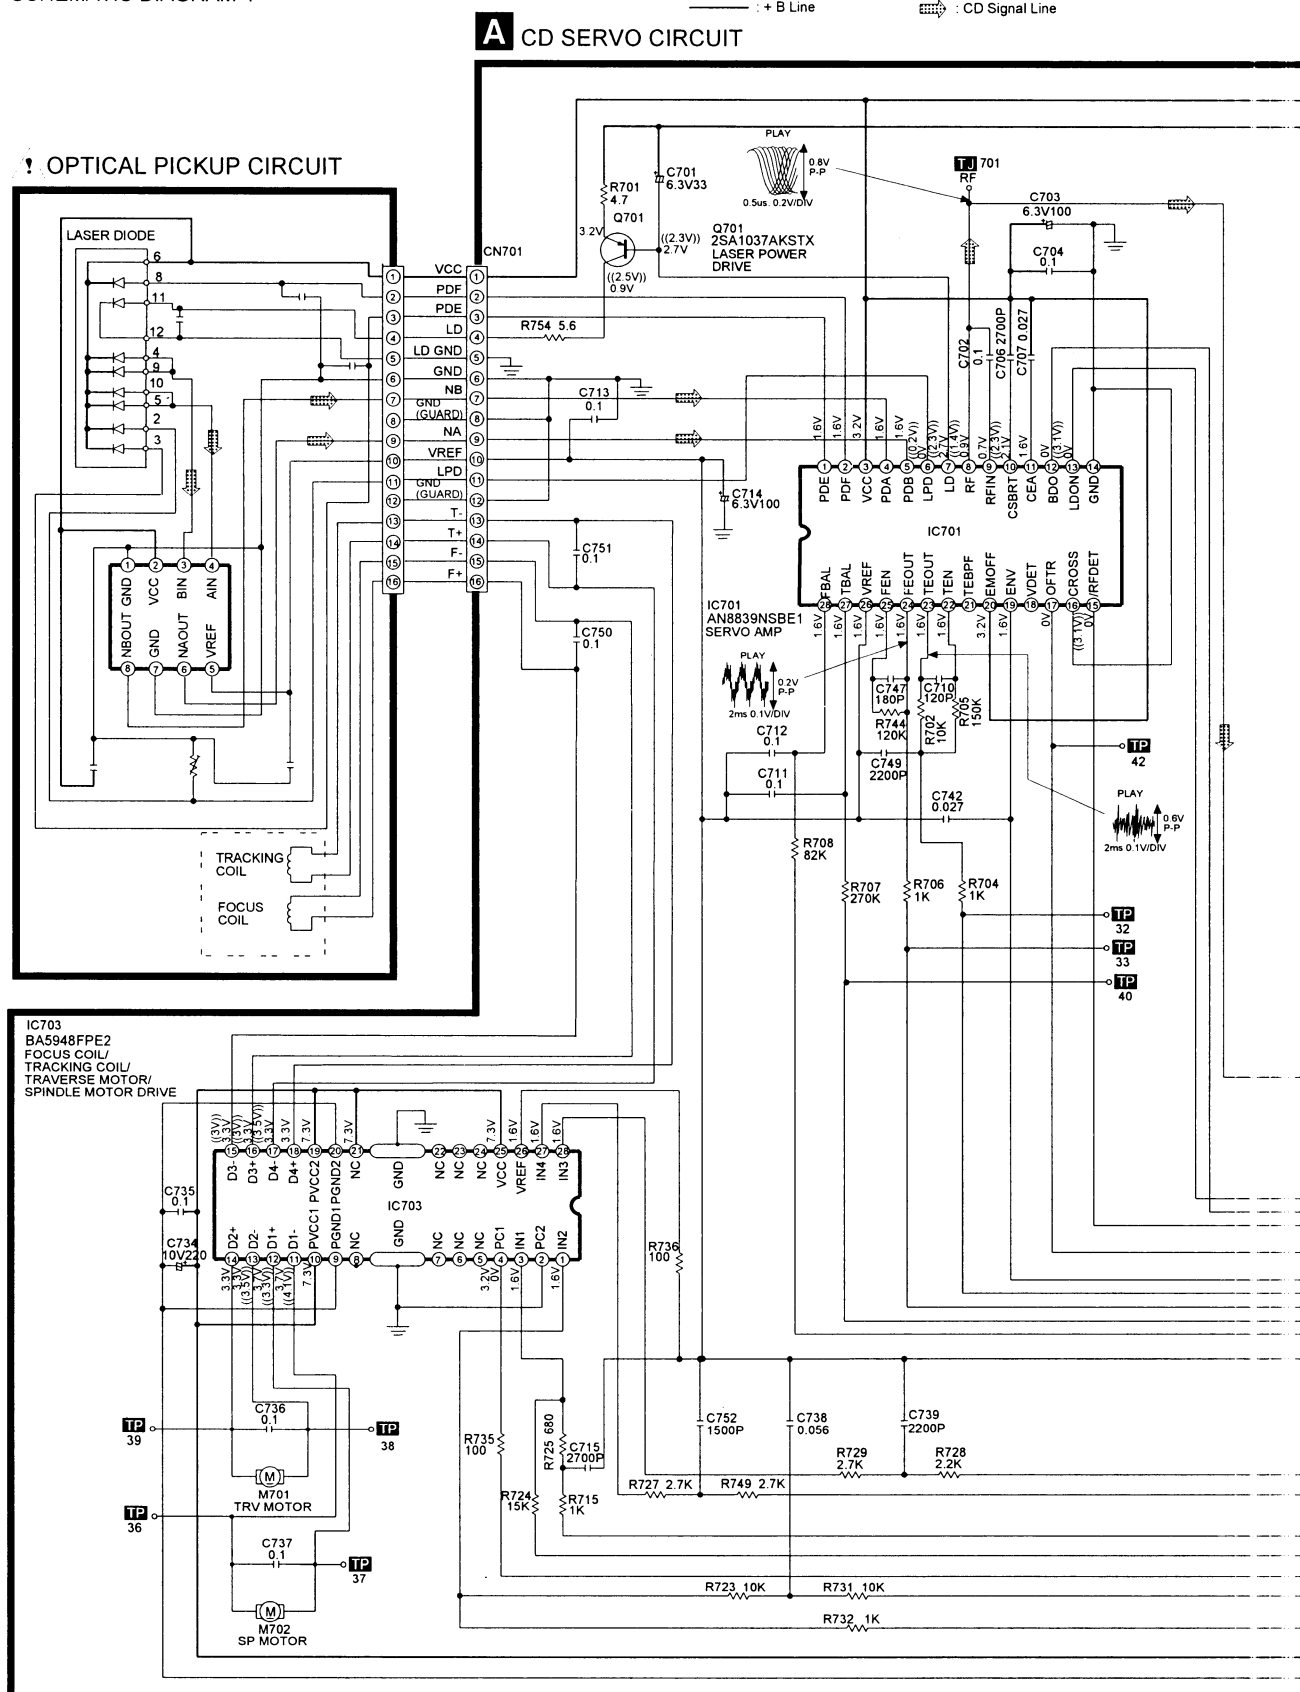

- Cover the parts boxes made of plastics with aluminium foil.
- Put a conductive mat on the work table.
- Ground the soldering iron.
- Do not touch the pins of IC, LSI or VLSI with fingers directly.

• Importance safety notice:

Components identified by Δ mark have special characteristics important for safety. Furthermore, special parts which have purposes of fire-retardant (resistors), high-quality sound (capacitors), low-noise (resistors), etc. are used. When replacing any of components, be sure to use only manufacturer's specified parts shown in the parts list.

