Abbreviations & Acronyms

A	
ADC	Analog to Digital Converter
AFC	Automatic Frequency Control: control signal used to tune to the correct frequency
B	
BenQ	BenQ Corporation
BTSC	Broadcast Television System Committee
C	
CPU	Central Process Unit
CVBS	Composite Video Blanking and Synchronization
D	
DLP	Digital Light Processing / Texas Instruments®
DMD	Digital Micro mirror Device
DRAM	Dynamic RAM
DVI	Digital Visual Interface
DVI-D	Digital Visual Interface-digital
DVI-I	Digital Visual Interface-Integrated
E	
EEPROM	Electrically Erasable and Programmable Read Only Memory
F	
FLASH	FLASH memory
G	
G-TXT	Green Teletext
H	
HDMI	High Definition Multimedia Interface, digital audio and video interface
HP	Head Phone
I	
I ² C	Integrated IC bus
L	
LED	Light Emitting Diode
LVDS	Low Voltage Differential Signal, data transmission system for high
M	
MOSFET	Metal Oxide Semiconductor Field Effect Transistor
N	

NC	Not Connected
NVM	Non Volatile Memory: IC containing TV related data (for example, options)
O	
OSD	On Screen Display
P	
PC	Personal Computer
PCB	Printed Circuit Board (or PWB)
R	
RC	Remote Control transmitter
RGB	Red, Green and Blue. The primary color signals for TV. By mixing levels of R, G and B, all colors (Y/C) are
ROM	Read Only Memory
S	
SDA	Data signal on I ² C bus
SDRAM	Synchronous DRAM
SW	Sub Woofer / Software
T	
THD	Total Harmonic Distortion
V	
VGA	Video Graphics Array
Y	
YPbPr	Component video (Y= Luminance, Pb / Pr= Color difference signals B-Y and R-Y, other amplitudes w.r.t. to YUV)
Y/C	Video related signals: Y consists of luminance signal, blanking level and sync; C consists of color signal.

1. About this Manual

The purpose of Service Manual is to provide a guide line to engineers to repair different models. The appearance and capability is introduced in this Service Manual. It is better for repair engineer to have a rough idea of this model through reading the Service Manual. Please do pay attention to the item part of the disassembly when repair the machine and also do the protection of panel any time. When repairing the circuit board, please follow the requirement of RoHS and refer to the circuit diagram and repairing process that attached in the Service Manual. The method of firmware updated, the way of using the menu and some information that may be used when repairing are also attached in the Service Manual that provide repair engineer various choice.

1.1 Important

Only trained service personnel who are familiar with this BenQ Product shall perform service or maintenance to it. Before performing any maintenance or service, the engineer MUST read the “Important Safety Information”.

1.2 Trademark

2. Introduction

This section contains general service information, please read through carefully. It should be stored for easy access place.

2.1 RoHS (2002/95/EC) Requirements – Applied to all countries require RoHS.

The RoHS (Restriction of Hazardous Substance in Electrical and Electronic Equipment Directive) is a legal requirement by EU (European Union) for the global electronics industry which sold in EU and some counties also require this requirement. Any electrical and electronics products launched in the market after June 2006 should meet this RoHS requirements. Products launched in the market before June 2006 are not required to compliant with RoHS parts. If the original parts are not RoHS complaints, the replacement parts can be non ROHS complaints, but if the original parts are RoHS compliant, the replacement parts MUST be RoHS complaints. If the product service or maintenance require replacing any parts, please confirming the RoHS requirement before replace them.

2.2 Safety Warning and Notice

Installation

1. Do not use your monitor under any of the following environmental conditions:
 - Extremely high or low temperature, or in direct sunlight
 - Dusty places
 - Highly humid, exposed to rain, or close to water
 - Exposed to vibrations or impacts in places such as cars, buses, trains, and other rail vehicles
 - Near heating appliances such as radiators, heaters, fuel stoves, and other heat-generating items (including audio amplifiers)
 - An enclosed place (such as a closet or bookcase) without appropriate ventilation
 - An uneven or sloping surface
 - Exposed to chemical substances or smoke
2. Do not block vents and openings by clothes or curtains.
3. Carry the monitor carefully.
4. Do not place the monitor face down on the floor or a desk surface directly. Otherwise, scratches on the panel surface may occur.
5. Do not place heavy loads on the monitor to avoid possible personal injury or damage to the monitor.
6. Ensure that children do not hang or climb onto the monitor.
7. Keep all packing bags out of reach of children.

Operation

1. To protect your eyesight, please refer to the user manual to set the optimal screen resolution and the viewing distance.
2. To reduce eye fatigue, take a break on a regular basis while using the monitor.
Avoid taking either one of the following actions for a long time. Otherwise, burn marks may occur.
 - Use the monitor in the aspect ratio of 16:9.
 - Place a still image (such as an OSD menu, fixed text or image) on the screen.
3. To avoid possible damage to the monitor, do not touch the monitor panel by hand, pen, or any other sharp objects.
4. Excessively frequent plug and unplug of video connectors (D-sub) may cause damage to the monitor.
5. This monitor is designed mainly for personal use. If you want to use the monitor in a public place or a harsh environment, contact your nearest BenQ service center for assistance.
6. To avoid possible electric shock, do not disassemble or repair the monitor.
7. If a bad smell or an abnormal sound appears to come from the monitor, contact your nearest BenQ service center for assistance immediately.

Cleaning

1. Ensure that the power is unplugged before cleaning your monitor
2. Use a monitor cleaner and a soft cloth to clean your monitor.
3. Do not use solvents such as alcohol to clean your monitor.

Power

1. To avoid possible damage to the monitor, do not use it in a region where power supply is unstable.
2. Ensure that the power cord is connected to a grounded power outlet before turning on the monitor.
3. Use only the power cord provided by BenQ.
4. Never use a power cord that appears to be damaged or frayed.
5. To avoid possible danger, observe the total electric load when using the monitor with a (multi-outlet) extension cord.
6. Always turn off the monitor before unplugging the power cord.

2.3 Compliance Statement

Caution: This Optical Storage Product contains a Laser device. Refer to the product specifications and your local Laser Safety Compliance Requirements.

3. General Description

This new LCD (Liquid Crystal Display) monitor BenQ GL950A/GL950AM/G950A/G950AM offers numerous features and functions, for example:

- Panel Type: TN + LED (GL950A/GL950AM)
- Panel Type: TN + CCFL (G950A/G950AM)
- Minimal space requirements thanks to slim casing
- Contrast ratio 12 million:1 (DCR), brightness 250nits (GL950A/GL950AM)
- Contrast ratio 50000:1 (DCR), brightness 200nits (G950A/G950AM)
- MAX. resolution: 1366X768
- Viewing Angle (H/V), $CR \geq 10$: 170/160 (GL950A/GL950AM)
- Viewing Angle (H/V), $CR \geq 10$: 90/65 (G950A/G950AM)
- Presentation of up to 16.7 M colors (in conjunction with an appropriate graphics card)
- Automatic scanning of horizontal frequencies from 30 to 83 kHz and refresh rates (vertical frequencies) from 50 to 76 Hz (absolutely flicker-free)
- Digital screen controller with microprocessor for storing 15 different display modes
- Freely adjustable color alignment for matching the screen colors to the colors of various input and output devices
- Convenient operation via integrated OSD (On-Screen-Display) menu
- VESA-DDC compatibility
- Plug & play capability
- Power management for reducing power consumption when the computer is not in use

This operating manual contains important information you require to start up and run your LCD monitor.

This specification defines the requirements for the 18.5" MICROPROCESSOR based Multi-mode supported high resolution color LCD monitor. This monitor can be directly connected to general 15-pin VGA connector and supports VESA DPMS power management and plug & play function.

Additional information

Due to the nature of liquid crystal display (LCD) technology, the picture resolution is always fixed. For the best display performance, please set the display resolution to 1366X768 pixels with an aspect ratio of 16:9. This is called "Native Resolution" or maximal resolution - that is, the clearest picture. Lower resolutions are displayed on a full screen through an interpolation circuit. Image blurring across pixel boundaries can occur with the interpolated resolution depending upon the image type and its initial resolution.

4. Related service information

This Service Manual contains general information. There are 2 levels of service:

Level 1: Cosmetic / Appearance / Alignment Service

Level 2: Circuit Board or Standard Parts Replacement

5.2 Panel Inspection Specification

1 Scope:

1.1 The incoming inspection standards shall be applied to TFT-LCD Modules (hereinafter called "Modules") that supplied by AU Optronics Corporation (hereinafter called "seller").

1.2 Specifications contains

- _ Electrical inspection specification
- _ Appearance specification
- _ Outside dimension specification

2 Incoming inspections:

The buyer (customer) shall inspect the modules within twenty calendar days of the delivery date (the "inspection period") at its own cost. The results of the inspection (acceptance or rejection) shall be recorded in writing, and a copy of this writing will be promptly sent to the seller.

The buyer may, under commercially reasonable reject procedures, reject an entire lot in the delivery involved if, within the inspection period, such samples of modules within such lot show an unacceptable number of defects in accordance with this incoming inspection standards, provided however that the buyer must notify the seller in writing of any such rejection promptly, and not later than within three business days of the end of the inspection period. Should the buyer fail to notify the seller within the inspection period, the buyer's right to reject the modules shall be lapsed and the modules shall be deemed to have been accepted by the buyer.

3 Inspection sampling method:

Unless otherwise agree in writing, the method of incoming inspection shall be based on MIL-STD-105E.

3.1 Lot size: Quantity per shipment lot per model.

3.2 Sampling type: Normal inspection, single sampling.

3.3 Sampling level: Level II.

3.4 Acceptable quality level (AQL):

Major defect: AQL=1.0%

Minor defect: AQL=2.5%

4 Inspection instruments:

4.1 Pattern generator: LD-2000 or equivalent model.

4.2 Video board: AUO video board or equivalent. The output of the signal should comply with the specification provided by AUO.

4.3 Luminance colorimeter: Topcon BM-7 or equivalent model.

5 Inspection environment conditions:

5.1 Room temperature: 20 ~ 25°C.

5.2 Humidity: 65±5% RH.

5.3 Illumination: Fluorescent light (Day-Light Type) display surface illumination to be 300 ~ 700 Lux. (standard 500Lux.)