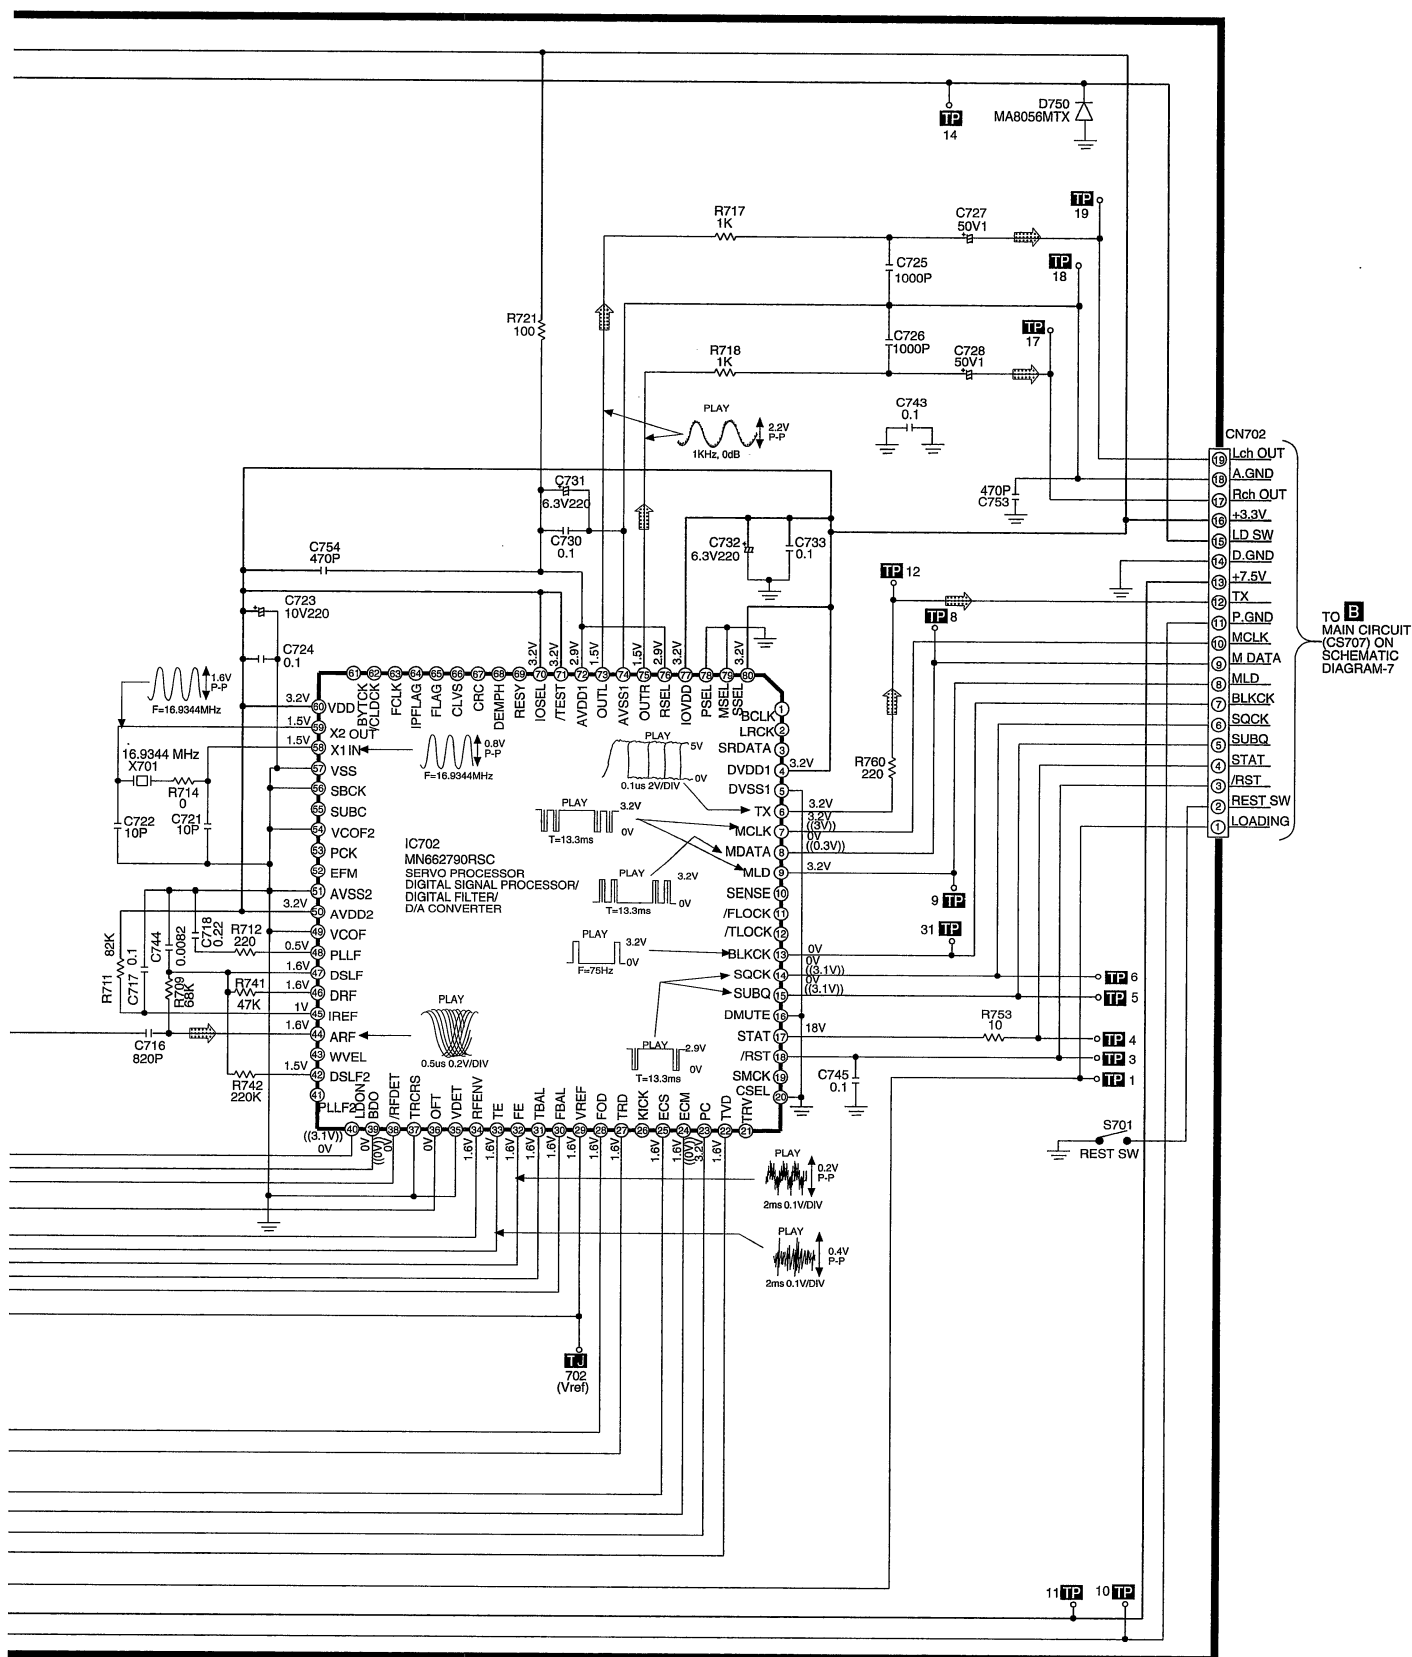

- This schematic diagram maybe modified at anytime with the development of new technology.