5.4 To be a distance about 35±5 cm in front of LCD unit, viewing line should be perpendicular to the surface of the module judge the visual appearance with human's eyes (±30° viewing edge will be allowed).

5.5 Take off the protector of polarizer while judging the display area.

5.6 If there is any question while judging, check the panel again while operating.

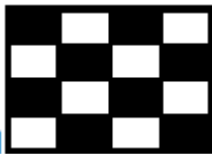

6 Classification of defects:

Defects are classified as major defects and minor defects according to the degree of defectiveness defined herein.

Major defects: A major defect is a defect that is likely to result in failure, or to reduce materially the usability of the product for its intended purpose.

Minor defects: A minor defect either is a defect that is not likely to reduce materially the usability of the product for its intended purpose, or is a departure from an established having little bearing on the effective use or operation of the product.

6.1 Electrical inspection specification

	Inspection Item	Specification	
1	Line / Block defect	Can't be seen.	
2	Bright dots	≤ 2 dots (Note1, 4)	
3	Dark dots	≤ 3 dots	
4	Total dots defect	≤ 5 dots	
5	Adjacent dot defect (Note 1, 2, 3)	Two continuous bright dots (vertical, horizontal, oblique):	≤ 1 pairs
		Three or more continuous bright dots (vertical, horizontal, oblique):	NA
		Two continuous dark dots (vertical, horizontal, oblique):	≤ 1 pairs
		Three or more continuous dark dots (vertical, horizontal, oblique):	NA
		Distance between 2 Bright dots:	≥ 15 mm
		Distance between 2 Dark dots:	≥ 15 mm
		Distance between Bright and Dark dot:	≥ 15 mm
6	Image Sticking / Retention	<p>Short time (retention): Can't be visible by ND 8%, after changing pattern, the previous pattern shall be invisible (disappear) within 5 seconds.</p> <p>Long time (sticking): Turn on the panel and display with the test pattern (4X4 black & white, Figure 1) for 8 hours. After 8 hr, change display pattern to 50% gray pattern. After 5 min, use 8% ND Filter at 50% Gray Pattern, under 0° viewing angle, the Image Sticking Symptom must be invisible.</p> <div style="text-align: center;">  →  </div> <p>Figure 1 Figure 2</p>	
7	Display Non-uniformity	Not noticeable by using of ND filter or judged by equivalent limit sample (Note 5, 6)	
8	Newton ring	Not noticeable	
9	Rubbing mark	Not noticeable	
10	Dim line	Not noticeable	

Note 1: For bright dot defect, bright area should be larger than 1/2 area of a sub-pixel to be count as 1 dot defect. A dot defect that is smaller than the defined dot defect will be treated as small bright dot.

The drawing of 1/2 area sub-pixel definition: The 1/2 area sub-pixel can be defined as below one or more of specific shapes (Fig.1).

Fig.1

Fig.2

All bright dot defects should not be noticeable by observer under specified inspection environment (Please refer to item 5).

Note 2: (Fig.2) Adjacent-dot defect (refer to picture, dot 1,2,...,8 around A are all A's adjacent dots) should be inspected under the same display pattern in any one of White /Black /Red /Green /Blue /Monotone Gray pattern.

Note 3: Adjacent-dot defect should be observed under any one of White /Black /Red /Green /Blue pattern. 1 pair of bright dots equals 2 dots. Inspection patterns: Standard inspection patterns of dot defect are listed below. AUO uses these patterns as standard criteria for judging dot defect. Please inform AUO if any other pattern is to be used to examine dot defect.

Test Pattern	Defect
Full Black	For bright dot(s)
Full White	For dark dot(s)
Monotone Red /Green /Blue	For bright and dark dot(s)

Note 4: The judgment criteria of particle occurred bright dot is the same as bright dot judgment criteria.

Note 5: The display uniformity (general more) symptoms will use 8% ND Filter. That is, the definition of Not Noticeable means the symptom can be covered by 8% ND Filter.

Note 6: The inspection method of ND Filter - holding ND filter in front of the panel around 1 cm and examine the panel from 35±5 cm in the front view for 3 seconds.

6.2 Appearance inspection specification

Judge area	Judge item		Inspection specification			Judge criterion	
						Major	Minor
Active Area	Particles, scratch and bubbles in display area (Note 1, 2, 3)	Round	Average diameter :(mm)		Numbers		○
			D<0.15		Disregarded		
			0.15≤D≤0.5		N≤4		
			0.5<D		N=0		
		Liner	Width: W (mm)	Length: L (mm)	Numbers		○
			0.05≤W≤0.1	L≤5	N≤5		
	Defect					○	
	Dirt		Eyes should not find it.			○	
	Grains					○	
	Glass broken		No (Note 3)			○	
	Bubble in cell (Active area)		Eyes should not find it.			○	
From active area outside	The end of polarizer		The edge of polarizer can't be seen. 1.7mm (Min)				○
Bezel	Scratch		No harm				○
	Dirt						○
	Wrap		No dangerous			○	
	Sunken		No harm			○	
Label (S/N, B/L, Week code)	No label		No			○	
	Invert label					○	
	Broken					○	
	Dirt		Word can be read.			○	
	Not clear						○
	Word out of shape						○
	Mistake		No				○
	Position		Be attached on right position				○
Solder	Appearance		Can't see the abnormal color, shape, hurt, dirt (fused goods, etc.). If it is necessary, please prepare sample.			○	
Screw	Not enough		No			○	
	Limp		No			○	
White sheet	Shell, rub		No			○	
Connector	Connection status		Need correct connection.			○	
FPC/FFC	Broken		No			○	
BM area	Around Red Line		No concern				○

Note 1: When $L \geq 2W$, defect count as liner defect.

Note 2: $D = 1/2(W+L)$

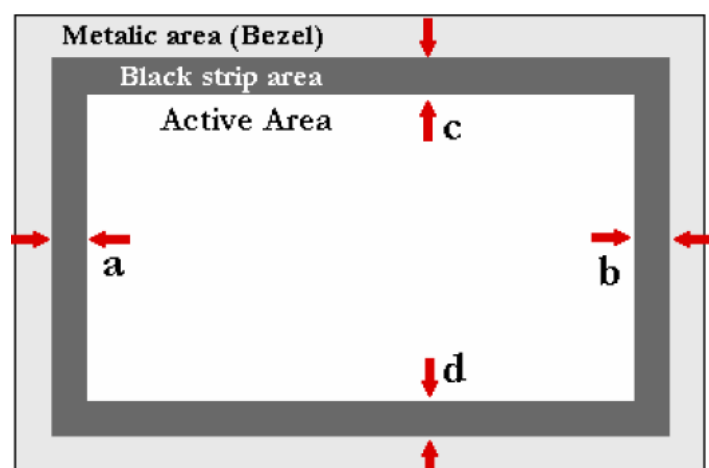

Note 3: To verify the responsibility of following defects was caused by supplier, the IQC checks as requested on above items before mass production such as the Polarizer Scratch, Gap Mura, TFT Glass broken...etc.

6.3 Outside dimension specification:

Testing Order	Inspection Item		Specification	Note
	Name	Unit	Tolerance	
1	Outside dimension (vertical)	mm	± 0.5 mm	(Please refer to the product spec for detailed dimension definition) Note 1
2	Outside dimension (horizontal)	mm	± 0.5 mm	
3	Outside dimension (thickness)	mm	± 0.5 mm	
4	Weight	g	± 50 g	
5	Display tolerance ABS (a-b)	mm	1.0 mm (Max.)	Note 2
6	Display tolerance ABS (c-d)	mm	1.0 mm (Max.)	Note 2
7	Panel gap (Y)	mm	0.8 mm (Max.)	Note 3

Note 1: Thickness doesn't include bending reason.

Note 2: Display tolerance definition

Note 3: Panel gap (Y) definition

7 Inspection judgments:

7.1 The judgments of the shipped lot (acceptance or rejection) should follow the sampling plan of MIL-STD-105E, single sampling, normal inspection, level II.

7.2 If the number of defects is equal to or less than the applicable acceptance level, the lot shall be accepted.

7.3 If the number of defects is more than the applicable acceptance level, the lot shall be rejected and the buyer should inform the seller of the result of incoming inspection in writing

8 Precautions:

Please pay attention to the following items when you use the LCD Module with back-light unit.

8.1 Do not twist or bend the module and prevent the unsuitable external force for display module during assembly.

8.2 Adopt measures for good heat radiation. Be sure to use the module within the specified temperature.

- 8.3 Avoid dust or oil mist during assembly.
- 8.4 Follow the correct power sequence while operating. Do not apply the invalid signal, otherwise, it will cause improper shut down and damage the module.
- 8.5 Less EMI: it will be more safety and less noise.
- 8.6 Please operate module in suitable temperature. The response time & brightness will drift by different temperature.
- 8.7 Avoid displaying a fixed pattern (exclude the white pattern) for a long period, which may lead to image sticking.
- 8.8 Be sure to turn off the power when connecting or disconnecting the circuit.
- 8.9 Polarizer scratches easily, please handle it carefully.
- 8.10 Display surface never likes dirt or stains.
- 8.11 A dewdrop may lead to destruction. Please wipe off any moisture before using module.
- 8.12 Sudden temperature changes cause condensation, and it will cause polarizer damaged.
- 8.13 High temperature and humidity may degrade performance. Please do not expose the module to the direct sunlight and so on.
- 8.14 Acetic acid or chlorine compounds are not friends with TFT display module.
- 8.15 Static electricity will damage the modules; please do not touch the module without any grounded device.
- 8.16 No parts of the panel should be dismantled without the presence of AU engineer or the product will not be warranted.
- 8.17 Be careful do not touch the rear side directly because of the backlight high voltage.
- 8.18 No strong vibration or shock. It will cause module broken.
- 8.19 Storage the modules in suitable environment with regular packing.
- 8.20 Be careful of injury from a broken display module. Please avoid the pressure adding to the surface (front or rear side) of modules, because it will cause the display non-uniformity or other function issue.

Level 1 Cosmetic / Appearance / Alignment Service

Visual Inspection & Cleaning

- Cleaning. Always unplug your monitor from the wall outlet before cleaning. Clean the LCD monitor surface with a lint-free, non-abrasive cloth. Avoid using any liquid, aerosol or glass cleaners.
- Slots and openings on the back or top of the cabinet are for ventilation. They must not be blocked or covered. Your monitor should never be placed near or over a radiator or heat source, or in a built-in installation unless proper ventilation is provided.
- Never push objects or spill liquid of any kind into this product.

F/W Upgrade SOP

1. Materials list

ISP JIG: 715GT089-B/C

VGA cable

PC

TPV P/N: 089G728 GAA DB

Monitor

USB cable

TPV P/N: 089G1758 X

FTC100103(MSTAR) usb
drive.rar

USB port driver

ISP_Tool.exe

ISP tool: V4.5.0.8.0

BenQ-GL950AM-TSUM...

New F/W

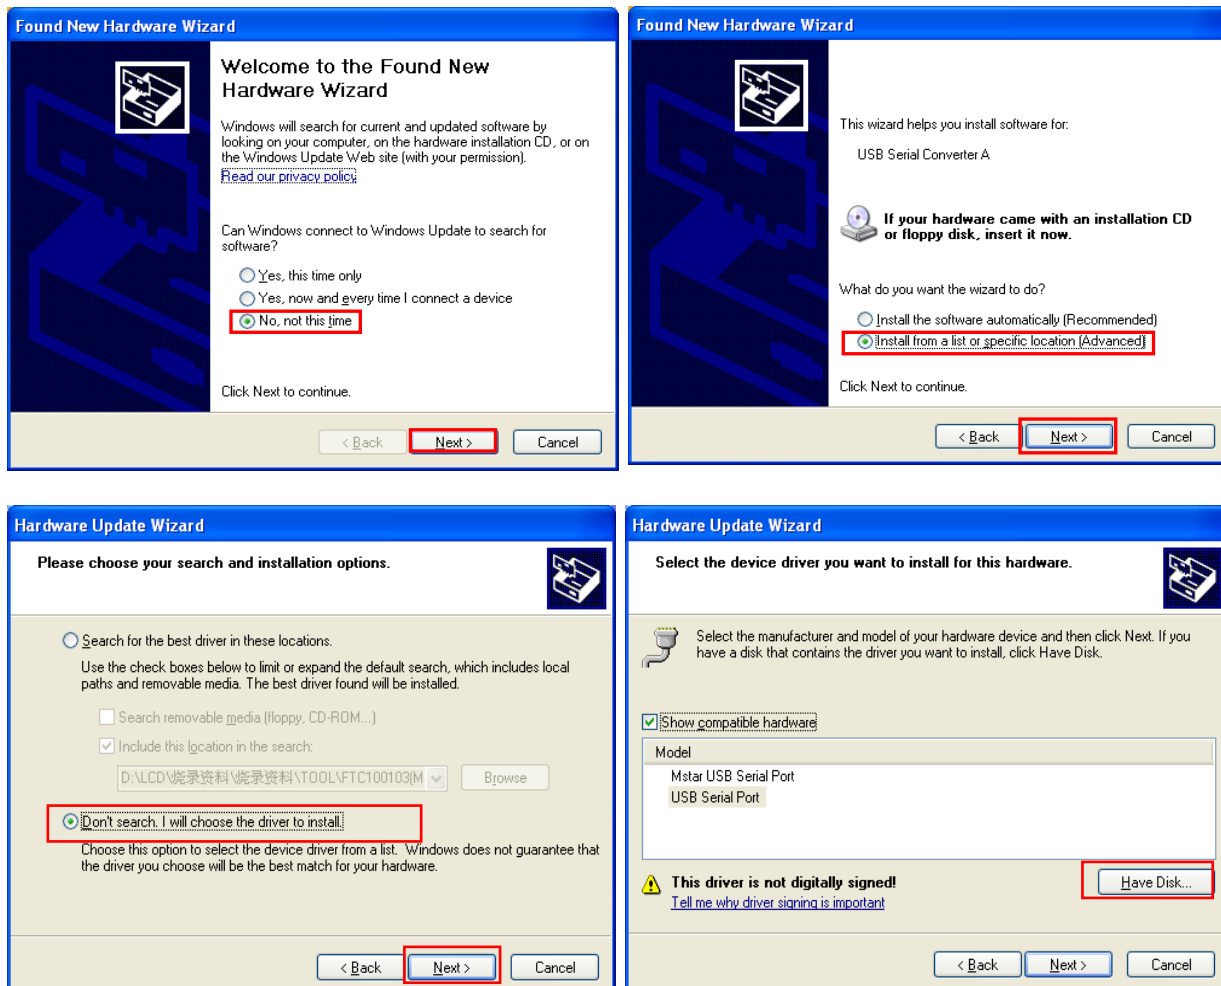

2.Connection

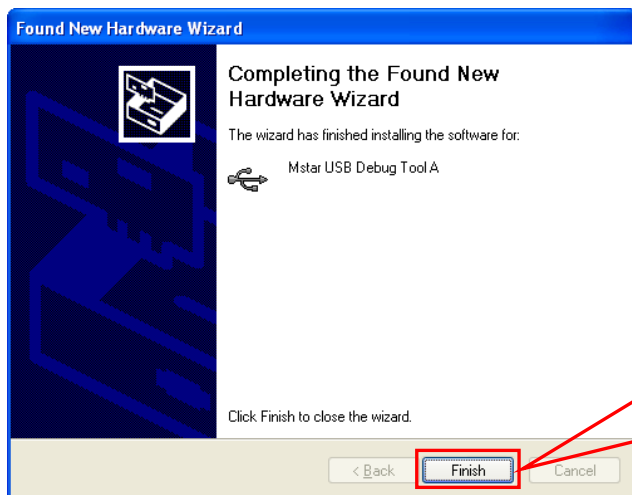

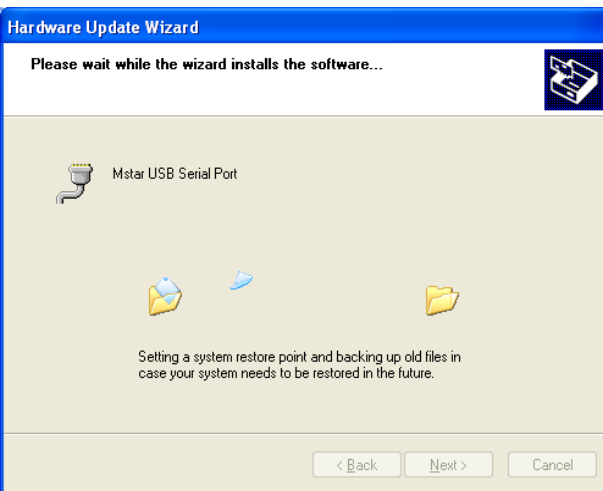

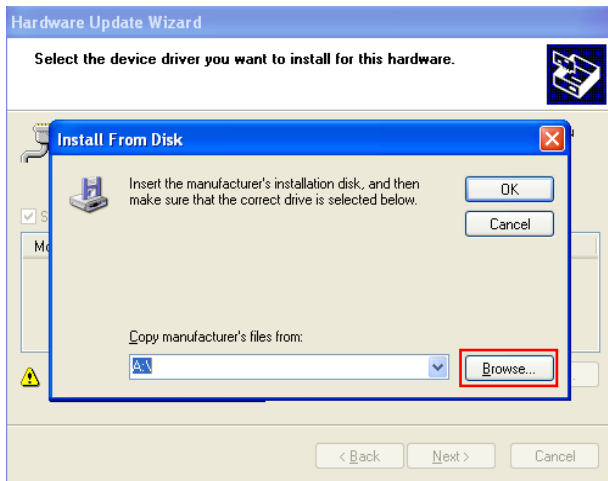

3.Install USB driver.

3.1. When insert the USB cable to PC USB port, will pop up a Hardware Wizard to help you install the USB driver if you use this ISP board first time. You can install it successfully as the below instruction step by step.

Remark: The USB driver files path: D:\FTC100103(Mstar)\FTCUSB.INF

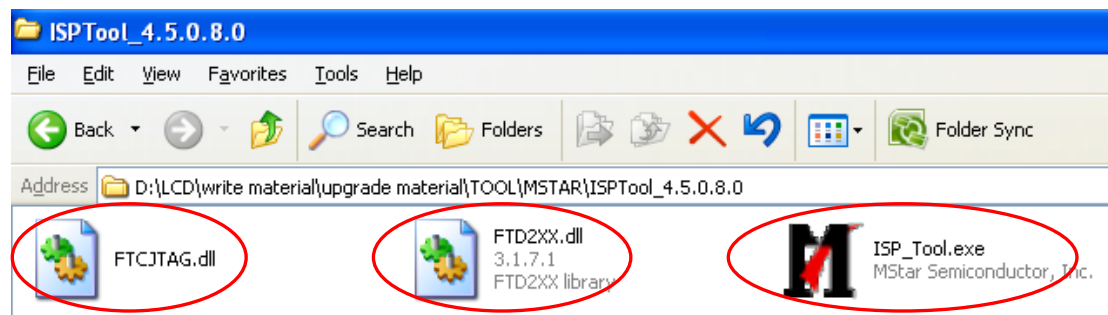

Click "Finish" to complete the USB serial port driver installation.