The schematic diagram illustrates the internal circuitry of a car stereo, organized into several functional blocks:

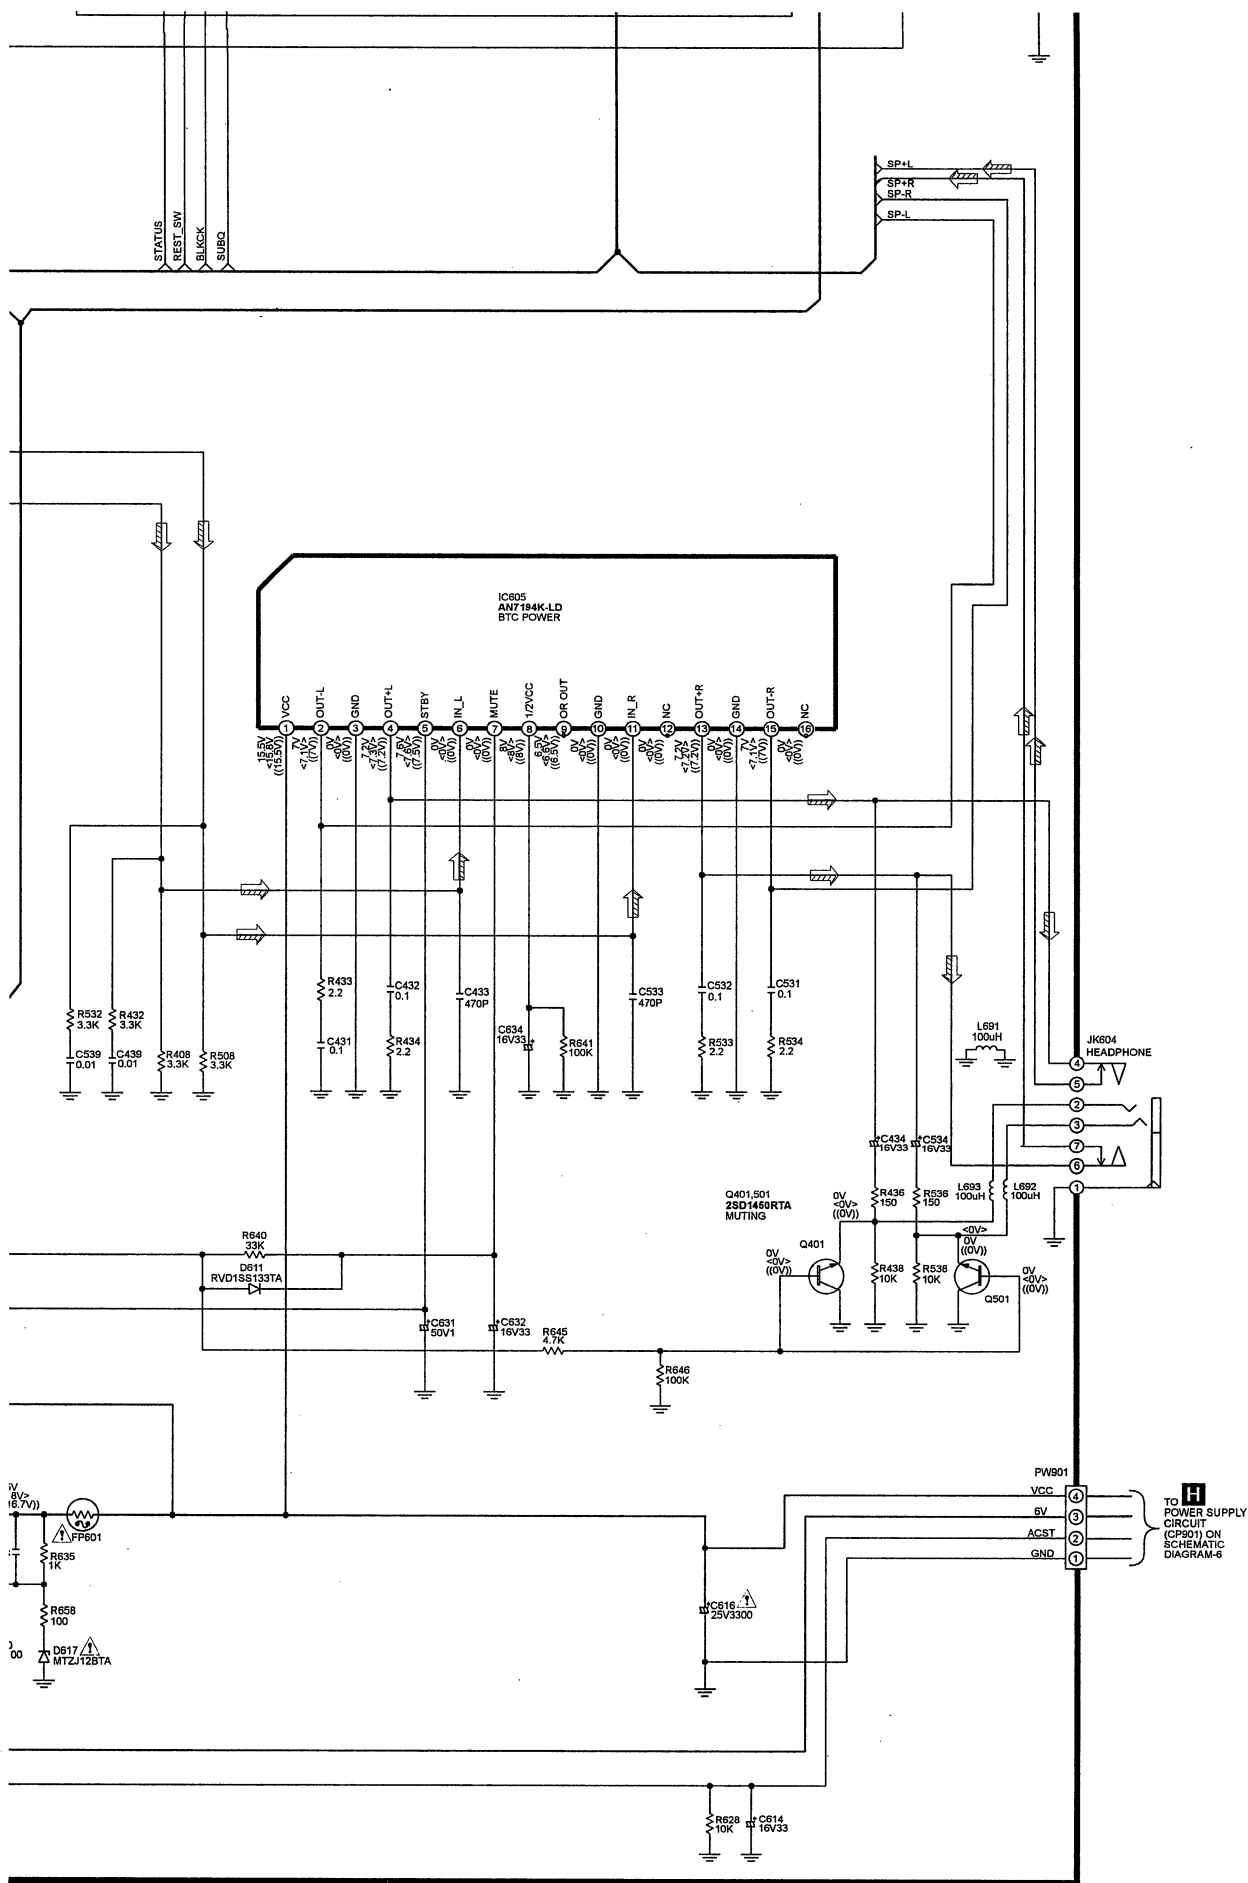

- Power Supply and Tuning:** Located in the upper left, it features a 2SA933SSTA power supply (Q616) and a 2SC1740SRTA switching (MBP) section. It includes components like R521, R421, R643, R642, and TU L, with voltage levels such as 0.3V, 5.1V, and 5.1V.
- Central Control:** The IC802 S-80830ANY-Z RESET is a central component with pins OUT, VDD, and VSS. It is connected to various resistors (R801, R802, R803, R804, R805, R806, R807, R808, R809, R810, R811, R812, R813, R814, R815, R816, R817, R818, R819, R820, R821, R822, R823, R824, R825, R826, R827, R828, R829, R830, R831, R832, R833, R834, R835, R836, R837, R838, R839, R840, R841, R842, R843, R844, R845, R846, R847, R848, R849, R850, R851, R852, R853, R854, R855, R856, R857, R858, R859, R860, R861, R862, R863, R864, R865, R866, R867, R868, R869, R870, R871, R872, R873, R874, R875, R876, R877, R878, R879, R880, R881, R882, R883, R884, R885, R886, R887, R888, R889, R890, R891, R892, R893, R894, R895, R896, R897, R898, R899, R900, R901, R902, R903, R904, R905, R906, R907, R908, R909, R910, R911, R912, R913, R914, R915, R916, R917, R918, R919, R920, R921, R922, R923, R924, R925, R926, R927, R928, R929, R930, R931, R932, R933, R934, R935, R936, R937, R938, R939, R940, R941, R942, R943, R944, R945, R946, R947, R948, R949, R950, R951, R952, R953, R954, R955, R956, R957, R958, R959, R960, R961, R962, R963, R964, R965, R966, R967, R968, R969, R970, R971, R972, R973, R974, R975, R976, R977, R978, R979, R980, R981, R982, R983, R984, R985, R986, R987, R988, R989, R990, R991, R992, R993, R994, R995, R996, R997, R998, R999, R1000, R1001, R1002, R1003, R1004, R1005, R1006, R1007, R1008, R1009, R1010, R1011, R1012, R1013, R1014, R1015, R1016, R1017, R1018, R1019, R1020, R1021, R1022, R1023, R1024, R1025, R1026, R1027, R1028, R1029, R1030, R1031, R1032, R1033, R1034, R1035, R1036, R1037, R1038, R1039, R1040, R1041, R1042, R1043, R1044, R1045, R1046, R1047, R1048, R1049, R1050, R1051, R1052, R1053, R1054, R1055, R1056, R1057, R1058, R1059, R1060, R1061, R1062, R1063, R1064, R1065, R1066, R1067, R1068, R1069, R1070, R1071, R1072, R1073, R1074, R1075, R1076, R1077, R1078, R1079, R1080, R1081, R1082, R1083, R1084, R1085, R1086, R1087, R1088, R1089, R1090, R1091, R1092, R1093, R1094, R1095, R1096, R1097, R1098, R1099, R1100, R1101, R1102, R1103, R1104, R1105, R1106, R1107, R1108, R1109, R1110, R1111, R1112, R1113, R1114, R1115, R1116, R1117, R1118, R1119, R1120, R1121, R1122, R1123, R1124, R1125, R1126, R1127, R1128, R1129, R1130, R1131, R1132, R1133, R1134, R1135, R1136, R1137, R1138, R1139, R1140, R1141, R1142, R1143, R1144, R1145, R1146, R1147, R1148, R1149, R1150, R1151, R1152, R1153, R1154, R1155, R1156, R1157, R1158, R1159, R1160, R1161, R1162, R1163, R1164, R1165, R1166, R1167, R1168, R1169, R1170, R1171, R1172, R1173, R1174, R1175, R1176, R1177, R1178, R1179, R1180, R1181, R1182, R1183, R1184, R1185, R1186, R1187, R1188, R1189, R1190, R1191, R1192, R1193, R1194, R1195, R1196, R1197, R1198, R1199, R1200, R1201, R1202, R1203, R1204, R1205, R1206, R1207, R1208, R1209, R1210, R1211, R1212, R1213, R1214, R1215, R1216, R1217, R1218, R1219, R1220, R1221, R1222, R1223, R1224, R1225, R1226, R1227, R1228, R1229, R1230, R1231, R1232, R1233, R1234, R1235, R1236, R1237, R1238, R1239, R1240, R1241, R1242, R1243, R1244, R1245, R1246, R1247, R1248, R1249, R1250, R1251, R1252, R1253, R1254, R1255, R1256, R1257, R1258, R1259, R1260, R1261, R1262, R1263, R1264, R1265, R1266, R1267, R1268, R1269, R1270, R1271, R1272, R1273, R1274, R1275, R1276, R1277, R1278, R1279, R1280, R1281, R1282, R1283, R1284, R1285, R1286, R1287, R1288, R1289, R1290, R1291, R1292, R1293, R1294, R1295, R1296, R1297, R1298, R1299, R1300, R1301, R1302, R1303, R1304, R1305, R1306, R1307, R1308, R1309, R1310, R1311, R1312, R1313, R1314, R1315, R1316, R1317, R1318, R1319, R1320, R1321, R1322, R1323, R1324, R1325, R1326, R1327, R1328, R1329, R1330, R1331, R1332, R1333, R1334, R1335, R1336, R1337, R1338, R1339, R1340, R1341, R1342, R1343, R1344, R1345, R1346, R1347, R1348, R1349, R1350, R1351, R1352, R1353, R1354, R1355, R1356, R1357, R1358, R1359, R1360, R1361, R1362, R1363, R1364, R1365, R1366, R1367, R1368, R1369, R1370, R1371, R1372, R1373, R1374, R1375, R1376, R1377, R1378, R1379, R1380, R1381, R1382, R1383, R1384, R1385, R1386, R1387, R1388, R1389, R1390, R1391, R1392, R1393, R1394, R1395, R1396, R1397, R1398, R1399, R1400, R1401, R1402, R1403, R1404, R1405, R1406, R1407, R1408, R1409, R1410, R1411, R1412, R1413, R1414, R1415, R1416, R1417, R1418, R1419, R1420, R1421, R1422, R1423, R1424, R1425, R1426, R1427, R1428, R1429, R1430, R1431, R1432, R1433, R1434, R1435, R1436, R1437, R1438, R1439, R1440, R1441, R1442, R1443, R1444, R1445, R1446, R1447, R1448, R1449, R1450, R1451, R1452, R1453, R1454, R1455, R1456, R1457, R1458, R1459,

18 Measurements and Adjustments

18.1. Tuner Section

READ CAREFULLY BEFORE ATTEMPTING ALIGNMENT

1. Set selector switch to AM or TAPE.
2. Set volume level to 40
3. Output of signal generator should be no higher than necessary to obtain an output reading.

● AM-RF ALIGNMENT

SIGNAL GENERATOR or SWEEP GENERATOR		RADIO DIAL SETTING	INDICATOR (ELECTRONIC VOLTMETER or OSCILLOSCOPE)	ADJUSTMENT (Shown in Fig.1)	REMARKS
CONNECTIONS	FREQUENCY				
Fashion a loop of several turns of wire and radiate signal into loop of receiver.	594 kHz	Point of non-interference.(on/ about 600kHz)	Headphone Jack (32Ω) (Fabricate the plug as shown in Fig.2 and then connect the lead wires of the plug to the measuring instrument.	[*1] L6 (AM ANT Coil)	Adjust for maximum output.
"	1503 kHz	"	"	CT1 (AM ANT Trimmer)	Adjust for maximum output.
[*1] Fix antenna coil with wax after completing alignment.					

● HEAD AZIMUTH ALIGNMENT

TEST TAPE	INDICATOR (ELECTRONIC VOLTMETER or OSCILLOSCOPE)	ADJUSTMENT	REMARKS
QZZCFM (8 kHz, -20 dB)	Headphone Jack (32Ω) (Fabricate the plug as shown in Fig.2 and then connect the lead wires of the plug to the measuring instrument.	Azimuth Screw (Shown in Fig. 3)	<ol style="list-style-type: none"> 1. Insert a test tape (QZZCFM) and start playback in the forward direction. 2. Adjust the azimuth screw for maximum waveform on the oscilloscope and the similar output on L and R channels. 3. When adjusting the azimuth in the reverse direction, repeat the adjustment several times because of a little slip on the forward direction side.

CAUTION:

- Please remove the screw-locking bond left on the head base when replacing the azimuth screw.
- After the adjustment, apply screwlock to the azimuth adjusting screw. (Screw-locking bond: RZZ0L01)

● TAPE SPEED ALIGNMENT

TEST TAPE	EQUIPMENT CONNECTION ELECTRONIC COUNTER	ADJUSTMENT	SPECIFICATION	REMARKS
QZZCWAT (3 kHz, -10 dB)	Headphone Jack (32Ω) (Fabricate the plug as shown in Fig.2 and then connect the lead wires of the plug to the measuring instrument.	Motor VR. (shown in Fig. 4)	3000 ± 90 Hz	<ol style="list-style-type: none"> 1. Insert a test tape (QZZCWAT) in DECK 2 and start playback in the forward direction. 2. Adjust motor VR for output value of 3000 ± 20 Hz shown on frequency counter. 3. Check tht the DECK 2 REV and DECK 1 FWD/ REV tape speed are within DECK 2 FWD tape speed ± 40 Hz.

● BIAS AND ERASE VOLTAGE CHECK

1. Set the unit to "AUX" position.
2. Insert the Normal blank tape (QZZCRA) into DECK 2 and set the unit to "REC" mode (use "● REC / STOP" key).
3. Measure and make sure that the output is within the standard value.
4. Insert the CrO₂ tape (QZZCRX).
5. Repeat steps 2 and 3.

**Bias voltage for Deck 2 (Standard value) : $17.3 \pm 1\text{mV}$ (Normal)
 $29 \pm 1\text{mV}$ (CrO₂)**

● BIAS FREQUENCY ADJUSTMENT (DECK 2)

1. Set the unit to "AUX" position.
2. Insert the Normal blank tape (QZZCRA) into DECK 2 and set the unit to "REC" mode (use "● REC / STOP" key).
3. Adjust L201 so that the output frequency is within the standard value.

Standard Value : $100 \pm 7\text{ kHz}$

18.2. CD Section

Alignment is unnecessary for CD section of this unit.

18.2.1. Alignment Points

21 Terminal Function of IC's

• IC702 (MN662790RSC) LSI

Pin No.	Mark	I/O	Function
1	BCLK	O	Bit clock output for serial data
2	LRCK	O	L/R clock signal output
3	SRDATA	O	Serial data output
4	DVDD1	I	Power supply input (for digital circuit)
5	DVSS1	I	Gnd (for digital circuit)
6	TX	O	Digital audio interface signal output (Latches data at first transition)
7	MCLK	I	Microprocessor command clock signal input
8	MDATA	I	Microprocessor command data signal input
9	MLD	I	Microprocessor command load signal input
10	SENSE	O	Sense signal output (OFT, FESL, MAGEND, NAJEND, POSAD, SFG) (Not used, open)
11	/FLOCK	O	Focus servo feeding signal output ("L": Feed)
12	/TLOCK	O	Tracking servo feeding signal output ("L": Feed)
13	BLKCLK	O	Sub-code block clock signal output
14	SQCK	I	External clock signal input for sub-code Q resistor
15	SUBQ	O	Sub-code Q code output
16	DMUTE	I	Muting input ("H": Mute)
17	STAT	O	Status signal output (CRC, CUE, CLVS, TTSTVP, FCLV, SQCK)
18	/RST	I	Reset signal input
19	SMCK	O	1/2-divided clock signal of crystal oscillating at MSEL = "H" (fSMCK = 8.4672MHz) 1/4-divided clock signal of crystal oscillating at MSEL = "L" (fSMCK = 4.2336MHz)
20	CSEL	I	Frequency Selection Terminal H = 33.8688MHz; L = 16.9344MHz
21	TRV	O	Traverse forced feed output
22	TVD	O	Traverse drive output
23	PC	O	Spindle motor ON signal output ("L": ON)
24	ECM	O	Spindle motor drive signal output (forced mode output)
25	ECS	O	Spindle motor drive signal output (servo error signal output)
26	KICK	O	Kick pulse output
27	TRD	O	Tracking drive output
28	FOD	O	Focus drive output
29	VREF	I	D/A (drive) output (TVD, ECS, TRD, FOD, FBAL, TBAL) reference voltage input
30	FBAL	O	Focus balance adjustment output
31	TBAL	O	Tracking balance adjustment output
32	FE	I	Focus error signal input (analog input)
33	TE	I	Tracking error signal input (analog input)
34	RFENV	I	RF envelope signal input
35	VDET	I	Vibration detection signal input ("H": detection)