4. Install the ISP tool.

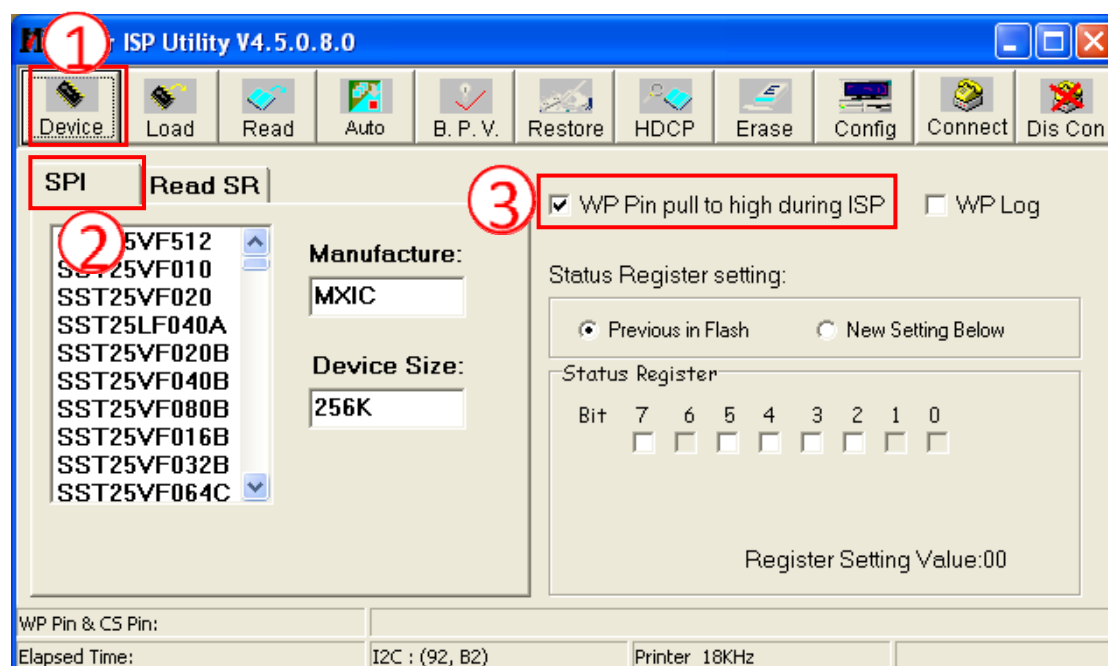

4.1. Copy the three files in one folder.

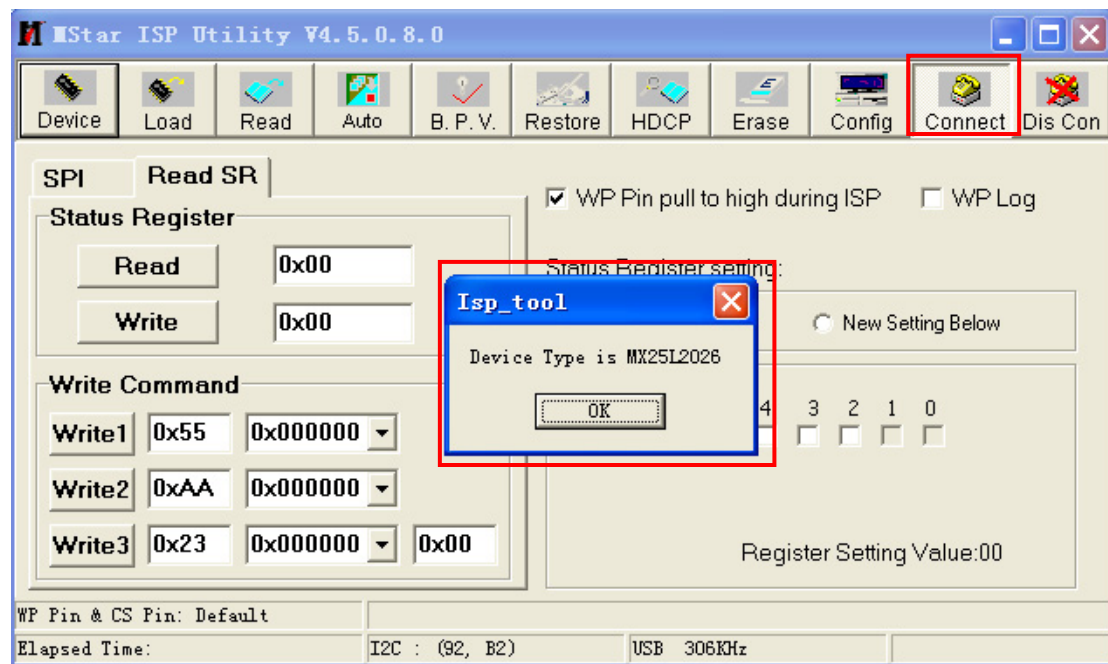

4.2. Double-click  to run the ISP tool.

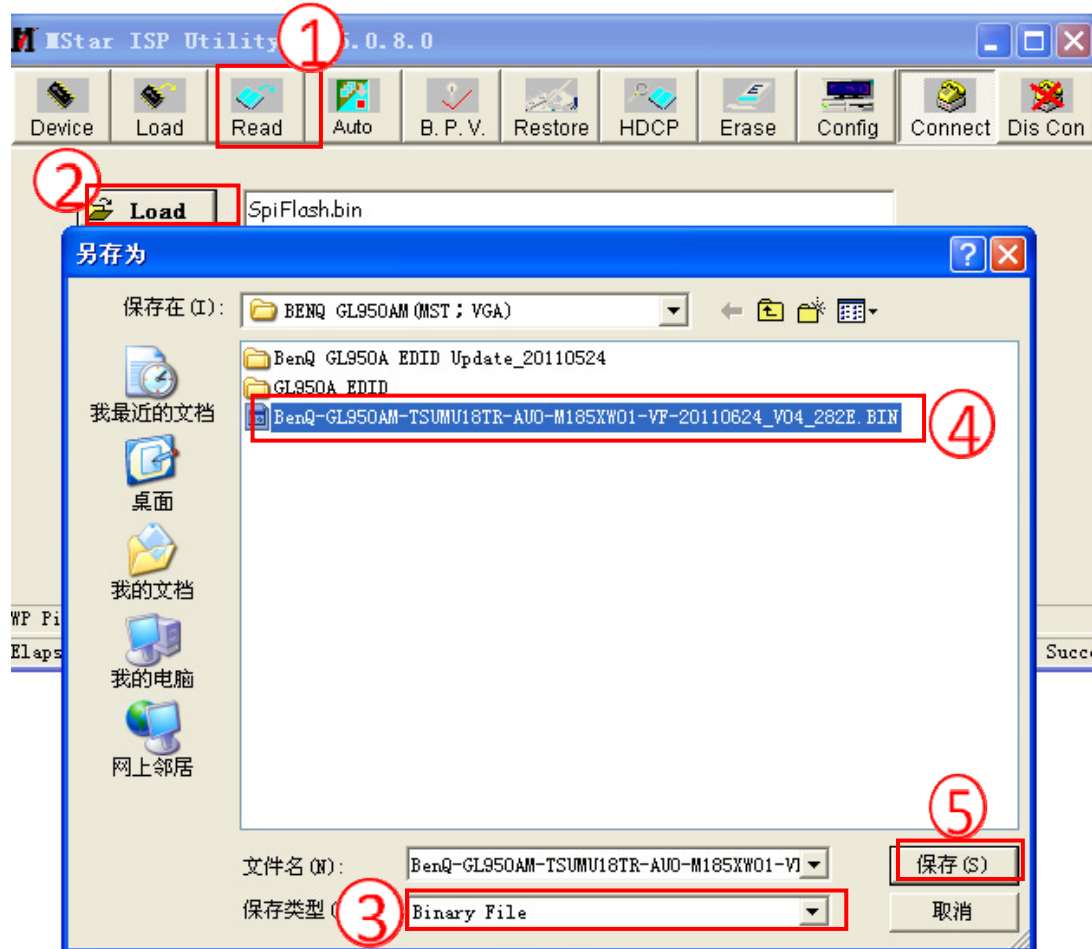

4.3. Set the parameters in “Device” window. Tick “WP Pin pull to high during ISP”.

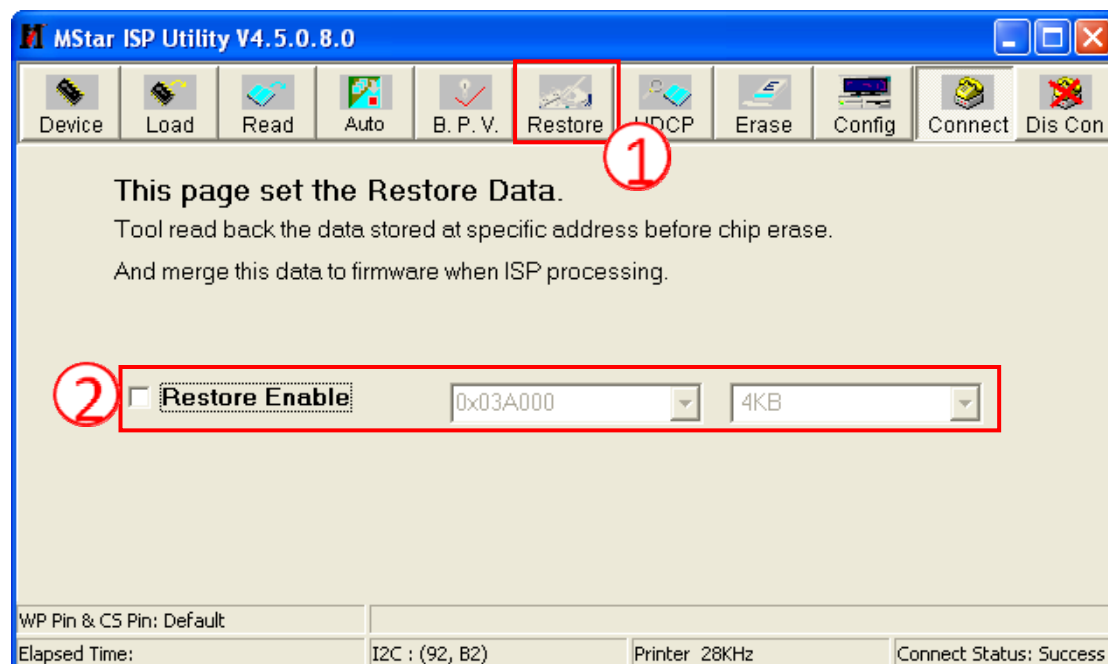

4.4. Connect to the monitor. Click “Connect”. If the tool communicate with monitor successfully, the tool will detect the flash type of monitor.

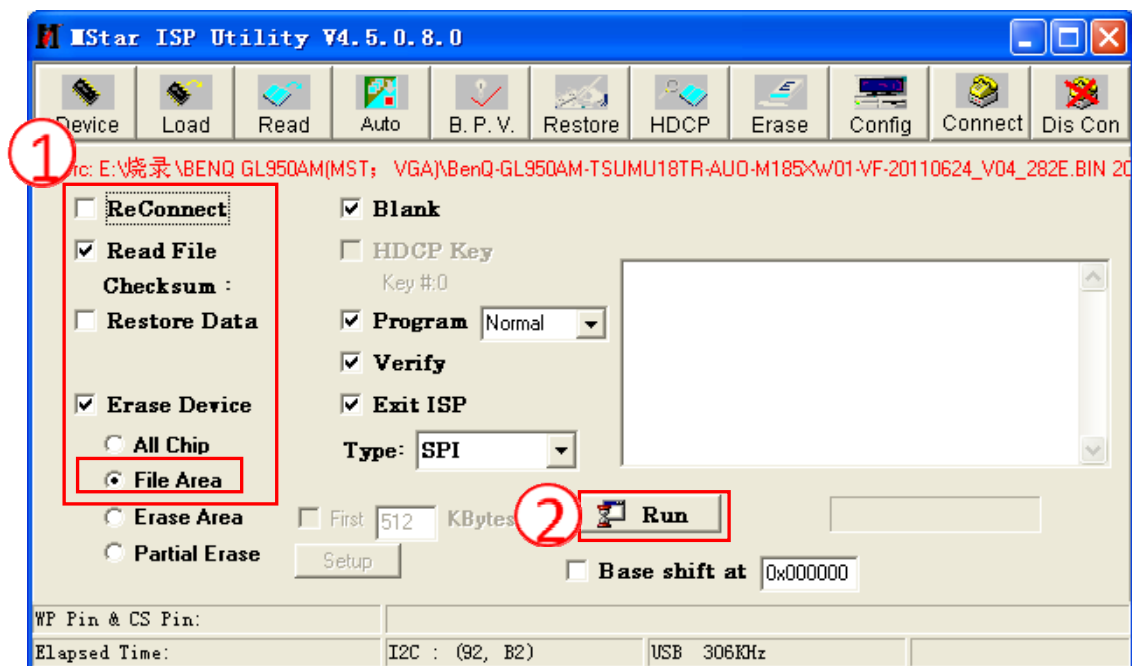

4.5. Load the F/W you want to upgrade.

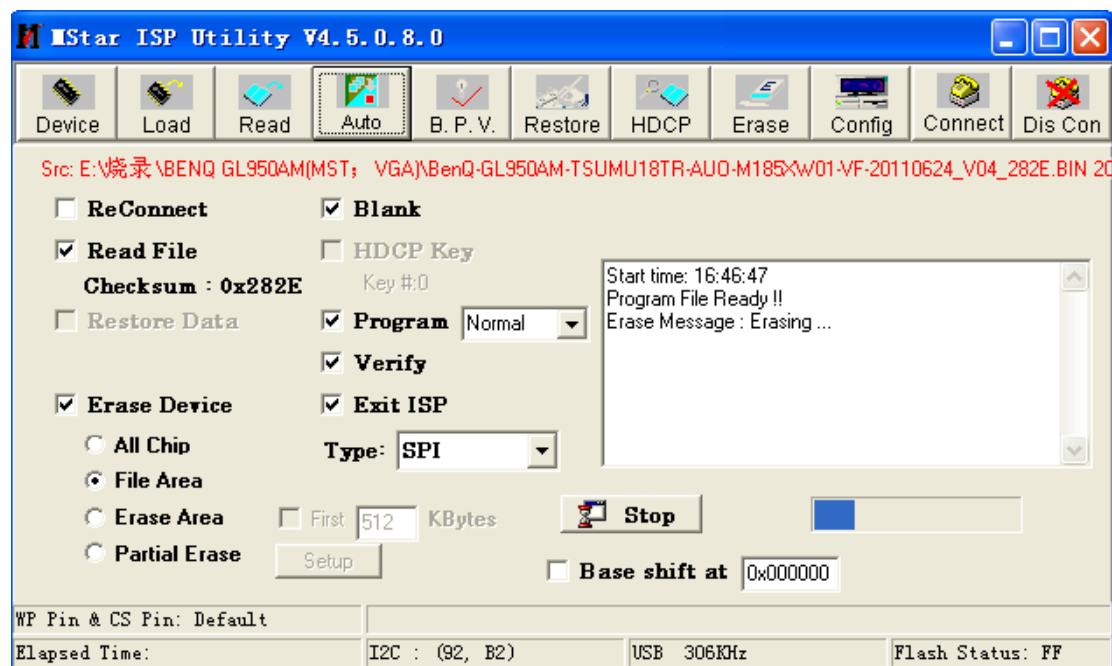

4.6. Set the restore address.

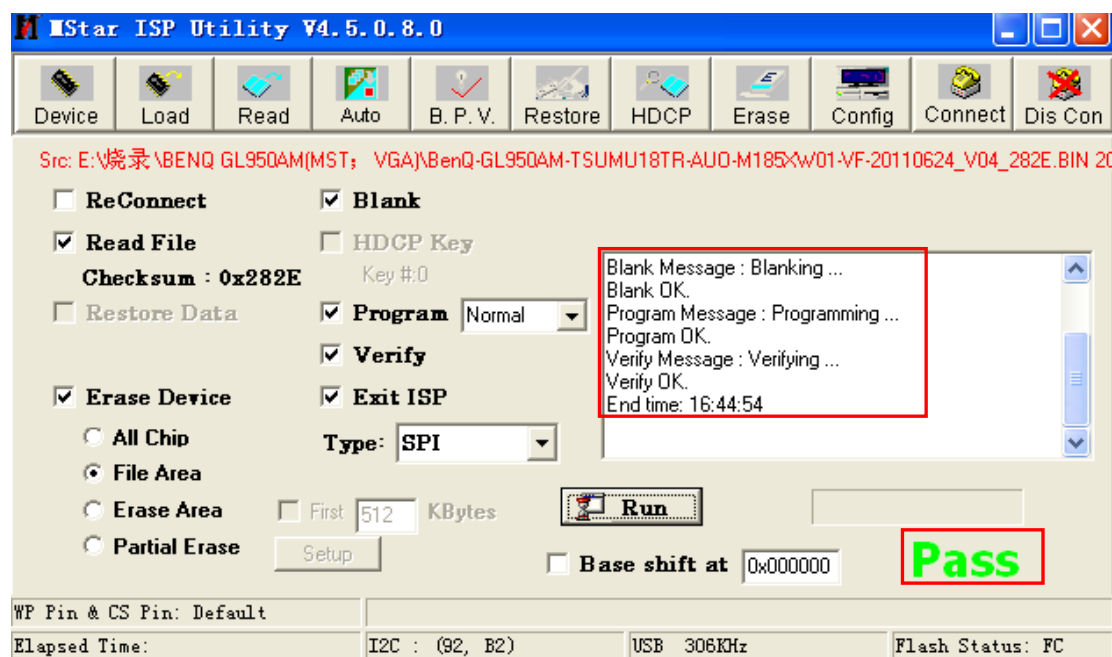

4.7. Set parameter in "Auto" window.

4.8.Processing of upgrade. After clicking “Run”, the tool start to program. It is forbidden to power off monitor or switch off connection during programming.

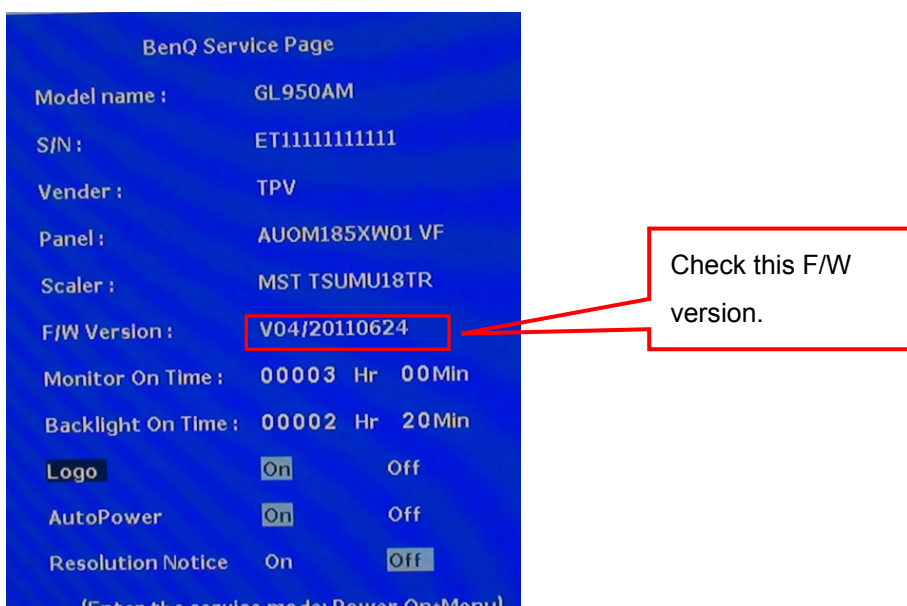

4.9.Successful upgrade. When upgrade successful, there will be green Pass letter appearing.

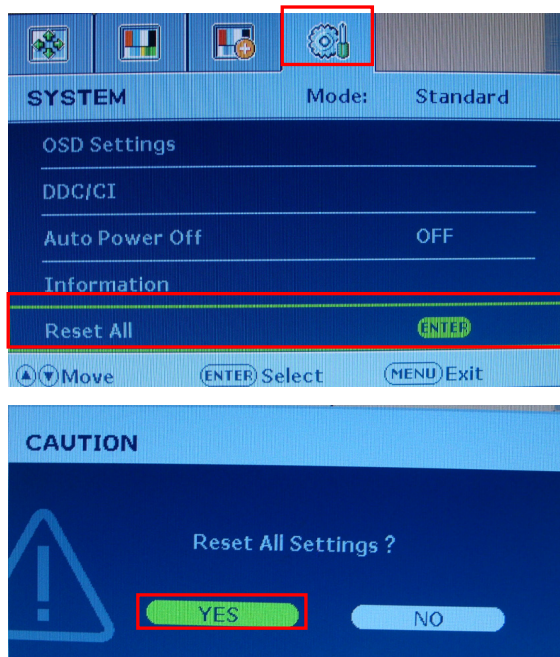

5. Check the FW version after upgrade.

- (1) Connect signal source and power cable to monitor and DC off it.
- (2) Press “menu” key and “power on” key synchronously as below figure. When the screen lights, release the two buttons and then press “menu” again to open below factory menu.