36	OFT	I	Off-track signal input ("H": off track)
37	TRCRS	I	Track cross signal input
38	/RFDET	I	RF detection signal input ("L": detection)
39	BDO	I	Dropout signal input ("H": Dropout)
40	LDON	O	Laser on signal output ("H": ON)
41	PLL2	I/O	PLL Loop filter Characteristic switching terminal
42	TOFS	O	Tracking Offset alignment output/DSL Balance Output (DA Output)
43	WVEL	O	Double speed status signal output ("H": Double speed)
44	ARF	I	RF signal input
45	IREF	I	Reference current input
46	DRF	I	DSL bias terminal
47	DSL2	I/O	DSL loop filter terminal
48	PLL2	I/O	PLL loop filter terminal
49	VCOF	I/O	VCO loop filter terminal
50	AVDD2	I	Power supply input (for analog circuit)
51	AVSS2	I	Gnd (for analog circuit)
52	EFM	O	EFM signal output
53	PCK	O	PLL extraction clock output (fPCK = 4.321MHz during normal playback)
54	VCOF2	I/O	VCO Loop filter for 33.8688MHz conversion terminal for 16.9344MHz crystal mode, must use other circuit
55	SUBC	O	Sub-code serial data output
56	SBCK	I	Clock input for sub-code serial data
57	VSS	I	Gnd
58	X1	I	Crystal oscillating circuit input (f = 16.9344MHz)
59	X2	O	Crystal oscillating circuit output (f = 16.9344MHz)
60	VDD	I	Power supply input (for oscillating circuit)
61	BYTCK	O	Byte clock output
62	/CLDCK	O	Sub-code frame clock signal output (fCLDCK = 7.35kHz during normal playback)
63	FCLK	O	Crystal frame clock signal output (fCLK = 7.35 kHz, double = 14.7 kHz)
64	IPFLAG	O	Interpolation flag output ("H": Interpolation)
65	FLAG	O	Flag output
66	CLVS	O	Spindle servo phase synchronizing signal output ("H": CLV, "L": rough servo)
67	CRC	O	Sub-code CRC checked output ("H": OK, "L": NG)
68	DEMPH	O	De-emphasis ON signal output ("H": ON)
69	RESY	O	Frame re-synchronizing signal output
70	IOSEL	I	Mode Switching Terminal
71	/TEST	I	Test input
72	AVDD1	I	Power supply input (for analog circuit)
73	OUTL	O	Left channel audio signal output
74	AVSS1	I	Gnd

75	OUTR	O	Right channel audio signal output
76	RSEL	I	RF signal polarity assignment input (at "H" level: RSEL = "H") (at "L" level: RSEL = "L")
77	VCC5V	I	5V Supply
78	PSEL	I	Test terminal (connected to Gnd)

• IC801 (MN101C38CRB3) MICROPROCESSOR

Pin No.	Mark	I/O	Function

137	XTW26+10S	SUB-CHASSIS SCREW	[M]
138	XYC2+JF17	PCB EARTH SCREW	[M]
139	RFKJXED70-K	CHASSIS ASS'Y	[M]

27 Replacement Parts List

Notes:

- Important safety notice:

Components identified by Δ mark have special characteristics important for safety.

Furthermore, special parts which have purposes of fire-retardant (resistors), high-quality sound (capacitors), low-noise (resistors), etc. are used.

When replacing any of components, be sure to use only manufacturers's specified parts shown in the parts list.

- The parenthesized indications in the Remarks column specify the areas and/or colour. (Refer to the cover page for area and colour.)

Parts without these indications can be used for all areas.

- [M] indicates parts that are supplied by **MESA**.

- Warning: This product uses a laser diode. Refer to 3)Precaution of Laser Diode of P.3

ACHTUNG: Die Lasereinheit nicht zerlegen.

Die Lasereinheit darf nur gegen eine vom Hersteller spezifizierte Einheit ausgetauscht werden.

28 Resistor & Capacitors

Notes:

- Important safety notice:

Components identified by \triangle mark have special characteristics important for safety.

Furthermore, special parts which have purposes of fire-retardant (resistors), high-quality sound (capacitors), low-noise (resistors), etc. are used.

When replacing any of components, be sure to use only manufacturer's specified parts shown in the parts list.

- The parenthesized in the Remarks columns specify the areas. (Refer to the cover page for area.)
- [M] in Remarks column indicates parts that are supplied by MESA.
- Capacitor values are in microfarad (μF) unless specified otherwise, P=Pico-farads(pF); F=Farad(F).
- Resistors values are in ohms, unless specified otherwise, 1K=1,000(ohms); 1M=1,000K(ohms)

29 Packing Materials & Accessories

Notes:

- Important safety notice:

Components identified by Δ mark have special characteristics important for safety.

Furthermore, special parts which have purposes of fire-retardant (resistors), high-quality sound (capacitors), low-noise (resistors), etc. are used.

When replacing any of components, be sure to use only manufacturers's specified parts shown in the parts list.

- The parenthesized indications in the Remarks column specify the areas and/or colour. (Refer to the cover page for area and colour.)
- Parts without these indications can be used for all areas.
- The "(SF)" mark denotes the standard part.
- [M] in the Remarks columns indicates parts are supplied by **MESA**.
- Remote Control Unit: Supply period for three years from terminal of production.