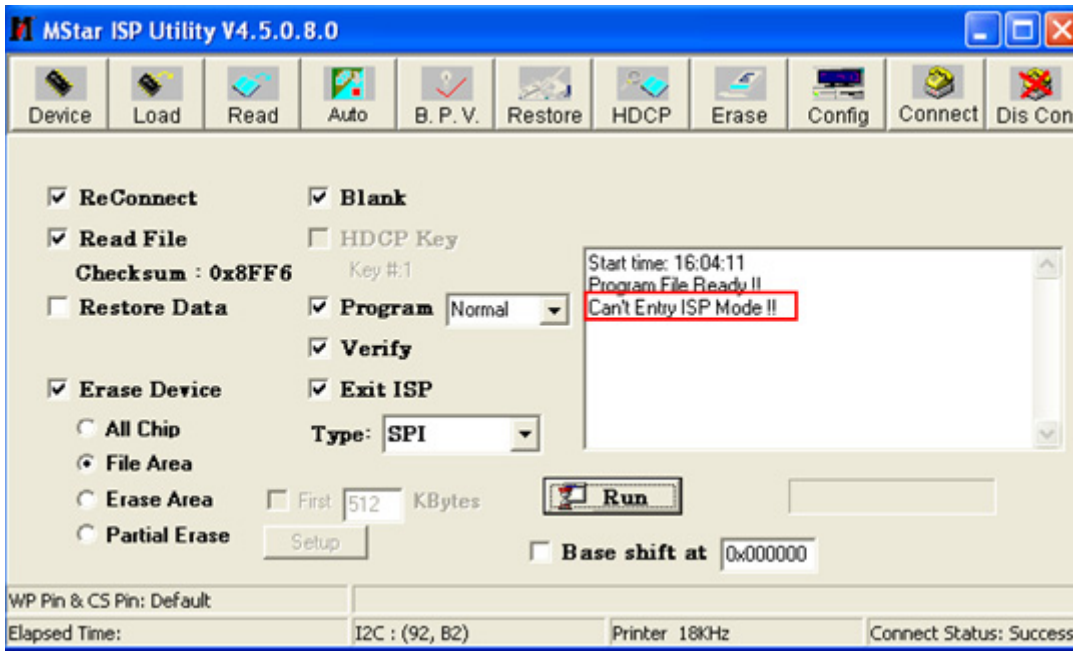

- (3) If the version is right, please do factory reset in user menu as below, or re-upgrade F/W as the above steps. The reset will turn off burn in mode.

6. Troubleshooting.

Can't Entry ISP Mode!!

- (1) Check the cables and ISP JIG are connected fluently.
- (2) Click the "Dis Con" and click "Connect" again.
- (3) AC off the monitor for a while and retry it.
- (4) Change ISP JIG or cable.
- (5) Change PC.

Adjustment / Alignment Procedure

The Control Panel

Note: The audio just for G950AM/GL950AM.

1. **AUTO**: Adjusts vertical position, phase, horizontal position and pixel clock automatically.
2. **MENU** key: Activates OSD main menu and return to the previous menu or exit OSD.
3. **▲/Display Mode** key (for G950A/GL950A): For Up/Increase adjustment. The key is the hot key for Display Mode.
▼/Volume key (for G950AM/GL950AM): For Up/Increase adjustment. The key is the hot key for Volume.
4. **▼/Mode** key: For Down/Decrease adjustment. The key is the hot key for Mode.
5. **ENTER** key: Enters sub menus and select items.
6. **Power**: Turns the power on or off.

OSD = On Screen Display.

The hot keys will display a graduated scale for adjusting the value of that setting, and will only operate while the OSD menu is not currently displaying. Hot key displays will disappear after a few seconds of no key activity.

Hot key mode

The monitor keys perform as hot keys to provide direct access to particular functions whenever the menu isn't currently displaying on-screen.

Display Mode hot key (for G950A/GL950A)

Press the **▲** key continually to switch between **Full** and **Aspect**. The setting will take effect immediately.

Volume hot key (for G950AM/GL950AM)

Press the ▲ key to display the **Volume** indicators. Further press the ▲ key will increase the volume, while the ▼ key will decrease the volume.

To Mute, press the Volume hot key for 3 seconds. To release Mute, press the Volume hot key for 3 more seconds.

Mode hot key

Press the ▼ key continually to switch between the 6 modes for the main window, including **Standard**, **Movie**, **Game**, **Photo**, **sRGB**, and **Eco**. The setting will take effect immediately.

Input hot key (not available for analog-only models)

Press the **ENTER** key to toggle between different PC video signal inputs that may be connected to your monitor. The setting will take effect immediately. The setting will take effect immediately. The setting will take effect immediately.

Main Menu Mode

You can use the OSD (On Screen Display) menu to adjust all the settings on your monitor. Available menu options may vary depending on the input sources, functions and settings. Menu options that are not available will become grayed out.

Press the **MENU** key to display the following main OSD menu.

Depending on your purchased model, different OSD menus are available.

1. Display
2. Picture
3. Picture Advanced
4. Audio (for G950AM/GL950AM)
5. System

Use the ▲ (up) or ▼ (down) keys to highlight a menu item, and press the **ENTER** key to enter the Menu item settings.

The OSD menu languages may differ from the product supplied to your region,

Display Menu

Available menu options may vary depending on the input sources, functions and settings. Menu options that are not available will become grayed out.

1. Press the **MENU** key to display the main menu.
2. Press the ▲ or ▼ keys to select **DISPLAY** and then press the **ENTER** key to enter the menu.
3. Press the ▲ or ▼ keys to move the highlight to a menu item and then press the **ENTER** key to select that item.
4. Press the ▲ or ▼ keys to make adjustments or selections.
5. To return to the previous menu, press the **MENU** button.

Item	Function	Operation	Range
Auto Adjustment	Optimizes and adjusts the screen settings automatically for you. The AUTO key is a 'hot key' for this function.	Press the ENTER key to select this option and make adjustment.	
H. Position	Adjusts the horizontal position of the screen image.	Press ▲ or ▼ keys to adjust the value.	0 to 100
V. Position	Adjusts the vertical position of the screen image.		0 to 100
Pixel Clock	Adjusts the pixel clock frequency timing to synchronize with the analog input video signal. Not applicable to a digital input signal.		0 to 100
Phase	Adjusts the pixel clock phase timing to synchronize with the analog input video signal. Not applicable to a digital input signal.		0 to 63

Picture Menu

Available menu options may vary depending on the input sources, functions and settings. Menu options that are not available will become grayed out.

1. Press the **MENU** key to display the main menu.
2. Press the **▲** or **▼** keys to select **PICTURE** and then press the **ENTER** key to enter the menu.
3. Press the **▲** or **▼** keys to move the highlight to a menu item and then press the **ENTER** key to select that item.
4. Press the **▲** or **▼** keys to make adjustments or selections.
5. To return to the previous menu, press the **MENU** button.

Item	Function	Operation	Range
Brightness	Adjusts the balance between light and dark shades.	Press the ▲ key to increase the brightness and press the ▼ key to decrease the brightness.	0 to 100
Contrast	Adjusts the degree of difference between darkness and lightness.	Press the ▲ key to increase the contrast and press the ▼ key to decrease the contrast.	0 to 100
Sharpness	Adjusts the clarity and visibility of the edges of the subjects in the image.	Press the ▲ key to improve the crispness of the display and press the ▼ key to have softness effect on the display.	1 to 5
Gamma	Adjusts the tone luminance. The default value is 3 (the standard value for Windows).	Press the ▲ key to increase the gamma value (Tone becomes darker) and press the ▼ key to decrease the gamma value	1~ 5

		(tone becomes lighter).	
Color - Press ENTER to enter the Color menu.			
Color Temperature	Normal: Allows video and still photographs to be viewed with natural coloring. This is the factory default color.	Press the ▲ or ▼ keys to select this option.	
	Bluish: Applies a cool tint to the image and is factory pre-set to the PC industry standard white color.		
	Reddish: Applies a warm tint to the image and is factory pre-set to the news print standard white color.		
	User Mode: The blend of the Red, Green and Blue primary colors can be altered to change the color tint of the image. Go to the succeeding Red , Green , and Blue menus to change the settings.	Press the ▲ or ▼ keys and the ENTER key to select Red , Green , or Blue . Then use the ▲ or ▼ keys to make the color adjustments.	
Red	Tailors the image color tint.	Press the ▲ or ▼ keys to adjust the value.	0 to 100
Green	Decreasing one or more of the colors will reduce their respective influence on the color tint of the image. (e.g. if you reduce the Blue level the image will gradually take on a yellowish tint. If you reduce Green, the image will become a magenta tint.)		
Blue			
Hue	Adjusts the degree of how we perceive colors.	Press the ▲ or ▼ keys to adjust the value.	0 to 100
Saturation	Adjusts the purity degree of colors.	Press the ▲ or ▼ keys to adjust the value.	0 to 100
Reset Color	Resets the custom color settings to the factory defaults.	Press the ▲ or ▼ keys to change the settings.	<ul style="list-style-type: none"> • YES • NO
Press MENU to leave the Color menu.			

Picture Advanced Menu

Available menu options may vary depending on the input sources, functions and settings. Menu options that are not available will become grayed out.

1. Press the **MENU** key to display the main menu.
2. Press the **▲** or **▼** keys to select **PICTURE ADVANCED** and then press the **ENTER** key to enter the menu.
3. Press the **▲** or **▼** keys to move the highlight to a menu item and then press the **ENTER** key to select that item.
4. Press the **▲** or **▼** keys to make adjustments or selections.
5. To return to the previous menu, press the **MENU** button.

Item	Function	Operation	Range
Picture Mode	<p>Selects a picture mode that best suits the type of images shown on the screen.</p> <ul style="list-style-type: none"> • Standard - for basic PC application. • Movie - for viewing videos. • Game - for playing video games. • Photo - for viewing still images. • sRGB - for better color matching representation with the peripheral devices, such as printers, DSCs, etc. • Eco - for saving electricity with low power consumption by providing minimum brightness for all running programs. 	Press ▲ or ▼ keys to change the settings.	<ul style="list-style-type: none"> • Standard • Movie • Game • Photo • sRGB • Eco
Senseye Demo	Displays the preview of screen images under the selected mode from Picture Mode. The screen will be divided into two windows; the left window demonstrates images of Standard mode, while the right window presents the images under the specified mode.	Press ▲ or ▼ keys to change the settings.	ON OFF
Dynamic Contrast	The function is to automatically detect the distribution of an input visual signal, and then to create the optimal contrast.	<p>Press the ENTER key to select this option.</p> <p>Press the ▲ or ▼ keys to change the settings.</p>	0 to 5

Display Mode	<p>This feature is provided to allow aspect ratios other than 16:9 to be displayed without geometric distortion.</p> <ul style="list-style-type: none"> • Overscan – Slightly enlarges the input image. Use this feature to hide annoying edge noise if present around your image. • Full - Scales the input image to fill the screen. Ideal for 16:9 aspect images. • Aspect - The input image is displayed without geometric distortion filling as much of the display as possible. <p>Depending on the purchased model, 16:9 images will fill the screen horizontally while 4:3 images will fill the screen vertically.</p> <p> To find out the monitor aspect ratio of the purchased model, please check the Specification document on the provided CD.</p>	<p>Press the ▲ or ▼ keys to change the settings.</p> <p> The options under Display Mode will be different depending on the input signal sources.</p>	<ul style="list-style-type: none"> • Overscan • Full • Aspect
Color Format	<p>Determines the color space (RGB or YUV) based on the following detected video signal:</p> <ul style="list-style-type: none"> • D-Sub (VGA) from PC: The default Color Format is RGB. • D-Sub (Component) from a video device: The default Color Format is YUV. <p> You might need to manually set the Color Format if colors shown on the monitor screen do not display properly.</p>	<p>Press the ENTER key to select this option.</p> <p>Press the ▲ or ▼ keys to change the settings.</p>	<ul style="list-style-type: none"> • RGB • YUV

Audio menu

Note: Just for GL950AM/G950AM

Available menu options may vary depending on the input sources, functions and settings. Menu options that are not available will become grayed out.

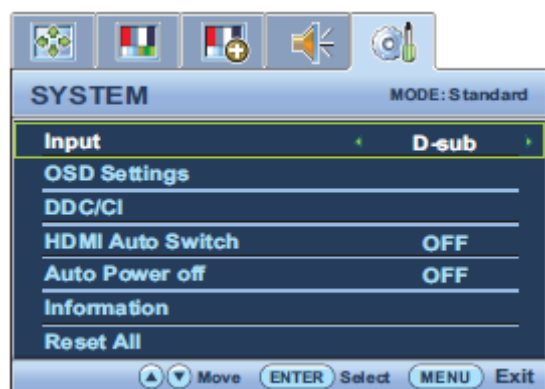

1. Press the **MENU** key to display the main menu.
2. Press the ▲ or ▼ keys to select **AUDIO** and then press the **ENTER** key to enter the menu.

3. Press the ▲ or ▼ keys to move the highlight to a menu item and then press the **ENTER** key to select that item.
4. Press the ▲ or ▼ keys to make adjustments or selections.
5. To return to the previous menu, press the **MENU** button.

Item	Function	Operation	Range
Volume	Adjusts the audio volume	Press the ▲ key to increase the volume and press the ▼ key to decrease the volume.	0 ~ 100
Mute	Mutes the audio input	Press the ▲ or ▼ keys to change the settings.	<ul style="list-style-type: none"> • ON • OFF

System menu

Available menu options may vary depending on the input sources, functions and settings. Menu options that are not available will become grayed out.

1. Press the **MENU** key to display the main menu.
2. Press the ▲ or ▼ keys to select **SYSTEM** and then press the **ENTER** key to enter the menu.
3. Press the ▲ or ▼ keys to move the highlight to a menu item and then press the **ENTER** key to select that item.
4. Press the ▲ or ▼ keys to make adjustments or selections.
5. To return to the previous menu, press the **MENU** button.

Item	Function	Operation	Range
Input	Use this to change the input to that appropriate to your video cable connection type. ⓘ Analog-only models do not have the Input function.	Press ▲ or ▼ keys to change the setting.	<ul style="list-style-type: none"> • D-sub (VGA)
OSD Settings - Press ENTER to enter the OSD Settings menu.			
Language	Sets the OSD menu Language.	Press ▲ or ▼ keys to change the settings.	<ul style="list-style-type: none"> • English • French • German

		 The language options displayed on your OSD may differ from those shown on the right, depending on the product supplied in your region.	<ul style="list-style-type: none"> • Italian • Spanish • Polish • Japanese • Czech • Traditional Chinese • Hungarian • Simplified Chinese • Serbo-Croatian • Romanian • Dutch • Russian • Swedish • Portuguese
H. Position	Adjusts the horizontal position of the OSD menu.	Press ▲ or ▼ keys to change the settings.	0 to 100
V. Position	Adjusts the vertical position of the OSD menu.		0 to 100
Display Time	Adjusts the display time of the OSD menu.		5 / 10 / 15 / 20 / 25 / 30 sec
OSD Lock	Prevents all the monitor settings from being accidentally changed. When this function is activated, the OSD controls and hotkey operations will be disabled.	Press ▲ or ▼ keys to change the settings.  To unlock the OSD controls when the OSD is preset to be locked, press and hold the MENU key for 15 seconds to enter the OSD Lock option and make changes. Alternatively, you may use the ▲ or ▼ keys to select NO in the OSD Lock submenu from the OSD Settings menu, and all OSD controls will be accessible.	YES NO
Press MENU to leave the OSD Settings menu.			
DDC/CI*	Allows the monitor settings to be set through the software on the PC.	Press the ENTER key to select this option. Press the ▲ or ▼ keys to change the settings.	ON OFF
Auto Power off	Sets the time to power off the monitor automatically in power	Press the ENTER key to select this option. Press the ▲ or ▼ keys	<ul style="list-style-type: none"> • OFF • 10min.

	saving mode.	to change the settings.	<ul style="list-style-type: none"> • 20min. • 30min.
Information	Displays the current monitor property settings.		<ul style="list-style-type: none"> • Input • Current Resolution • Optimum Resolution (best with the monitor) • Model Name
Reset All	Resets all mode, color and geometry settings to the factory default values.	Press ▲ or ▼ keys to change the settings.	YES NO

💡 *DDC/CI, short for Display Data Channel/Command Interface, which was developed by Video Electronics Standards Association (VESA). DDC/CI capability allows monitor controls to be sent via the software for remote diagnostics.

Factory OSD Menu

The service page needs to include that information: Model name, S/N, Vender, panel, scalar, F/W version, Monitor on time, Backlight on time.

1. Trigger method: Press "Menu" key and Power on.
2. Press the Menu key will display the service page
3. Press menu key will close the service page.
4. Power off will quit the service mode
5. At the service mode, the key function is same as normal OSD define.
6. The timer can only reset at the service mode by "Timer Reset" (Timer Reset moves to SI factory Area). And needs to have a warning message to double confirm the reset function. The timer should record up to 99999 hours and will be reset once launch.
7. Add BenQ logo on/off item, the default is "on"
8. Add the auto power on item, the default is "on"
9. Add the timer reset warning message, when select the timer reset item, then the warning message will display and need to confirm it again and the default is "No".
10. Panel type define need to have the panel version
11. F/W version need to define the dual or analog model
12. Add "Resolution Notice" item, the default is "off"

Six Angles' View

Product Disassembly/Assembly

Note: Take GL950AM for example.

Note: The speaker just for G950AM/GL950AM.

Disassembly

1) Remove the base

Place the monitor face down on a smooth surface. Be careful to avoid scratch and injury during the process of uninstall. And then remove the base.

2) Remove the stand.

Press the hole; pull at the stand strongly at the same time.

3) Remove the rear cover

Remove screws in red:

Pull apart bezel & rear cover.

Note: Be careful, the BEZEL CLIP is easy to break.

Note: The positions of the clips on the rear cover are as follow. There are some small gaps between CLIPS.
It's suggested to separate bezel and rear cover from the gaps.

4) Remove the main frame from the panel.

Remove the black rubberized fabric and aluminum foil.

Note: When you assemble the LCD, you must tidy the wire as follow picture.

Pull out the wire to remove the mainframe.

5) Remove the AC cover from the mainframe.

6) Remove the boards from the main frame.

Remove screws in red; remove the black rubberized fabric, and then pull out the wire which connects speaker and power board.

Pull out the wire to remove the main board and power board.

7) Remove the speaker.

Pull at the foot of the speaker strongly as follow picture.

The mainframe

8) The panel

Assembly

1) Assemble the speaker on the main frame.

Pull at the foot of the speaker strongly. The wire of the speaker will be traversed from the middle hole as follow picture. The wire will connect power board and speaker.

2) Assemble the wire to the main board.

The left wire will connect main board and key board; the right wire will connect main board and panel.

3) Assemble the main board and power board on the main frame.

Connect the main board and power board.

Connect the speaker and power board; lock the main board and power board on the mainframe; stick the black rubberized fabric.

4) Assemble the panel on the bezel.

5) Assemble the main frame and the key board.

Connect key board and main board, panel and power board, panel and main board.

Stick the black rubberized fabric and aluminum foil to tidy the wire.

6) Assemble the AC-COVER.

7) Assemble the rear cover.

Lock the main frame and rear cover as follow picture.

8) Assemble the stand.

Push the stand as follow picture.

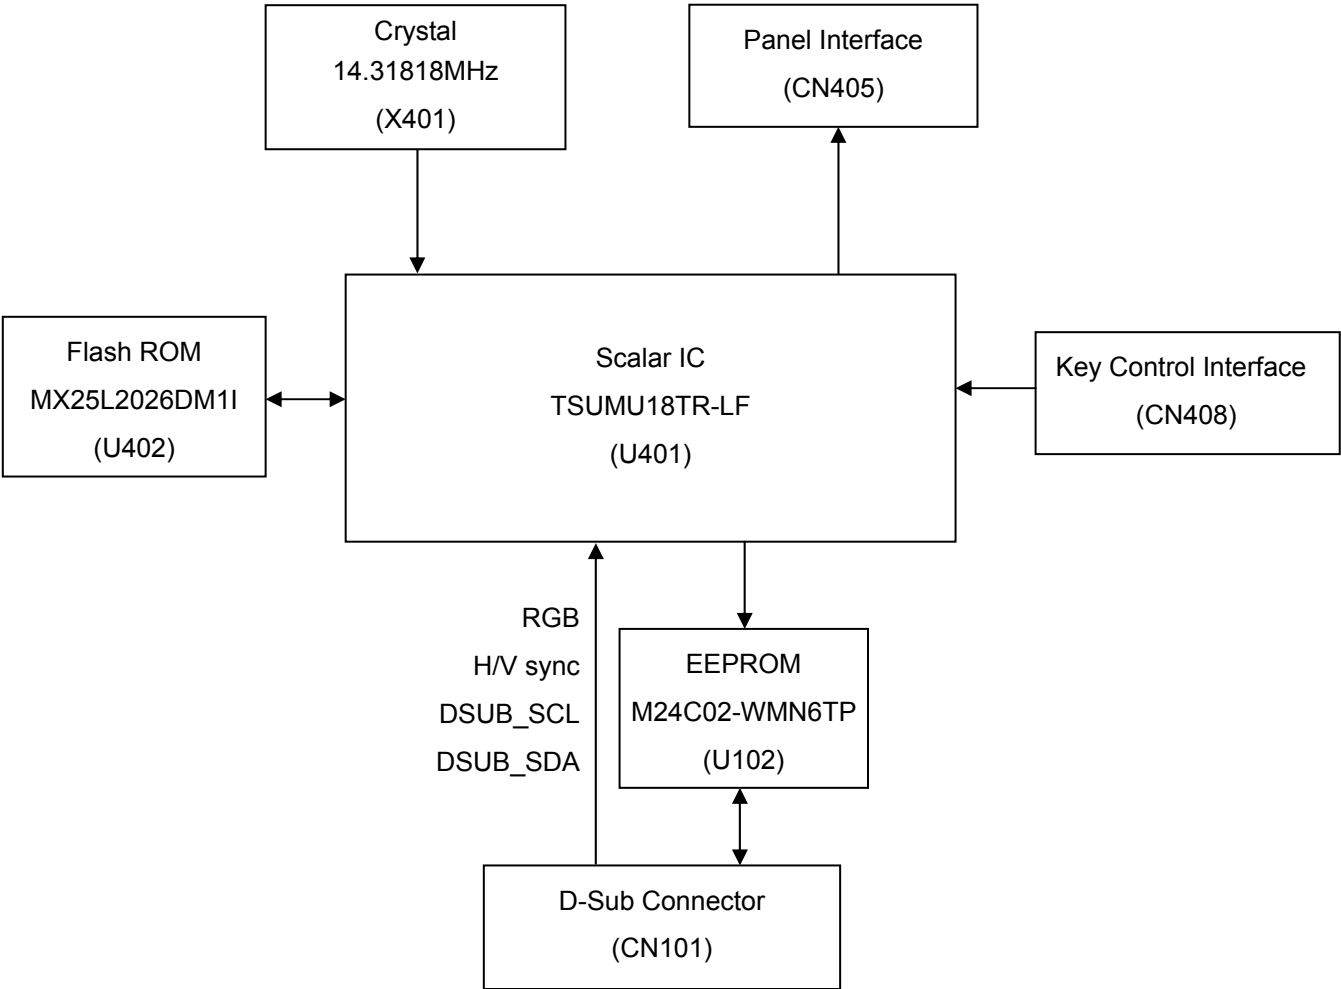

9) Assemble the base.

Troubleshooting

Frequently asked questions (FAQ)

? The image is blurred:

 Read the instructions on the link "**Adjusting the Screen Resolution**" on the CD, and then select the correct resolution, refresh rate and make adjustments based on these instructions.

? How do you use a VGA extension cable?

 Remove the extension cable for the test. Is the image now in focus? If not, optimize the image by working through the instructions in the "**Adjusting the refresh rate**" section on the link "**Adjusting the Screen Resolution**". It is normal for blurring to occur due to conduction losses in extension cables. You can minimize these losses by using an extension cable with better conduction quality or with a built-in booster.

? Does the blurring only occur at resolutions lower than the native (maximum) resolution?

 Read the instructions on the link "**Adjusting the Screen Resolution**" on the CD. Select the native resolution.

? Pixel errors can be seen:

 One of several pixels is permanently black, one or more pixels are permanently white, one or more pixels are permanently red, green, blue or another color.

- Clean the LCD screen.
- Cycle power on-off.
- These pixels are permanently on or off and that is a natural defect occurs in LCD technology.

? The image has a faulty coloration:

 It has a yellow, blue or pink appearance.

Select MENU > PICTURE > Color > Reset Color, and then choose "YES" in the "Caution" message box to reset the color settings to the factory defaults.

If the image is still not correct and the OSD also has faulty coloration, this means one of the three primary colors is missing in the signal input. Now check the signal cable connectors. If any pin is bent or broken off, please contact your dealer to get necessary support.

? No image can be seen:

 Is the prompt on the display illuminated in green?

If the LED is illuminated in green and there is a message "Out of Range" on the screen, this means you are using a display mode that this monitor does not support, please change the setting to one of the supported mode. Please read the "**Preset display modes**" section from the link "**Adjusting the Screen Resolution**".

? Faint shadow from the static image displayed is visible on the screen:

- 
- Activate the power management function to let your computer and monitor go into a low power "sleep" mode when not actively in use.
 - Use a screensaver to prevent the occurrence of image retention.

? Is the prompt on the display illuminated in orange?

 If the LED is illuminated in orange, the power management mode is active. Press any button on the computer keyboard or move the mouse. If that does not help, check the signal cable connectors. If any pin is bent or broken off, please contact your dealer to get necessary support.

? Is the prompt on the display not illuminated at all?

 Check the power supply mains socket, the external power supply and the mains switch.

? The image is distorted, flashes or flickers:

 Read the instructions on the link "**Adjusting the Screen Resolution**" on the CD, and then select the correct resolution, refresh rate and make adjustments based on these instructions.

? You are running the monitor at its native resolution, but the image is still distorted.

 Images from different input sources may appear distorted or stretched on the monitor running at its native resolution. To have the optimal display performance of each type of input sources, you can use the "Display Mode" function to set a proper aspect ratio for the input sources.

? The image is displaced in one direction:

 Read the instructions on the link "**Adjusting the Screen Resolution**" on the CD, and then select the correct resolution, refresh rate and make adjustments based on these instructions.

? The OSD controls are inaccessible:

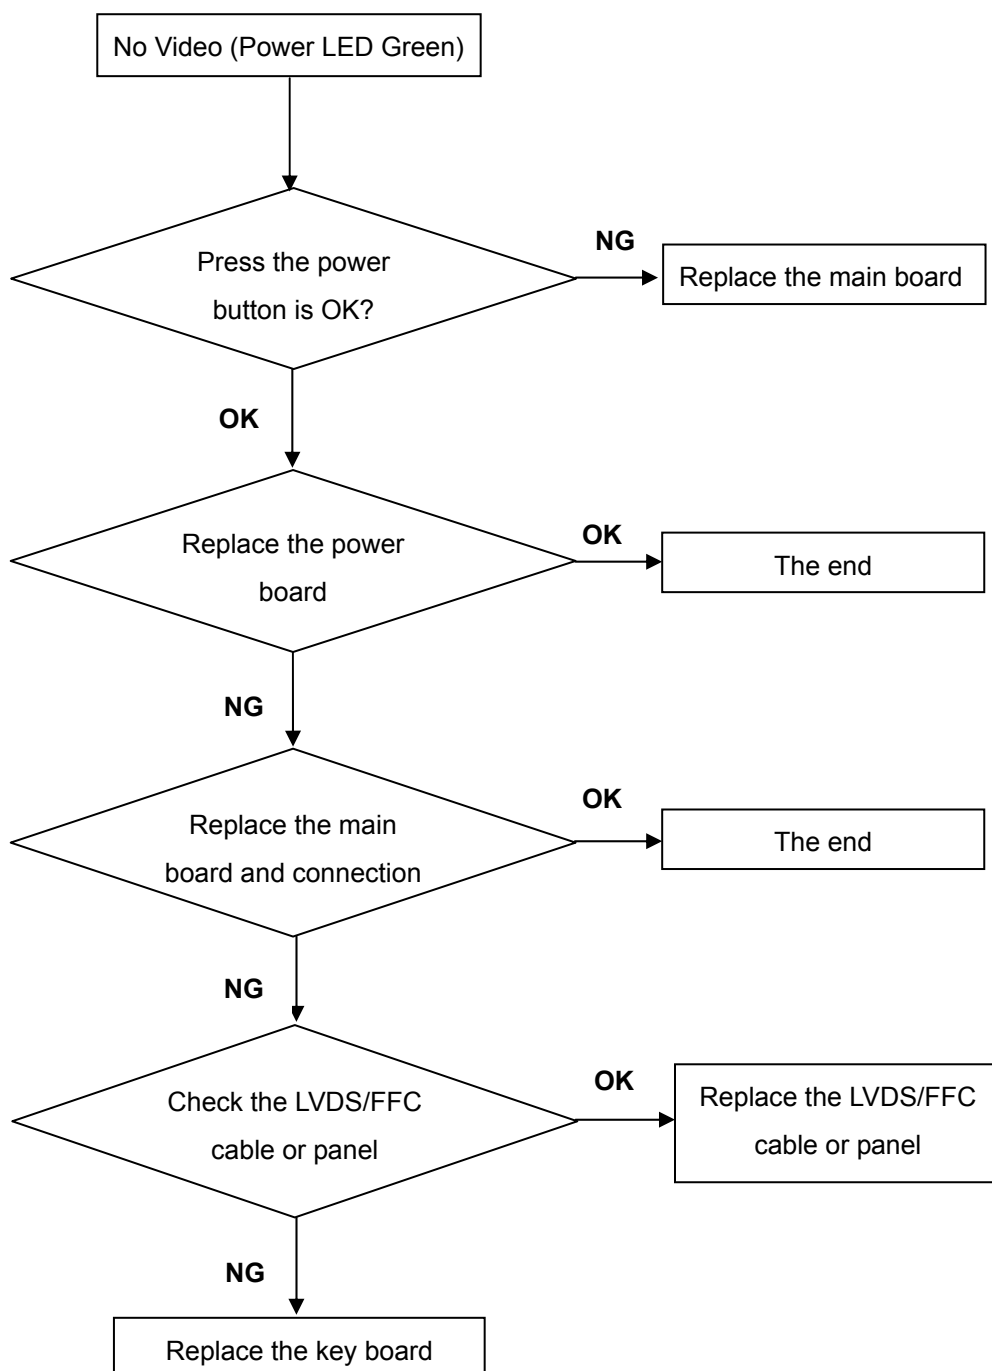

-  • To unlock the OSD controls when the OSD is preset to be locked, press and hold the "MENU" key for 15 seconds to enter the "OSD Lock" option and make changes.
- Alternatively, you may use ◀ or ▶ keys to select "NO" in the "OSD Lock" submenu from the "OSD Settings" menu (under SYSTEM), and all OSD controls will be accessible.

If your problems remain after checking this manual, please contact your place of purchase or e-mail us at:
